GRADUATION...
THE BIG DAY CULMINATING ALL THE DAYS OF STUDY AND BEST OF ALL...THE FUTURE LIES AHEAD

That moment we've all been waiting for... And remember for years to come... The conferring of the degree. For doctoral and juris doctor students this also means receiving the hood, as shown here in a picture from a graduation past.

By: Jennifer P. Meriam

Graduation is a special time... whoever you are. Perhaps you're a young lawyer, fulfilling a lifelong dream. Perhaps you're 41, the mother of three, divorced and just now becoming a lawyer, with still years ahead for practice.

Perhaps you're the husband sitting in the audience with your two teenagers as you see Mom receive her Doctorate in Psychology... something you have all worked to achieve together.

And then again, you could be 18 months old and "graduating" from the Family Center Toddlerhood Program.

Or perhaps you're graduating from The University School, you're 17 and you're a National Merit Finalist... one of just several in the nation.

All of these, and so many more, are part of the graduation ceremonies throughout the year at Nova University.

Festivities began at the Parker Playhouse May 23rd, when 190 students received Juris Doctor degrees from Nova Law Center.

Former Chief Justice of the Florida Supreme Court Arthur England gave the commencement address to the sixth graduating class.

On June 6, the University School of Nova University bid farewell to 77 graduating seniors at a brunch held at the Marriott Hotel. This marked the tenth year of festivities for the high school graduation.

A University-wide graduation will be held on July 18 at the Sunrise Musical Theater at which time 1,785 graduates will receive masters, doctoral and undergraduate degrees. Speaker for the occasion will be Dr. Abraham Fischler, President.

preceding the event on Sunday will be the 1982 Commencement Dinner Dance on Saturday evening, July 17 at the Hillcrest Golf and Country Club in Hollywood. Tickets for this affair can be received by calling the Alumni office at 475-7398. Students, graduates, their spouses and friends and friends of Nova University are invited to attend. Members of the staff and faculty will also attend. The cost is $15 per person and the deadline for reservations is July 2.
Traffic And Transportation: A Topic That Affects Us All

By Henry Kinney

Establishment of a Broward County tollway authority and the use of some available highway funds for numerous "little $50,000" improvement projects can provide the county with some relief from its traffic and transportation problems as state and federal funds for new roads continue to diminish.

And innovations such as less demanding road design standards, precast modular grade separations, more buses but smaller ones, expressways built initially without interchanges likewise could help.

These proposals and others are being laid before Broward's public officials by various citizen groups concerned with the problem. It was revealed during the latest of Nova University's Executive Council Conferences.

About 80 executives, engineers, public officials, civic leaders and development and developers turned out for the three-hour probe of the subject, hearing opinions from such persons as William Fowler, local district engineer for the Florida Department of Transportation; State Rep. Tom Gustafson, considered an authority on highway issues; Arnold Kamos, former district engineer now head of his own firm and chairman of the Traffic and Transportation Task Force of the Broward Workshop; Walter Collins, Arvida Corp. executive who heads the Ground Transportation Task Force of the Florida East Coast/Broward Chamber of Commerce, and Werner Buntemeyer, president of Coral Ridge Properties, developers of the city of Coral Springs.

County Commissioner Jerry Thompson and Fort Lauderdale City Commissioner Robert J. Cox spoke at length from the audience. Engineer Bruce Wilson of the Broward County Planning Division reported on plans for the Expressway Authority and Jean Fitzgerald, Chairman of the Community Involvement Roundtable, discussed how new organization's recent report to the County Commission, which he said boils down to:

"The work force needs better transportation, mass transit can be made to work. Major expressways won't happen without ear-marked money, and Broward's roads can be made better sooner than anyone thinks."

"Gustafson bluntly told the audiences that both federal and state highway funds for new

Nova University, the pioneer in the growing educational trend to deliver quality higher education in field-based degree programs, is beginning to make an impact on communities throughout the nation through its graduates.

A sampling of Nova doctoral graduates includes John Wilbut Lee, district superintendent for the Chicago public schools and Reggie Brown, top aide to the Windy City's Mayor Byrne and head of the employment and training department. Althea Jenkins, assistant superintendent of personnel services in the mammoth Compton Unified School District, located in Los Angeles, who was instrumental in originating, then adopting and implementing a "black is beautiful" program, Ira Finkel, an associate professor at Dowling College, on Long Island, in New York State, who devised a unique program to nurture creativity in children that is now being taught in many Long Island classrooms.

What these and the other Nova graduates have in common is that they chose Nova's avant-garde method of delivering education because they had neither the time nor financial resources to study in the traditional doctoral program which requires on-campus residence. They were also attracted by the practical aspects of the program which demands theory be put into practice.

Ira Finkel, 54, the father of two teenagers, is in many ways typical of the sort of individual Nova attracts. In his middle years and with family responsibilities when he decided he wanted his doctorate, there was no way for him to continue his education in the traditional manner.

"If it hadn't been for Nova I would have had to give up the idea of studying for an advanced degree," Finkel said.

Nor were Reggie Brown or Althea Jenkins willing to leave their jobs in order to pursue their educational ambitions. For them, however, the main reason for choosing Nova was the practical aspects of the programs being offered.

"I'm a very practical person," said Brown, 47, "and I found that the Nova program applied itself to practical solutions to problems."

"For me it was an opportunity to put theory into practice," Althea Jenkins said.

Nova was founded a little more than 17 years ago. It now has 8,200 students. About 1,200 of them are enrolled in programs offered in 20 states. Nationally, Nova is known as an innovator of field-based programs. Since then a number of universities around the nation have adopted similar programs making it possible for a student to pursue higher educational aims without being in a campus environment.

"When Nova was founded," explained Dr. Abraham Fischerl, the school's president, "we felt that the new university must look to future needs of professionals, rather than plan it after past models."

"We were and continue to be mission-oriented. We believe that our programs must be designed to improve the performance of professionals, and it is most rewarding for us to know that evidence is being collected which indicates that Nova alumni are having a strong, positive effect in the institutions in which they are employed."

Nova offers field-based doctoral programs leading to EdD degrees and doctoral programs in public administration and business administration.

In order to be accepted into the Nova educational programs, for example, an applicant must have an administrative post in the educational field, such as that of school superintendent, principal or director of a program.

Once accepted, the graduate student joins a group of 25 to 30 other educators in his or her area to form a "cluster." The cluster, under the direction of a cluster coordinator, meets two or three times a week. In addition, once a month on a Saturday, top-calibre professors are flown in from throughout the country for an all-day session of study, discussion, lectures and testing. This enables Nova students to come in contact with many of the most celebrated educational minds in the nation.

A listing of just a few of the professors who lecture for Nova reads like "Who's Who in Education."

They include Lawrence Iaccone of UCLA, often referred to as the "father" of education policy; James W. Gurherie, senior national lecturer in finance, School of Education, University of California at Berkeley; Elliot Wayne Else, a national lecturer in curriculum in the Stanford University School of Education; and Louis Masioti, Director of Urban Affairs at Northwestern University.

In order to qualify for a doctorate under the Nova requirements, the graduate student has to complete three "practicums" and attend a 10-day summer session at the Nova campus in Fort Lauderdale. A practicum is Nova's equivalent of a thesis and each one must address itself to a school problem, suggest a solution and then have this solution implemented in order for it to count as credit towards a doctoral degree.

Dr. Brown, for instance, was a high school principal when working for his doctorate. He did a study, analysis and implementation of a computerized attendance system for the entire Chicago school system. Dr. Jenkins' "black is beautiful" program grew out of one of her Nova practicums and was adopted by her school district. Dr. Finkel's study on how to unlock creativity in grade school pupils also was the result of his pursuit of a doctorate from Nova.

The unique quality of the Nova program was recognized recently in the academic world when the American Association of School Administrators (AASA) conferred its 1982 Outstanding Preparation Program Award on the South Florida University. The award, made by the Virginia organization's Advisory Committee on Higher Education, was for the excellence of Nova's National Doctor of Education Programs for Educational Leaders.
BalloT
Nova University Film Society
Pick the 20 films you want for another winning season in 1982-83!

Check the titles of the twenty (20) films you would most like to see included in the Nova University Film Society's 1982-83 Season from the list below. Please be sure to fill in your name and address where indicated so you will be assured of being on our mailing list. When complete, return the Ballot to: Betty Leverenz, Nova University Film Society 3301 College Avenue Fort Lauderdale, FL 33314

□ SLAVE OF LOVE (USSR, 1978) Nikita Mikhalkov (Nominated: Academy Award, winner at Cannes)
□ THE SPIIDER'S STRATEGEM (Italy, 1970) Bernardo Bertolucci (Winner at Cannes)
□ TRAGEDY OF A RUDICULOUS MAN (Italy, 1981) Bernardo Bertolucci (Last Tango in Paris)
□ TALES FROM VIENNA WOODS (Germany, 1981) Maximillian Schell (The story of a group of shopkeepers in 1930's Vienna)
□ VOYAGE EN DOUCE (France, 1980) Michel de Ville (Two young Polish women take a trip through the countryside and encounter many adventures with Geraldine Chaplin)
□ WALKABOUT (Australia, 1971) Nicolas Roeg (Winner: Academy Award and Cannes. A young Aborigine leads two lost white children back to civilization)
□ WE ALL LOVED EACH OTHER SO MUCH (Italy, 1977) Ettore Scola (A group of middle-aged friends try to hang on to the adventure they had when they were young)
□ THE WOMAN NEXT DOOR (France, 1981) Diane Kurys (Director: Peppermint Soda)
□ THE WICKER MAN (Anthony Shaffer (Winner at Cannes and New York)
Prior to joining Interval in 1977, "A vast majority of the trends, sales companies, the thesis didn't contain 'pie-in-the-sky' ideas. He said, 'I saw the potential, the market, the demand.'" His master's thesis, "Time Sharing," predicted the industry's tremendous growth patterns. To Knight was with real estate giants, both developers and individual members. He has the total responsibility for marketing services and communications at Interval. Known industry-wide for his expertise on resorts and the industry, as well as being recognized as the major force who built Interval into one of the world's leading exchange industry. It's fascinating how many predictions actually materialized." Prior to joining Interval in 1977, Knight was with real estate giants Deltona and General Development, specializing in financial communications. "This past year (1981) was Interval's greatest expansion in terms of member services and corporate re-investment of nearly one million dollars," said Knight. "Our new World Service Center will accommodate our growth for the next five years and gives us access to a substantial, well educated labor pool which will be able to service the needs of both developers and individual members. "We believe that while economically 1982 will be lackluster, we are bullish on time sharing industry. We are looking to strengthen our position within the time sharing field and further improve and refine our services to both developers and individual members.

Trend Setter — A Network Builder

Kenneth V. Knight, MPA '77, whose masters thesis, "Time Sharing - A Viable Alternative for Low Cost Second Homes and Vacations", predicted the industry's tremendous growth patterns. To Knight, senior vice president and marketing division of Miami-based Interval International, the quality vacation exchange network, the rapid expansion of the time sharing industry which grew from $50 million in sales in 1975 to $1.5 billion in 1981, came as no surprise. He has the total responsibility for worldwide resort membership, marketing services and communications at Interval.

The Nova Dinner Show on March 5th featuring the "Amazing Kreskin" was an unqualified success, spoken of by graduates as "fabulous", "incredible", "fantastic". Seven days before the event all tickets were sold and the university switchboard reported that scores of calls for tickets came through during the last week. Kreskin was truly "amazing". He entertained for one hour and fifty minutes and, of course, found his check which had been hidden by a committee selected at random from the audience. The Gold Ocean Mile Ballroom was beautifully decorated, the food, service and music were superb. Our graduates are already talking about making arrangements for next year's event.

The Nova Dinner show A Fabulous Success

**AWARDS**

Lillian Lodge Kopenhaver, Ed.D. '80, was recently appointed chairwoman of the National Professional Chapter Activities Committee of the Society of Professional Journalists, Sigma Delta Chi and convention program director for the 1982 combined convention of the National Council of College Publications Advisers and the Associated Collegiate Press in St. Louis in October. She recently returned from New York where she was on the program for the college division of the Columbia Scholastic Press Association and served on the Gold Key Board to select recipients of the association's highest honor, the Gold Key.

Dr. Kopenhaver was named acting chairperson of the Department of Communication at Nova University. She formerly served as Director of Information Services at the university.

Dino F. Claburri, Ed.D. '75, President of Mildin Institute was recently feted at an Appreciation Dinner given by the Mildin Institute Advisory Board and held at the Meleubus Club, New Haven, Connecticut. It was stated that he has distinguished himself by his participation and membership in many state and national professional organizations and educational associations, and his numerous civic and charitable contributions including the arts and music.

Mr. Robert Parisi, representing Congressman Lawrence DeNardis presented a citation from the congressman stating that a flag had been flown above the Capitol in Washington, D.C. to honor the occasion. The flag was handed to Claburri.

Lilia H. Fernandez, MS '80, and her daughter, Julia N. Almand, MS '80, graduated together and have each been chosen Teacher of the Year.

A private school with grades pre-school through high school

Accredited by:
with the kids before you let them use it. This is particularly essential if the water is deep enough for safe use. Read the rules that govern the facility.

3. Never go head first the first time: Never let anyone enter any body of water headfirst unless you are qualified to duty unless you are qualified to be a lifeguard. Remember that pools are not all alike. If there is a springboard or diving area at a lake, ocean, or river, be sure it is safe to use it. This is particularly essential if there is a springboard or diving area at a lake, ocean, or river.

4. Lifeguard on duty: Don't let anyone swim if no lifeguard is on duty unless you are qualified to be a lifeguard. Furthermore, they are not aware of the risks involved in use of water. Not only are they not aware of the risks involved in use of water, but they seldom develop the ability to swim in the open water. They should be aware of their swimming abilities and limitations.

5. Be in charge: Never place full responsibility for your older children to "keep an eye on the younger ones" in the care of any child. They seldom develop the ability to swim in the open water. Not only are they not aware of the risks involved in use of water, but they seldom develop the ability to swim in the open water. They should be aware of their swimming abilities and limitations.

6. Examine the facility: Every beach, pond, pool, or river has its own characteristics and various types of equipment. Be sure your family swims only in areas where swimming is authorized. Water slides vary a lot in height. Some slides are much more steep than the person is used to, and may throw him out to where he reaches out to stimulate several minority young people towards productive and meaningful accomplishments.

2. Capital development and expansion needs:

There are a number of capital expansion needs that face Nova which must be met. The Law School library expansion needs are a high priority, especially in light of full accreditation from the ABA. New construction to house the Behavioral Science programs and facilities. Coral Springs are high priorities. Classroom facilities and physical plant for the New College and The University School are being considered. Faculty housing, the Capital Development Program is currently in the planning stage and is receiving high level cooperation at Nova.

3. Scholarships, Student Loan Funds and Endowment of Program:

Equally important with operational needs and facility needs are those support items related to students. It becomes a "chicken-and-egg" question of which comes first. First, we need to determine if students are the prime ingredient in quality education indeed, the tangible products of the University. The support of students in terms of available scholarships and loan funds determine to a great degree the operational and facility support needs. Nova is growing! The latest alumni and giving figures indicate 10,672 alumni in the Master's and Doctoral programs. We now have a viable four-year undergraduate program in place. Nova's growth will be even more dramatic in the next few years. We need to plan now for that future growth.

These are three of many "immediate needs" confronting a future growth. We have to be aware of Nova University's new needs. As the University has grown, it is necessary for Nova to understand and respond to them. It is axiomatic that Nova looks to her friends and alumni as the financial resources to meet those needs. Your help is desired and deserved. Your immediate response is requested.
World's Apart...And Maybe Not!

Marissa Leichter of the Family Center and Leonard Sherman of University School at Coral Springs may be world's apart as they portray the various roles in Spring Theatrical Productions, but they have one thing in common: they both look great delight in the characters they portrayed. Marissa is "the Wise old woman in Ann McGovern's Too Much Noise", while (you guessed it) Leonard gives new life to Captain Hook of Peter Pan fame.

place we're going to get additional lanes is on the interstates. All the other funds are being converted to reconstruction. We'll be able to widen some substandard roads, resurface some and take care of some safety problems. By 1990 we'll be in a mode where we'll just resurface and keep bridges in repair."

Wilson said County Administrator Graham Watt has assigned staff to investigate the steps necessary to the creation of an Expressway Authority to undertake the unfunded portion of I-595 and the Deerfield Beach/Sawgrass Expressway to run through Coral Springs and southward to Interstate 75.

"We have only six months to get our act together," he warned, referring to the necessity for going to the legislature for an enabling act. He also cautioned that "if we don't show some momentum on this, people out there are going to plan for it not to happen," and "if we don't go ahead, we're going to have to pay much as much as $3.50 in his grade point average. His major field is Finance. Dr. Hal Millman, Guest Speaker, provided the opening address, introducing the topic of "Too Much Noise, while everyone was a winner! Especially Nova University's Gold Key Award Given.

Nova Gold Key is an organization of men who have pledged financial support of $1,000 a year to create student scholarships, loan funds and research "seed" money. At present there are thirty-seven members. Seven of these Nova Gold Key men joined at the May 7, 1982 Gold Key Golf Classic held at Emerald Hills Country Club in Hollywood.

The day of golf was a rousing success and dinner was enjoyed by more than fifty people. Mary R. McCahill, Chairman of Nova's Board of Trustees, welcomed the assembled members, spouses and guests on behalf of the University and President Fischler.

Gold Key Pins were given to the new members and recognition plaques were awarded to those participating in the Golf Classic along with special Tee-Shirts and visors. No golf scores were announced and everyone was a winner! Especially Nova University's Gold Key!
