# **Bachelor of Science in Respiratory Therapy (B.S.R.T.), Postprofessional (completion) Overview 2016**

---

[Apply Now](#)

[Request Info](#)

As a practicing Registered Respiratory Therapist (RRT), you can upgrade your skills and increase your employment options by obtaining a Bachelor of Science in Respiratory Therapy (B.S.R.T.). The field is changing to require advanced education, and we make the process convenient for working professionals.

## **What you'll study**

Our online program includes professional courses that cover 39 credits in subjects such as sleep medicine, legal issues, and evidence-based practice. Six credits of practical fieldwork courses are required. A specialization option in Health Care Management requires an additional 15 credits and prepares you for financial and other leadership roles.

## **How you'll learn more**

You'll appreciate the convenience of online coursework and the continuous support from instructors. Your online courses provided 24/7 access to lectures and materials that fit around your schedule. Your practical fieldwork (practicum, internship, or scientific investigations) allows you to explore new fields and cutting-edge topics.

## **Where it can take you**

You already know that the respiratory care profession offers a great future. Perhaps you are ready to step into a position in management, research, or education. The success of our alumni proves that many choices and exciting opportunities are waiting.
