## NSUWorks Citation

Nova Southeastern University, "Managing Your Data" (2016). *Alvin Sherman Library Brochures, Pamphlets, Reports*. 10.  
[https://nsuworks.nova.edu/lib\\_brochures/10](https://nsuworks.nova.edu/lib_brochures/10)

This Book is brought to you for free and open access by the NSU Digital Collections at NSUWorks. It has been accepted for inclusion in Alvin Sherman Library Brochures, Pamphlets, Reports by an authorized administrator of NSUWorks. For more information, please contact [nsuworks@nova.edu](mailto:nsuworks@nova.edu).

# MANAGING YOUR DATA

## Collection, preservation and accessibility

*NSUWorks is offered free to faculty by the Nova Southeastern University Libraries. It brings together all of the university's research, scholarly and creative works in a centralized location with the aim of preserving and providing online open access to these works.*

# NSUWorks

*A central repository for NSU research,  
scholarship and creative output*

<http://nsuworks.nova.edu>

As NSU faculty you are encouraged to use **NSUWorks**, a digital repository and publication platform designed to collect, preserve and make accessible the research, scholarship and creative output of NSU faculty, students and staff. It is the mission of NSUWorks to facilitate the discovery of NSU's scholarly communications, provide instant access to full text works and preserve these materials in an open, digital environment.

### **What is Data?**

In this context, data is described as units of information observed, collected or created during the course of research. Data typically falls into four categories:

1. Observational; 2. Experimental; 3. Simulation; and 4. Derived or Compiled.

### **Storage and File Types**

NSUWorks has unlimited storage capabilities and the ability to accept and disseminate any discrete file type.

### **Funding Agency Requirements**

It is important to identify and comply with what the funding agency requires when it comes to sharing data and results, both at the proposal stage and as a condition of award. Some require a data management plan (National Science Foundation) while others just encourage data sharing (Institute of Museum and Library Services).

### **Creative Commons Options**

Creative Commons licenses give you a way to set parameters on how your data can be utilized. Data and facts are not copyrightable but by using Creative Commons, you can choose a license to apply to your data that will limit commercial or derivative use. You are encouraged to make it as open as appropriate to enable others to use and build upon your data. You can read more about Creative Commons at: <http://creativecommons.org>

### **Ethical Issues**

All sensitive information in your data should be redacted before depositing in a public repository. Access to the data may need to be restricted for a certain number of years in order to ensure privacy.

To begin using this **FREE** service offered through the NSU Libraries, please contact:
