## Early Immersion Success

Early Immersion was great!

There is nothing more refreshing than speaking to young students about careers in Computing and Engineering. “Engineers are problem solvers”, said Dr. Tao, the Dean of NSU’s College of Computing and Engineering (CCE). On November 2nd, 2017, Dr. Snyder, Dr. Levy, Dr. Salinas, Dr. Ramos and Dr. Wang all took time out of their busy schedules to have a word with NSU’s freshmen students about careers in Engineering and Technology. We had students from Peru, Hawaii, Maine, Texas and many other places gathering together to learn more about the possibilities in terms of their careers. It was great to see young aspiring students concerned about the environment, about Cybersecurity, and Marine life. As Steve Jobs once said: “Let’s go invent tomorrow instead of worrying about what happened yesterday.”
