[Request Info](#)

Registered nurses wishing to advance quickly to higher levels have the option to apply directly to the Master of Science in Nursing (M.S.N.) program. The B.S.N. degree is included, along with its benefits, so you'll save time and money with this bridge program. **Only 10 semesters or less is required.** For students committed to becoming leaders, an accelerated program into graduate education gets them there expeditiously.

What you'll study.

Benefit from the best of both worlds--from the undergraduate B.S.N. to the graduate M.S.N. program--and tailored transitional courses. After completing undergraduate requirements, you can choose between a non-clinical or clinical M.S.N. The non-clinical M.S.N. offers concentrations in Nursing Education, Nursing Informatics, and Health System Leadership. The clinical M.S.N. has a concentration in Family Nurse Practitioner.

Fewer total courses are required than if the B.S.N. and M.S.N. degrees were pursued separately.

How you'll learn more.

Access to a writing center and other means of support enhance your academic experience. You'll enjoy the flexibility of online courses taught by exceptional faculty members. A practicum gives you opportunities to apply your advancing knowledge in your selected field.

Where it can take you.

A graduate degree prepares you for leadership and other important roles in healthcare. Tackling the concentrated RN to M.S.N. bridge program shows employers that you are committed to excellence and achievement, and it places you ahead of nurses who only obtain an undergraduate degree. Your drive and leadership skills will be in high demand. Another option is the [RN to B.S.N.](#) program, where you first obtain a bachelor's degree.
