UNIVERSITY

***Computer-Based
Graduate Programs for
International Educators***

Educators and Trainers...

Earn your master's, educational specialist, or doctoral degree in computer education using international online telecommunications plus intensive summer institutes in Fort Lauderdale, Florida.

Computer-Based Graduate Programs for International Education

If you are an educator or trainer employed in a setting outside of the continental United States, you can join an international cohort of students in pursuing your graduate degree in computer-based learning.

Without having to leave your present job, you will use your own computer, modem, and telephone lines to connect through the Tymnet Packet Switching Network into Nova University's UNIX*-based operating system. This will put you online with educators and fellow students throughout the United States and around the world.

The international cohort of students will participate in a one-month summer session on the main campus in Fort Lauderdale plus a one-week summer institute as part of the summer session. You will have access to the Microlab, online, doing as many assignments and online activities as possible. This will significantly reduce the amount of online time needed during the year to stay in touch with your faculty and colleagues, to send and receive assignments, and to participate in online electronic classroom sessions

The Programs

These degree programs are designed to provide systematic and extensive professional growth in the use of high technology to improve the teaching/learning process. Various study areas in the use of telecommunications, computer-based learning, and instructional theories are combined in a formal program that stresses the integration of theory and practice.

In addition to the month-long summer sessions, international students will attend a one-week institute each year of the three-year program. The institute is held on the Nova main campus in July. Selected study areas are introduced and completed at these institutes. The institutes also serve to extend insights gained in computer-based courses and to acquaint students with other topics of significance in the education and learning technology field. Students are responsible for their own travel, lodging, and meals.

Other requirements include the successful completion of three Ed.D. practicums that are related to the use of microcomputers and

new technology. M.S. and Ed.S. students complete one practicum. Practicums are applied research projects undertaken by students to address significant problems in their organizations.

Teleconferences, interactive computer experiences, seminars, self-paced instructional courseware, reading, and written assignments form a major part of the student's work in the program. Written assignments are entered online and, thus, become searchable resources to students and faculty.

Costs

Application fee: \$30
(non-refundable)

Tuition:

M.S. - \$3,200 per year
+ (approx. 100
hours/per year @ \$7 per
hour) online time

Ed.S. & Ed.D. - \$4,000
tuition per year + a
\$350 service fee.
(Tuition includes 100
hours / year online time
from a domestic Tymnet
node entry point.)

Local governments
have separate modem &
online charges.

Institute - travel, room,
meals; special session
trips; books, and
one-month
summer session living
expenses.

The Degrees

The **master of science (M.S.) in computer-based learning (CBL)** is a 36 semester hour program with a choice of four specialties:

- Adult Education
- Electronic Education
- Information Management
- Training and Learning

You must hold a bachelor's degree from a regionally accredited university, be an educator, information specialist, or trainer, and be fluent in written and spoken English.

The **educational specialist (Ed.S.) in computer-based learning** is also a 36 semester hour program. You must hold a master's degree from a regionally accredited university and meet the requirements as listed for the master's program. Up to one year's work in the Ed.S. program may be credited into the Ed.D. program.

The M.S. and/or Ed.S. programs generally require 18-24 months including two campus summer sessions and institutes.

The **doctor of education (Ed.D.) in computer education** is a 72 semester hour degree program that requires three years to complete. You must hold a master's degree from an accredited university and be an educator or trainer who is also fluent in English.

Other admission criteria are listed in the program catalog. You may write or call for additional information.
