MEMORANDUM

TO: Former Students in the Joint M.S./Ed.S.
"Microcomputer Applications in Education" Program

FROM: Al P. Mizell, Director *apm*

SUBJECT: Closing of the Program

DATE: March 9, 1987

By now, I am sure you are aware that the Microcomputer Applications in Education program was closed down in 1985. However, since I did not see a copy of a written notice to this effect in your file, I wanted to be sure that you understood that the program no longer exists.

Most of the students have already graduated or withdrawn, but there are three students close to graduation. I will continue to work with you until this summer if you have a firm, written timetable in my hands before the end of March. All I need from you is a list of the courses/practicums that you still have to complete and the deadline date for completing each prior to the end of the summer (1987).

If I do not hear from you, I will assume you do not plan to attempt to complete this degree. We have reopened the program as a computer-based degree program. If you wish to pursue that program instead, simply write me about it before the end of March.
