# Entry B.S. Nursing Program Overview 2016

---

[Apply Now](#)

[Request Info](#)

Do you have most of your prerequisites completed and want to pursue nursing? Then continue your journey for **two years and three months** to become a highly-qualified nurse with NSU's College of Nursing Entry B.S. Nursing Program. You will transition smoothly into the bachelor's program once you have completed the required 39 prerequisite course requirements.

## **What you'll study.**

Human anatomy, chemistry, and microbiology are foundational courses in the entry level nursing program. Explore nutrition and psychology. Become well-rounded with courses in writing, mathematics, and your choice of humanities. Every course moves you closer to the Bachelor of Science in Nursing (B.S.N.) degree.

## **How you'll learn more.**

NSU has emphasized healthcare since its inception. Only professionals teach our classes, where faculty know your name and provide you individual attention. Faculty experiences cover a variety of healthcare settings, and an interdisciplinary perspective will help increase your versatility. Plus, the Entry B.S. Nursing Program at NSU connects perfectly with the nursing school's B.S.N. program.

## **Where it can take you.**

The competitive nursing field is changing to require the B.S.N. for new nurses, and you'll become eligible for this degree program after completing the Entry B.S. Nursing Program requirements. Completion of the B.S.N. prepares you for the National Council Licensure Examination-Registered Nurse (NCLEX) and your initial licensure as a registered nurse (R.N.).
