The MMPI is the most widely used personality inventory in the world. This workshop is conducted by one of the psychologists who collaborated on the revision. It is designed to familiarize the professional with the new MMPI-2.

Focus Statement

This workshop is a training session designed to introduce participants to the changes in the new test form and to discuss new interpretive strategies for the MMPI-2. The decision to restandardize the instrument was made after a careful review of the impact it would have on users. After nearly six years of work, the restandardization project is complete and a new test (MMPI-2) and interpretive materials are available.

This training session is designed for professionals who have experience with the original MMPI and will focus on the similarities and differences between the MMPI-2 and the original MMPI and will address the importance of these changes on clinical practice.
Credit

Participants will receive seven continuing education credits for one day of attendance. Those attending both days will receive fourteen continuing education credits. The State of Florida accepts these C.E. credits for licensed Psychologists, Clinical Social Workers, Marriage and Family Therapists, and Mental Health Counselors.

Place

Nova University
Mailman-Hollywood Building Auditorium (Second Floor)
College Avenue
Fort Lauderdale
Florida 33314
(305) 475-7570

James N. Butcher, Ph.D. is currently Professor of Psychology in the Department of Psychology at the University of Minnesota. He received his Ph.D in Clinical Psychology at the University of North Carolina in 1964.

He has maintained an active research program in the areas of personality assessment, abnormal psychology, cross-cultural personality factors, and computer based personality assessment. He is a member of the University of Minnesota Press' MMPI Consultative Committee. Since 1982 the committee has been actively engaged in a large scale project to revise and restandardize the MMPI.

Dr. Butcher serves as consulting editor for numerous journals in psychology and psychiatry. He founded the Symposium on Recent Developments in the Use of the MMPI in 1965 and has organized this conference series for the past 24 years. He also founded the International Conference on Personality Assessment, a program devoted to facilitating international research on personality assessment.

Dr. Butcher has been actively involved in developing and organizing disaster response programs for dealing with human problems following airline disasters. He also consults with airlines in the psychological screening of airline pilot applicants.

PSYCHOTHERAPY OF SCHIZOPHRENIA: THE TREATMENT OF CHOICE
Presented by: Bertram Karon, Ph.D.
December 1 - 2, 1990

Sponsored By
Nova University's School of Psychology
Nova University is approved by the American Psychological Association to offer Category 1 continuing education for psychologists. The APA Approved Sponsor maintains responsibility for the program.

Nova University is also approved by the Board of Clinical Social Work, Marriage and Family Therapy, and Mental Health Counseling for continuing education certification. Provider #CM-065-90.

The School of Psychology is dedicated to providing the highest quality education to its students, superior mental health services to the community, and research contributions to the mental health sciences.

The school has two A.P.A. approved doctoral programs in Clinical Psychology. The Ph.D. curriculum is a traditional clinical-research program while the Psy.D. program is primarily clinical-applied in orientation.

Nova University also has a Post-Doctoral Institute of Psychoanalysis and Psychotherapy and offers a Master's Degree in Mental Health Counseling.
