"NIGHT IN PORTUGAL" HONORS LADIES OF GOLD KEY

"THE SILVER FOX"

Capt. Inacio Vieira
Host to Gold Key

Meet your host, Captain Inacio Vieira of the good ship Santa Maria, on board which GOLD KEY will stage its spring Dinner Saturday night, May 4, honoring its ladies.

The handsome Captain has had quite a career since his birth in Lisbon 46 years ago. He has been with the Santa Maria since she was launched in 1954. He was first mate until 1961 when he was promoted to Commander.

He is rightfully known as "The Silver Fox of the Atlantic."

Captain Inacio is the God Father of Glenda Maria, daughter of Jorge A. Martinez, of the Shaw Brothers Shipping Co., GOLD KEY's contact with the Portuguese's line. Glenda Maria was baptized on board the Santa Maria in 1966.

A final interesting note on the good captain is that he is a happily married man and the father of nine children.

Guests Invited Aboard Santa Maria Between Eight and Eight-Thirty MAY 4

Final details of the "Night in Portugal," formal spring dinner and dance honoring the ladies of GOLD KEY, are being arranged by the GOLD KEY Directors.

The Santa Maria will be at her usual pier. GOLD KEY guests are asked to board between 8 and 8:30 p.m. and proceed directly to the Cocktail Lounge on "A" deck. No boarding before 8 p.m.

Port Security Officer C. G. Hamm and his assistants will be on hand to assist in getting to the dock. We are requested to enter the Port at the Main Entrance on U.S. One at the big S.W. 24th Street (Road 84) Gate.

Take any north-south road to 24th Street, then proceed east.

Signs will point the way "to Passenger Ships," and the "Santa Maria." It is suggested that you have your invitations with you.

The Santa Maria and docksides will be brilliantly lighted.

TWO LUCKY COUPLES

One feature of Spring Dinner, announced today by President "Cy" Young, will be the presentation to two GOLD KEY couples, of a door prize of round-trip complimentary tickets, valued at approximately \$1,000 for each person, on the Santa Maria for a late 1968 summer cruise to Lisbon.

MEET NEW MEMBERS

EARLE M. SCOTT

He was the founder and former chairman of the board of Scott Aviation Corp. and Scott Industries, Inc., and is now the distinguished president of Earle M. Scott & Associates, Inc., of Boca Raton and Lancaster (Buffalo) New York.

He was born in Canada and attended St. Catharine's Collegiate Institute. In 1923 he relocated in the U.S.A. with American Radiator from 1923 to 1927, and spent several months in the firm's foundry in France. From 1927 to 1939 he was with the Lancaster (New York) Malleable and Steel Corporation. During this period he

became a pilot.

In 1940 with two other men, he formed what was to become "Scott Aviation Corporation" and built a small plant in Lancaster on the site where the present 600-employee plant is located. During World War II the company became interested in design and production of breathing equipment for bomber crews and operated throughout the war in the production of similar items, including other aircraft equipment.

When the war ended, his company engaged in the production of breathing equipment for a wide range of uses, including protection of firemen and industrial workers. Later the design and production of equipment for the protection of passengers in today's modern Jet Airliners and the protection of pilots in Military Aircraft.

In the early 1960's he organized Scott Industries, Inc., acquired two other companies in related fields, created a new company in the Educational field and merged all into one of the popular conglomerates. In mid-1967, he retired from the resulting organization, accepting only the status of a Consultant.

AFFILIATIONS REFLECT SCOPE OF ACTIVITIES

Mr. Scott is a member of the American Institute of Aeronautics and Astronautics, International Association of Fire Chiefs (President's Advisory Council), National Fund for Medical Education—Aviation Industry Committee, Aero Club of Buffalo, National Security Industrial Association, Flight Safety Foundation, Aviation Distributors and Manufacturers Association, Associated Industries of New York State, National Small Businessmen's Association, Industrial Safety Equipment Association, Newcomen Society in North America, Better Business Bureau (Director), Community Welfare Council of Buffalo and Erie County, United Fund, Chamber of Commerce, National Conference of Christians and Jews (Executive Board, Buffalo Chapter), and a Trustee of the International Fire Administration Institute. In 1956 he was chosen Lancaster's Citizen of the Year.

MYRUS, THE MENTALIST

An especial favorite of the ladies—tall, soft voiced Myrus—will entertain at an audience-participation type show at GOLD KEY's spring dinner on board the Santa Maria May 4.

Myrus, a real pro, performs without gimmicks, in a manner which has actually baffled the world of science. He has an uncanny ability in extrasensory perception.

He has delighted audiences on the Ed Sullivan Show, at the Waldorf Astoria, and here in Fort Lauderdale at Pier 66. . . . Maybe he'll help recover some lost articles . . . tell us what we plan to do this summer . . . whose going to visit us . . . at any rate, he entertains!

NIGHT IN PORTUGAL (Cont'd)

The dinner menu has been approved by Messrs. Mendez, Barry, Young and their wives, and promises to be something special. Portuguese dolls will be presented the ladies as souvenirs.

"Myrus the Mentalist" will furnish entertainment at the dinner. And immediately following, in the Lounge, will be a short film, made at "Bob" Barber's and "Stan" Emerson's Univis plant, of Nova University Advisory Board members, including two Nobel Laureates.

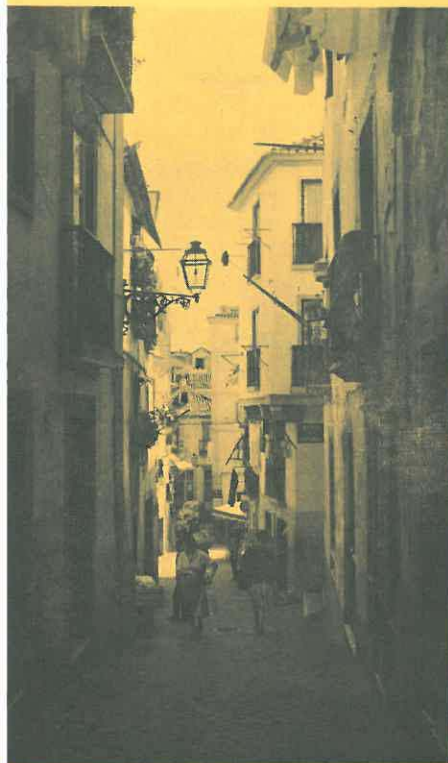

Dancing to the Ship's six-piece orchestra will continue until One a.m.

NEWSY DOTS

President Cy Young, and Mary Ellen, Treasurer Greg Barry and Michaux and John D. Mendez, hospitality chairman, and Irene, lunched on board the Santa Maria on Saturday, March 30, as a preliminary to the Spring Dinner on board May 4. In the parlance of Bonnie and Clyde they "cased the joint," tested foods and wines, met the chef and chief purser, discussed decorations for the "Night in Portugal" gala, and otherwise helped get some early planning accomplished.

STUDENT PRESIDENT

Joaquin Lira-Olivares

GOLD KEY has met the University president; the deans and faculty members; and Trustees; and major officers and supporters.

Now it's time to meet one of its students and judge what kind of individual has been selected to become a part of Nova's first graduating class.

Working for his doctorate in physics is Joaquin Lira-Olivares, who studies and performs research under Dr. Ray Pepinsky.

ATOMS OF RIME

by

DR. BRUNO C. SCHMIDT

NOVA PRESIDENT

We know a man who has the gift
Of knowing how to lift
Obstacles that only seem . . .
He's a man with a true dream.

No man can stand as straight and tall;
Hypotheses may rise and fall —
But in time, truth always meets the day
The President Warren Winstead way.

May God imbue his ardent mind
With visions of how to seek and find
The Stone of Stones of ancient time
In Nova's bright new star sublime.

PRESIDENT'S CORNER

Your officers and directors have made an especial effort to provide a different and appealing type of entertainment for you for the Annual Spring Dinner.

It's your party. We want you to enjoy it.

A handwritten signature in cursive that reads "Cy Young".

President
GOLD KEY of Nova University

Student President (cont'd)

Joaquin holds a master's degree from the University of California at Berkeley. He was a student instructor there. He is an advisor in Physics-Curriculum to the Ministry of Education (Eduplan) at Caracas, Venezuela.

He was selected by the University's 19 students to be president of their Graduate Student Council, and as such this young Venezuelan holds the honor of being the historic first president of a Nova University student body!

As president he sits at faculty meetings as a student representative, a unique Nova practice. He has himself been a professor at Central University at Venezuela and at the Instituto Pedagógico (Teachers College) in Caracas.

Joaquin is an ornithologist, familiar with many of the birds of his home country and of Florida. The Everglades fascinate him. With two of his classmates from India, Siddhartha Ray and Dr. Aijaz Khan, he has crossed Alligator Alley and gone up to the great American stork (wood Ibis) breeding areas in Corkscrew Rookery, and has seen the Roseate Spoonbills of Everglades National Park.

He is in demand as a speaker. He talked on the Latin American program for teaching physics to the Broward United Nations Association. He has come in contact with GOLD KEY in several capacities. He spoke for Jimmy Donn, Jr.'s secretary, Maralee Springer, to her Business and Professional Women's Organization. He discussed affairs in Chile, Brazil and Venezuela.

Joaquin has been invited by another GOLD KEY member to evaluate a new method for teaching physics. The Nova student body president is 31 years old, is married and has four young children.
