More Collaboration Across The Globe

On November 30th Nova Southeastern University (NSU) had the pleasure of welcoming the Vice President of Shandong Jianzhu University (SDJZU) to our beautiful Davie Campus.

Four administrators, led by vice president, from SDJZU came to Nova Southeastern University (NSU) to continue collaboration discussions with the College of Engineering and Computing (CCE). Both universities have agreed to collaborate particularly in the areas of Computer Science and Information Systems and to foster exchange of students and joint research efforts. The one-day visit was short, but fruitful as a memorandum of understanding was signed after the SDJZU toured the NSU campus and CCE. This will be the first step towards joint research and student mobility.

In the picture shown below from left to right are:

REN Ruibo, Dean, Professor, School of Transportation Engineering (SDJZU)

Dr. DeNapoli, Associate Dean of International Affairs (NSU)

FU Chuanguo, Vice President, Professor (SDJZU)

Dr. Yong Tao, Dean of College of Engineering and Computing (NSU)

CHEN Baoming, Director, Dean, Professor, Office of International Exchanges and Cooperation, School of International Education (SDJZU)

ZHANG Yunchu, Dean, Professor, School of Information and Electronic Engineering (SDJZU)

Below NSU's Provost and Executive Vice President of Academic Affairs, Dr. Ralph Rogers, received a gift from SDJZU's Vice President, Dr. FU Chuanguo after signing the MOU.

About Shandong Jianzhu University (SDJZU):

Located in Jinan, Shandong province, China, and founded in 1956, Shandong Jianzhu University is a public engineering-based multidisciplinary university specialized in civil construction, also covering engineering, science, management, literature, arts, law and agriculture, with a student body of approximately 26,000 students.
