Research As An Undergrad?

- Faculty Advisor: Dr. Robert Smith
- Current Project: How periodic disturbance of spatial structure of *S. aureus* and *P. aeruginosa* determines their composition.
- Significance: Increase shelf life of antibiotics
- My contribution: Mathematical modeling

Take Away Message

- Listen attentively in class, especially on the first day
- Look for those key moments where the professor confesses their interesting research topics
- Ask early
- Decide on the type of research (modeling, wetlab, or public intervention)
- Research about a professor you like and briefly read a few of their papers if possible
- Monitor handshake periodically and attend webinars
- Most importantly, choose one that you love and have fun!

Scribing during COVID?

- Specialty : Oncology
- Part time : 20 hours/week
- Creating Follow up Notes and Procedure Notes
- Benefits:
 - a. Learn about new biomedically advanced treatments
 - b. Exposure to 'A Day in the Life of A Physician'
 - c. Paid 'shadowing'
 - d. Being an active part of a medical community
