Nova University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award bachelor's, master's, educational specialist, and doctoral degrees. Nova University admits students of any race, color, and national or ethnic origin.
The commitment of the Programs for Higher Education is to provide quality doctoral education.

The Programs for Higher Education provide a field-based Doctor of Education (Ed.D.) degree program for practitioners working in three specialized areas of education: Higher Education; Adult Education; and Vocational, Technical, Occupational Education. Many of the Adult Education students are involved in business, industrial, and military training. The goal of the Programs for Higher Education is to provide quality doctoral education. The intent is to foster more rational education: Higher degree program for industrial, and Technical, Education. Many of the Adult Education students are involved in business, industrial, and military training.

The Programs for Higher Education is to provide quality doctoral education. The intent is to foster more rational education: Higher degree program for industrial, and Technical, Education. Many of the Adult Education students are involved in business, industrial, and military training.

The programs employ a field-based delivery system combining formal instruction, independent study, and applied research. The integrated curriculum has been designed to be completed in three years.

Students must attend and pass seven seminars. Two specialization seminars are completed only by those enrolled for those specializations.

SUMMER INSTITUTE

Each student must attend two summer institutes. Summer institutes are week-long conferences that bring together students, cluster coordinators, practicum evaluators, major applied research project advisors, national lecturers, central staff members, and nationally known educators to share ideas. Presentations explore the deeper implications of the seminars and elaborate on the application of theory to current issues in education. Formal and informal activities provide ample opportunity for mutual teaching and learning among students, alumni, and guests. Many students use the summer institute to be one of the most stimulating and rewarding aspects of the program.

PRACTICUMS

Practicums are applied research projects that are designed to promote the solutions to current problems in the students' work settings. They are highly structured opportunities to put theory into practice and to submit to the test of reality newly gained knowledge and skills. Students must successfully complete five practicums, one related to each of five different seminars, including one in Applied Educational Research and Evaluation and at least one in a specialization seminar.

COMPREHENSIVE EXAMINATION

All students must pass a comprehensive examination before being assigned a major applied research project committee.

MARP

The major applied research project (MARP) is the capstone of the Programs for Higher Education doctoral studies. MARPs are much like practicums, only much more ambitious and rigorous. Whereas the practicums are designed to sharpen skills in planning and conducting applied research, the MARP is the final demonstration that those skills have been mastered.

ADMISSIONS

Admission to the program requires a master's degree from an accredited institution, current full-time employment in a job related to the applicant's area of specialization, and three letters of recommendation from senior academic or administrative personnel in the applicant's place of employment. The letters of recommendation are to be written on forms provided by the Programs for Higher Education. An interview with a central staff member or cluster coordinator and a portfolio are also required.

FEES AND TUITION

For current tuition and fees call toll free 1-800-541-NOVA Ext. 7286, or (305) 475-7385.

FINANCIAL AID

Nova University maintains an Office of Student Financial Planning and Resources to assist students in meeting educational expenses. Students in the Programs for Higher Education may be eligible for Guaranteed Student Loans and veterans benefits.
