Admission Forms
WELCOME

NOVA UNIVERSITY, accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (SACS), has become a major force in the growth and development of educational innovation. We are distinguished by our commitment to traditional and nontraditional instructional modes to deliver quality education. Innovation is reflected in the undergraduate and graduate programs offered by the Center for Computer and Information Sciences (CCIS).

Our mission is to provide current knowledge and practice in computer science, information systems, information science, computer education, and training and learning technology. These programs are designed to provide breadth and depth of knowledge as the basis for generating professional competence in the computer and information sciences. We begin this process by instilling an awareness of the power and application of knowledge through exploration and identification of problems within computing environments. Individuals will become equipped with the intellectual maturity and practical skills necessary to stay abreast of the advancements made within the computing disciplines as well as interact with professionals and users of computer technology. Today, CCIS faculty and staff serve the educational needs of undergraduate and graduate students throughout the United States.

DELIVERY SYSTEMS

Currently, the center offers both on-campus undergraduate and graduate programs in computer science, computer systems, information systems, computer engineering, and computer-based graduate programs in information systems, information science, computer education, and training and learning technology.

CAMPUS-BASED undergraduate and graduate programs offer convenient course schedules (day, evening, and weekend courses), access to fully equipped computer labs with qualified lab tutors, exposure to computer hardware and software, library materials, and resident faculty.

COMPUTER-BASED graduate programs utilize telecommunications through electronic linkage to Nova University’s mainframe (VAX 8550, running Ultrix 2.3). These programs offer seminar and institute sessions, residency requirements, and provide applied approaches to learning that stresses a blend of theory and practice by encouraging students to identify and solve problems of significance within their organizational environments.
CAMPUS-BASED PROGRAMS

The information age and the computing industry along with the field of computer science are changing rapidly. The programs in the Center for Computer and Information Sciences meet these challenges with quality programs that keep pace with rapidly changing professional and academic needs.

We currently offer four undergraduate degree programs in conjunction with Nova College. In addition, the center also offers a Master of Science in Computer Science and a Doctor of Science in Computer Science.

UNDERGRADUATE PROGRAMS

There are two divisions within Nova College: the division of Career Development Programs and the division of Professional and Liberal Studies Programs. The career development programs are intended primarily for working adults and are offered on evenings and weekends. The Professional Studies Program and the Liberal Studies Program are designed for students who are interested in a full-time, daytime college experience.

Knowledge and skills are acquired in the areas of behavioral and social sciences, communications, humanities and arts, economics, science, mathematics, and technology. Moreover, students major in a preferred area of concentration. Once students are admitted to Nova College, they take a full complement of core courses within one of the two divisions and their major courses through the Center for Computer and Information Sciences. The four majors currently being offered are computer science, computer engineering, computer information systems, and computer systems.

COMPUTER SCIENCE deals with the systematic study of algorithms and data structures. This concentration provides a base for the student to work in a number of computer career fields and to pursue graduate work in computer science.

COMPUTER ENGINEERING concentrates on the design, architecture, and development of computer hardware. Areas covered are circuit design, firmware, and the high level trade off between hardware and software in computer systems.

COMPUTER INFORMATION SYSTEMS prepares the student for a career in business applications as a programmer/analyst. Emphasis is placed on programming languages, application software analysis, design and development, database management, and information system organization.

COMPUTER SYSTEMS is designed for students who intend to combine business knowledge with an applications approach to computer science. In addition to providing a background in computer function, language, and programming, this major focuses on the use of computers in the business environment.

ADMISSION REQUIREMENTS
- Completed admissions application and fee
- Official high school and/or college transcript(s)
- One of the following test scores or its equivalent (not required of transfer students with 15 or more credit hours), Scholastic Aptitude Test (SAT),
Preliminary Scholastic Aptitude Test (PSAT) or the American College Test (ACT).
- A personal or telephone interview
- Recommendation letters

TUITION
Tuition is dependent upon which division you choose to attend. Please call Nova College Admissions office for more information.

MASTER'S PROGRAM

MASTER OF SCIENCE IN COMPUTER SCIENCE
The Center for Computer and Information Sciences offers a graduate program leading to a Master of Science degree with a major in Computer Science. This program is designed to give the student a thorough knowledge of computer systems through coursework, basic and applied research activities, and specialized projects. Current areas of specialization are network design, data communications, artificial intelligence, compiler construction, modeling and simulation, database design, computer systems performance, numerical analysis, operating systems design, structured programming, and software engineering.

CURRICULUM
In addition to allowing professionals to pursue a systematic program of graduate study while working, the core courses are specifically designed for understanding and direct application of technology and are taught by experts in these fields.

Two options (thesis and non-thesis) leading to a Master of Science degree with a major in computer science are offered. The requirements for both the thesis and the nonthesis option include--

1) The completion of 36 semester hours of graduate credit (of which 24 semester hours are required courses) include the following three credit hour courses:
   - CIS 610 Theory & Principles of Programming
   - CIS 620 Modeling & Simulation
   - CIS 630 Compiler Design Theory
   - CIS 640 Operating Systems Theory & Design
   - CIS 650 Network Design & Analysis
   - CIS 660 Database Management
   - CIS 670 Artificial Intelligence/Expert Systems
   - CIS 680 Software Engineering

2) The student must maintain a grade average of 3.0 (B) or better in all graduate level courses.

3) The additional requirements for the thesis option are the completion of six semester hours of approved elective courses in computer science and six semester hours for a written thesis.
4) The nonthesis option has the additional requirement of the completion of 12 semester hours of approved elective courses in computer science. The three-credit courses can be chosen from the following:

- CIS 600 Computer Systems
- CIS 611 Systems Programming & Project Implementation
- CIS 621 Mathematical Programming
- CIS 631 Language Theory & Automata
- CIS 633 Graph Theory
- CIS 643 Array Processors & Supercomputers
- CIS 645 Microprogramming & Microprocessors
- CIS 652 Systems Performance Evaluation
- CIS 662 Distributed Database
- CIS 681 Interactive Computer Graphics
- CIS 690 Special Topics

- CIS 601 Programming Languages
- CIS 612 Concurrent Programming Languages
- CIS 622 Numerical Analysis
- CIS 632 Compiler Implementation
- CIS 634 Complexity Theory
- CIS 644 Operating Systems and Implementation
- CIS 651 Data Communications
- CIS 661 Database Practicum
- CIS 671 Robotics and Automated Processing
- CIS 682 Software Engineering Implementation

**PROGRAM FORMAT**
The Master of Science in Computer Science program operates on a 12-week term. Each three-credit course meets for four hours per week for 12 weeks (one semester). All courses in the program are scheduled in the evenings or on Saturday. The Master of Science in Computer Science program should take between 18 and 24 months to complete.

**ADMISSION**
This program has been designed for students with undergraduate training in computer science, engineering, mathematics, or physics. Applicants for this degree should have an undergraduate major in one of the above areas or a related area and must meet the following requirements:

- A bachelor's degree from a regionally accredited college or university representing completion of coursework which fulfills prerequisites for graduate work in the area of Computer Science.
- A 2.5 undergraduate G.P.A. (3.0 in the undergraduate major)
- A completed application with application fee and official transcripts of all prior graduate and undergraduate work
- Satisfaction of undergraduate prerequisites in:
  1. Data Structures
  2. Computer Architecture
  3. Experience with higher level programming languages such as FORTRAN, PASCAL, C, and assembly language programming
  4. Mathematics - including calculus, linear algebra, and discrete mathematics

Students not satisfying these prerequisites are required to make up the specific deficiencies before being granted full admission status.

**TUITION**
Tuition is $225 per credit hour or $5,400 per year (eight courses).* There is a $100 yearly
registration fee. Included in the tuition are instructional materials, handouts and the use of the computer lab. Students must purchase their textbooks.

DOCTORAL PROGRAM

DOCTOR OF SCIENCE IN COMPUTER SCIENCE

The Center for Computer and Information Sciences offers a graduate program leading to the degree of Doctor of Science in Computer Science (Sc.D.). It is designed to produce a computer scientist with knowledge in all major areas of computer science as well as the capacity for solving a problem of substance in the field. Each course consists of lectures given by leading computer scientists in the field, and completion of a research project by the end of the course. The research activities will be part of industry and University sponsored programs.

This program, by combining seminars, individual study and field projects in the student's own place of work permits acquisition of an advanced degree, and encourages students to make significant contributions to their organizations.

CURRICULUM

In addition to allowing working professionals to pursue a systematic program of graduate study, the core courses are specifically designed toward direct application of technology and are taught by experts in these fields.

The 68 semester hour program (48 semester hours of which are required major courses) takes approximately four years to complete, although students have seven years from their start date to complete the program requirements. Coursework currently being offered for this degree program is as follows: (three credit hours per course)

CIS 700 Theory & Principles of Programming
CIS 710 Modeling, Simulation and Mathematical Programming
CIS 720 Compilers, Language Theory and Automata
CIS 730 Operating Systems
CIS 740 Network Design and Data Communications
CIS 750 Database Management Systems and Distributed Databases
CIS 760 Artificial Intelligence and Expert Systems
CIS 770 Software Engineering
CIS 800 Theory and Principles of Programming Project
CIS 810 Modeling, Simulation and Mathematical Programming Project
CIS 820 Compilers, Language Theory and Automata Project
CIS 840 Network Design and Data Communications Project
CIS 850 Database Management Systems and Distributed Databases Project
CIS 860 Artificial Intelligence and Expert Systems Project
CIS 870 Software Engineering Project

PROGRAM FORMAT

The Doctor of Science in Computer Science program operates on a six-month term (semester). During the first three years, the student will select six major courses. Each

* Subject to Change
course will take six months to complete. For each course, the student attends two seminars, develops a proposal for a project and implements the project.

During the fourth year of the program, in addition to the final two courses, the students will be involved in the dissertation process. The dissertation is the main focus of the final year of study and is the most important requirement for the Sc.D. degree. Each student is expected, with the help and approval of an advisor, to select a topic that is appropriate and of sufficient scope to satisfy this requirement. Students should reach conclusions and offer recommendations that have the potential of contributing to the improvement of professional practice.

Final exams for each course are given at seminar meetings. Pre- and post-seminar study materials are provided to each student. Students are responsible for their own lodging and travel expenses at these seminars.

ADMISSION
The Doctor of Science in Computer Science program is designed for students with a graduate degree in computer science, engineering, physics, or mathematics. Applicants for this degree should have a graduate major in one of the above areas or a related area and must meet the following requirements:

- A master's degree from a regionally accredited college or university representing completion of coursework that fulfills prerequisites for doctoral work in the area of computer science
- A 3.25 graduate G.P.A.
- A completed application with application fee and official transcripts of all prior graduate and undergraduate work
- Satisfaction of graduate prerequisites in:
  a. Structured programming
  b. Data communications
  c. Operating systems
  d. Compilers
  e. Databases
  f. Modeling & simulation

Students not satisfying the prerequisites are required to make up the appropriate deficiencies before being granted full admission status.

TUITION
Tuition is $5,250 per year in the Doctor of Science in Computer Science program.* There is a $60 yearly registration fee. Included in the tuition are computer online time, study guides, reading assignments and computer protocols. Students must purchase their own textbooks.

* Subject to Change
COMPUTER-BASED PROGRAMS

The Center for Computer and Information Sciences serves as a university-wide resource in the fields of computer science and telecommunications to train and develop a new breed of leaders—professionals who are prepared to lead in the rapidly expanding information society. With the advent of new developments in telecommunications and satellite technology, Nova University has taken the lead in technologically-based education. The mission of Nova University emphasizes the importance of alternative forms for the delivery of education through technology and telecommunications, and the center is a major vehicle for supporting this work.

The work of professionals is heavily involved with information. The explosive increase in the quantity of information has created a demand for persons trained in information management skills, and it has placed pressure on various professions to respond by training their own members in information handling techniques. To name a few, the professions of law, information management, medicine, engineering, education, and the sciences have felt the need to provide additional training in the information and computer science field to their constituencies.

In all discipline areas of information science, information systems, training, and computer education, a major problem has developed—the growth in technological tools for information handling and the escalation of information available has outstripped the rate with which professionals are able to maintain competency. This situation is aggravated by two conditions: the public’s demand for more knowledge and the demand on organizations to understand their environments in new ways. The first condition has been brought on by the computer revolution, and the second was generated by the forces of international competition, especially the rise of industrial giants like Japan and Germany. Nova University works to meet these demands through its computer-based graduate programs.

Today, the computer is a necessary tool for knowledge workers. Much of the work in the information specialities, and in the field of training, is being accomplished using computers. Using the computer effectively is necessary for success in these fields. Nova University’s philosophy is that it makes sense to use the student’s natural work environment for learning.

The rationale for computer-based programs was stated by Dale Tillery of the University of California, Berkeley in his presentation before the National Board of Graduate Education: “As in the clinic, the courts, and the laboratory the arena for much professional learning is in the daily life of real institutions. Why demand that the student leave these natural laboratories for the lecture hall or the seminar room? It makes more sense to impart the theoretical and scholarly components to this real world than to deport the student from the very settings in which he needs to gain and refine new insights, sensitivities, and skills. This recognition of the great learning possibilities in professional settings need not result in provincialism or in self-confirmation.”

To this day, Tillery’s comments continue to justify the delivery of instruction to the professional’s locale—in the computer-based mode. In our computer-based programs, the electronic link between student and professor couples the strengths of the computer-based mode of delivery with telecommunications for a continuous interchange of ideas. The resulting environment for learning helps make the education of knowledge workers and information professionals a more meaningful and enriching experience. In this way Nova University produces the leaders for the emerging information society.
MASTER OF SCIENCE PROGRAMS

The Master of Science in Information Systems (MIS) is designed for individuals who work or would like to work within the environment of an organization, integrating organizational functions with computer technology. The curriculum provides information systems concepts and processes within the framework of organizational functions, management knowledge, and technical information systems knowledge. Students choosing MIS gain the ability to develop an information system structure for an organization and learn how to design and implement the structure's applications. Most organizations have a need for increased organizational productivity. The MIS major is designed to meet these needs. (This program is offered both on campus and through telecommunications).

The Master of Science in Computer Education (MCED) is designed for the educator who wishes to use high technology to improve teaching and administrative efficiency. This area offers administrative and management techniques for promoting a foundation in structured programming for educational applications of computers.

The Master of Science in Information Technology and Resource Management (MITRM) is designed for individuals working or planning to work as information professionals in business, industry, government, or the military. The MITRM seeks to merge telecommunications with computer, information science, and management services. MITRM is the keystone of information science and technology. Every activity in this profession relates to the complex processes in MITRM -- from system design and evaluation, user requirements and document and knowledge representation to database organization, online storage and retrieval techniques, and hard and soft computer technology applications as well as repackaging, dissemination, and marketing.

The Master of Science in Training and Learning (MSTL) is designed for individuals who want to learn, or to improve, skills in computer-based training designing (CBT). The new demands on specialists in the training field require them to collect the "right" information and package it in a form that leads to effective training programs. Students in the training and learning major acquire new skills in the design and application of computer-based training.

By combining individual study, computer-based learning, teleconferences, institutes, and a field project in the student's own place of work, these programs permit acquisition of an advanced degree and encourage students to make significant contributions to their organizations.

CURRICULUM

In addition to allowing working professionals to pursue a systematic program of graduate study, the program is innovative in that the core courses are completed through a computer-based learning delivery system available to the students in their locale. Online interactive learning methods and teleconferencing are used throughout the instructional sequence.

Regardless of the major selected, students will be scheduled to take a common core of eight courses during the first year in the program. During their second year, students will then begin their major and complete four courses, including a practicum component offered in two parts. The common core courses and major courses for each of the four majors are listed. (3 credit hours per course)
COMMON CORE COURSES
- An Introduction to Digital Computers and Telecommunications
- Online Information Systems
- Statistics, Measurement, and Quality Control
- The Theory of Human Factors
- Database Management Systems
- Systems Analysis and Design
- Strategic Management, Leadership, and Finance
- Case Analyses

THE MAJORS:

Information Systems (MIS):
- MIS 5540 Planning and Policy Formulation in Management Information Systems
- MIS 5541 Emerging Technologies in Information Systems
- MIS 5509 Practicum Proposal in Information Systems
- MIS 5510 Practicum Report in Information Systems

Computer Education (MCED):
- CED 5572 Introduction to Structured Programming in Pascal
- CED 5573 Advanced Programming in Pascal
- CED 5509 Practicum Proposal in Computer Education
- CED 5510 Practicum Report in Computer Education

Information Technology and Resource Management (MITRM):
- IRM 5540 Telecommunications in Information Technology & Resource Management
- IRM 554 Emerging Technologies in Information Technology & Resource Management
- IRM 5509 Practicum Proposal in Information Technology & Resource Management
- IRM 5510 Practicum Report in Information Technology & Resource Management

Training and Learning (MSTL):
- CBL 5540 Courseware and Software Design Systems
- CBL 5541 Emerging Technologies in Computer-Based Training
- CBL 5509 Practicum Proposal in Training and Learning
- CBL 5510 Practicum Report in Training and Learning

The practicum (5509 and 5510) enables students to investigate a situation directly related to activities within their own institutions or organizations and translate course theory into practice.

PROGRAM FORMAT
Several modes of delivery are provided in the courses: summer institutes; computer conferences; instruction on a supermini computer; interactive, online, real-time computer discussions with faculty members (ECR); electronic mail conversations; and electronic assignment delivery. Final examinations are taken both online and during the summer
institutes. All other assignments are forwarded through electronic mail and electronic classroom sessions (ECRs) and are stored in central databases.

Much of the work on assignments is done offline and then uploaded to the student’s home directory from which it can be electronically mailed to their professors. It is highly recommended that all students know how to use the uploading and downloading (file transfer) capabilities of their communications software prior to beginning the program. It is also essential that new students be familiar with their word processing software before they begin their first course.

ADMISSION
The entire program for the Master of Science degree is designed to be completed in 18 to 24 months. Each applicant must satisfy the following requirements in order to be accepted into the program:

- Official transcripts of all prior graduate and undergraduate work
- A bachelor's degree from a regionally accredited college or university
- A G.R.E. score or completion of a portfolio with appropriate work experience and credentials
- Three letters of recommendation
- A completed application with a $30 application fee

TUITION
Tuition is $150 per credit hour, or $3,600 per year.* There is a $60 yearly registration fee. Students must purchase their online time for the program. This is done in 20-hour blocks of time at a cost of $140. Students may register at any time during the year. Included in the tuition are study guides and instructional materials. Students must purchase the textbooks.

FOUR-YEAR COMBINED MASTER'S/DOCTORAL OPTION
In addition, the Center for Computer and Information Sciences offers a four-year combined master's and doctoral option in:

Computer Education (MCED/CED)
Information Technology and Resource Management (MITRM/DISc)
Information Systems (MIS/DIS)
Training and Learning (MSTL/DTL)

Students interested in this option must first be accepted into the master's program. Once students have completed eight courses (and earn 24 credits) in the master's program, with a grade point average of at least 3.25, and attended one summer institute, they may be accepted into one of the corresponding doctoral programs. (Students must also fulfill all other doctoral admission requirements.)

Upon acceptance into the doctoral program and after the completion of 12 credits in the doctoral program, the student is awarded the Master of Science degree. These 12 credits also count toward the doctoral degree, thereby reducing the total time needed to acquire both degrees if they had been taken separately. Once admitted into the

* Subject to Change
doctoral program, students follow the format that pertains to doctoral students. For more information about this option, interested individuals should write to the Program Director of the specific doctoral program to which they are seeking admission.

DOCTORAL PROGRAMS

The Doctor of Education in Computer Education (CED) is designed for practitioners working in an education or training setting. Educators and administrators at university, college, K-12 levels, as well as trainers in business and government, have the opportunity to become skilled in telecommunications, software and courseware design, and educational applications of research and theory.

The Doctor of Science in Information Systems (DIS) is designed for managers in business, government, or industry, who are involved in computer-based information processing. The program's emphasis is on professional training and is offered for practitioners working in information fields such as computer centers and information centers.

The Doctor of Science in Training and Learning (DTL) is based on the premise that training personnel today are managers of information. In this context, their role has been similar to that of the information scientist.

The Doctor of Science in Information Science (DISc) is for professionals concerned with the effective transfer of information through systems from sources to users. The program is designed to provide a vehicle for individuals to advance in their professions by learning to apply to their organizations or institutions the latest developments in telecommunications, information science, computer science, and strategic management.

CURRICULUM

In addition to allowing working professionals pursuit of a systematic program of graduate study, the program is innovative in that the core courses are completed through a computer-based learning delivery system available to the students in their own locales and through seminars and institutes. Online interactive learning methods and teleconferencing are used throughout the instructional sequence.

Regardless of the degree selected, students are scheduled to take a common core of five courses. In addition to the core courses, students complete their major courses, two practicums, and their dissertation as a part of their degree program. The common core courses and major courses are listed below:

COMMON CORE COURSES

15 credits for 5 common core courses
MAJORS:
Doctoral students also take two courses listed in their major area and five modules-of-expertise (MOE's), two practicums and their dissertation representing an additional 51 credits. (3 credit hours per course unless otherwise noted)

**COMPUTER EDUCATION (CED)**
- CED 7000 Advanced Structured Programming with Applications in Pascal & C
- CED 8600 Courseware and Software Design
- CED 7110 Data Analysis for Educators (MOE)
- CED 7210\ Finance and Budgeting in Education (MOE)
- CED 8410 Curriculum and Learning Theory (MOE)
- CED 8510 Relational Databases in Education (MOE)
- CED 8710 Artificial Intelligence & Expert Systems for Educators (MOE)

  - CED 7800 PRACTICUM I Proposal (3 credit hours)
  - CED 7850 PRACTICUM I Report (3 credit hours)
  - CED 7900 PRACTICUM II Proposal (3 credit hours)
  - CED 7950 PRACTICUM II Report (3 credit hours)
  - CED 8990 DISSERTATION Proposal (6 credit hours)
  - CED 8995 DISSERTATION Report (12 credit hours)

**INFORMATION SYSTEMS (DIS)**
- DIS 7000 Emerging Computer & Information Technologies for Information Systems Design
- DIS 8800 Planning & Policy Formulation In Management Information Systems
- DIS 7110 Data Analysis for Information Systems (MOE)
- DIS 7210\ Finance and Budgeting in Information Systems (MOE)
- DIS 8410 Design of Human Interfaces to Information Systems (MOE)
- DIS 8510 Relational Databases in Organizations (MOE)

  - DIS 7800 PRACTICUM I Proposal (3 credit hours)
  - DIS 7850 PRACTICUM I Report (3 credit hours)
  - DIS 7900 PRACTICUM II Proposal (3 credit hours)
  - DIS 7950 PRACTICUM II Report (3 credit hours)
  - DIS 8990 DISSERTATION Proposal (6 credit hours)
  - DIS 8995 DISSERTATION Report (12 credit hours)

**TRAINING AND LEARNING (DTL)**
- DTL 8600 Software & Courseware Design for Computer-Based Learning
- DTL 7000 Emerging Computer & Information Technologies for Training & Learning Design
- DTL 7110 Data Analysis for Training & Learning (MOE)
- DTL 7210\ Finance and Budgeting in Training & Learning (MOE)
- DTL 8410 Design of Human Interfaces (MOE)
- DTL 8510 Relational Databases in Organizations (MOE)
As noted above, the requirements include two practicums and a dissertation. Practicums enable students to investigate a situation directly related to activities within their own institutions or organizations and translate course theory into practice.

The dissertation is the main focus of the final year of study. Each student is expected, with the help and approval of their dissertation committee chair, to select a topic that is appropriate and of sufficient scope to satisfy this requirement. Students should be able to reach conclusions and offer recommendations that have the potential of contributing to the improvement of professional practice.

PROGRAM FORMAT
Several modes of delivery are provided in the courses: seminars, institutes, computer conferences, computer-assisted instruction on a supermini computer, interactive, online, real-time computer discussions with faculty members (ECR), electronic mail conversations and electronic delivery of assignments. Final examinations are taken by the students in person at either the seminar or institute sessions. All other written assignments are forwarded through electronic mail systems and stored in central databases.

Computer-based doctoral programs offer two options for attendance: Seminars (commence Friday evening and adjourn on Saturday evening), or Institutes. The seminars are held
every three months in Ft. Lauderdale, Florida. Institutes are held twice a year in Ft. Lauderdale, Florida.

Both the institutes and the seminars consist of presentations by recognized authorities, small group discussions and workshop sessions. The latest developments in digital computers, telecommunications and information science will be demonstrated. Pre and post-seminar study materials are provided to each student. Students are responsible for their own lodging and travel expenses.

These programs, by combining individual study, computer-based learning, teleconferences, seminars, institutes and field projects in the student's own place of work, permit acquisition of an advanced degree and encourage students to make significant contributions to their organizations. We seek to maintain and develop student's knowledge and skills in the current and emerging technologies.

ADMISSION REQUIREMENTS

- A master's degree from a regionally accredited institution; however, a bachelor's degree is appropriate for the four-year combined program
- Current employment in a related field
- A minimum of two years of professional experience
- A G.R.E. score or completion of a portfolio with appropriate work experience and credentials
- Three letters of recommendation
- A completed application with application fee and official transcripts of all prior graduate and undergraduate work

TUITION

Tuition is $4500 per year*. This is a planned three year program. There is a $60 yearly registration fee. Students may register at any time during the year. Included in the tuition are computer online time, software and courseware necessary to complete the program. Students must purchase the textbooks.

* Subject to Change
PROGRAM ADMINISTRATION

ON-CAMPUS 2-DAY UNIX TRAINING WORKSHOPS
A two-day introductory session on UNIX is offered in a workshop format. New students are urged to come to the Nova University main campus, attend the UNIX workshop, and get acquainted with the Center for Computer and Information Sciences. This workshop is included in the regular tuition however, students must pay their own travel and living expenses. Master's students are welcome to participate in these workshops and meet with the CCIS faculty and staff.

The following dates are for the on campus UNIX workshops:

- September 15-16, 1989
- October 13-14, 1989
- December 8-9, 1989

The times for the workshops are:
- Friday afternoon: 1:30 P.M. - 5:00 P.M.
- Saturday: 9:00 A.M. - 4:00 P.M.

ADMISSION
Once the formal application has been made to the Center for Computer and Information Sciences, the Admissions Committee will review and make final decisions concerning admissions.

WITHDRAWAL
Students who wish to withdraw from the program - either temporarily or permanently - must inform the Admissions Office in writing to be eligible for allowable refunds. Students who give written notice of their intent to withdraw prior to a seminar will not be assessed for subsequent courses until they are formally readmitted. Students who withdraw are subject to the prevailing tuition rate.

READMISSION
Individuals on withdrawal status who wish to be readmitted must complete a readmission form and be approved for readmission by the Admissions Committee for the Center for Computer and Information Sciences.

PROGRESS RECORDS
The Center for Computer and Information Sciences maintains up-to-date progress records on each student. The University periodically furnishes each student with a working transcript, which shows the current status of grades and earned semester hours for all courses completed and/or attempted, plus grades for courses in which the student is currently enrolled.

GRADING SYSTEM FOR THE MASTERS PROGRAMS
Faculty for the Masters CCIS programs assign grades to coursework according to the following system:

<table>
<thead>
<tr>
<th>GRADE</th>
<th>ACHIEVEMENT RATING</th>
<th>QUALITY POINTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>Satisfactory</td>
<td>3</td>
</tr>
</tbody>
</table>
C  Marginal Pass  2
F  Failure  0
P  Pass (used for practicums)
I  Incomplete
PR  In Progress (practicums only)
W  Withdraw

WITHDRAW (W) Is assigned when a student withdraws from a course after the fifth scheduled class and prior to the eleventh scheduled class. Prior to and including the last day to drop courses, dropped courses are deleted from the student's record. After that date, a grade will be assigned. (This pertains only to Computer Science)

INCOMPLETE (I) Indicates that the student has not completed the course requirements and that the instructor has given additional time to do so. An "I" grade is not routinely assigned in courses, only when there are mitigating circumstances to prevent completion of the course requirements.

Incompletes may be assigned at the discretion of the instructor at the request of the student. Should the instructor choose to assign an incomplete, an incomplete contract is to be completed and signed by both the instructor and the student, with the original kept on record in the Program Office. An incomplete must be made up within one year of the date the student originally registered for the course. If not, it becomes an "F" (Fail). Students who receive two FAIL grades will be dismissed from the program and may not be readmitted. A student will not be permitted to register for a sequential course when a grade of "I" or "F" has been received in a prerequisite course. (Computer Science)

GRADING SYSTEM FOR THE DOCTORAL PROGRAMS
Faculty for the CCIS Programs assign grades of PASS, NO PASS, and INCOMPLETE for courses and PASS, NO PASS, IN PROGRESS, and UNACCEPTABLE for practicums and dissertations. Course grades are assigned by the lecturer responsible for that course, practicum grades are assigned by the practicum evaluator, and dissertation grades by the committee chair.

PASS (P) Indicates that the student has satisfied all course, seminar, practicum, or dissertation requirements.

INCOMPLETE (I) Indicates that there are one or more assignments and/or other requirements to complete before a summative grade can be assigned. An Incomplete is not automatically granted at the completion of the initial registration period. On the contrary, an Incomplete is an earned grade and it is only awarded after a petition is submitted to and accepted by the instructor. If an instructor accepts the incomplete petition, than an incomplete contract for completion is drafted and signed by the student and the instructor of record.

NO PASS (NP) Indicates that a student has not successfully completed all requirements to the satisfaction of the instructor. Any student receiving a NO PASS must repeat the course.
Students receiving a grade of NO PASS in a course or on a practicum will be placed on academic probation until the course has been retaken and passed. Students who receive two NO PASS grades will be terminated from the program. Readmission following academic dismissal is not possible in this program.

WITHDRAW (W)
Is assigned if the student officially withdraws (in writing) from the course prior to the course exam.

IN PROGRESS (PR)
Is assigned as an interim grade until completion of the course, practicum, or dissertation has been reached.

UNACCEPTABLE (U)
Means the practicum needs revision. When a practicum receives a "U" on the second revision, a NO PASS is assigned and the student must begin a new practicum on a new topic.

INTERNATIONAL STUDENTS
International Student Advising Service
(305) 475-7413 or 1-800-541-6682 x 7413

An International student applying to Nova University must (1) obtain a student (F-1) visa or an exchange visitor (J-1) visa (students are not permitted to study in the United States on a visitor [B-2] visa; (2) submit all secondary school and/or college level transcripts (transcripts must be in official English language translation); (3) demonstrate the ability to meet all costs of his/her education without financial aid from Nova University; (4) purchase medical insurance (J-1 visas only), contact the international student advisor for further information concerning insurance; (5) demonstrate proficiency in the English language through testing in the Nova University Intensive Language Program, or minimum of 500 on the TOEFL exam.

INTENSIVE LANGUAGE PROGRAM
Intensive Language Center
(305) 475-7430 or 1-800-541-6682 x 7430

The Intensive Language Program provides students from non-English language backgrounds with English language proficiency through one of two curricular emphases: college preparatory or career preparatory. It also provides intensive instruction in other languages.

The college preparatory curriculum provides students with the necessary English language skills to enable them to function in American colleges and universities. This curriculum prepares students for successful university study in English, as well as providing TOEFL (Test of English as a Foreign Language) preparation.

The career preparatory curriculum provides students with the English language skills to enable them to function in career and professional situations requiring English proficiency.
VETERANS SERVICES & BENEFITS
(305) 475-7413 or 1-800-541-6682 x 7413

Nova University's academic programs are approved by the State of Florida, Department of Education, State Approving Agency for Veterans Training, for veterans' educational benefits. The VA Representative will assist veterans in applying for benefits. A VA student must attain and maintain satisfactory progress as determined by the program director each evaluation period. The VA student who, at the end of any evaluation period, has not attained and maintained satisfactory progress will be placed on academic probation for the next evaluation period. Should the student not attain and maintain satisfactory progress by the end of the probationary period (one 6-month term), the student's VA educational benefits will be terminated for unsatisfactory progress. A student whose VA educational benefits have been terminated for unsatisfactory progress may petition the school to be recertified after one six-month term has elapsed. The school may recertify the student for VA educational benefits only if there is a reasonable likelihood that the student will be able to attain and maintain satisfactory progress for the remainder of the program.

FINANCIAL AID INFORMATION
(305) 485-7411 or 1-800-541-6682 x 7411

Nova University offers several programs of student financial aid in order to assist the greatest number of its students possible in meeting educational expenses. In order to qualify and remain eligible for financial aid, students must be accepted for admission into a University program; eligible for continued enrollment; a United States citizen, or in the U.S. for other than a temporary purpose; and making satisfactory academic progress toward a stated educational objective in accordance with the University's policy on satisfactory progress for financial aid recipients.

STUDENT CONDUCT AND RIGHTS

Students are expected to comply with the legal and ethical standards of Nova University. Academic dishonesty and nonacademic misconduct are subject to disciplinary action. Specific instances of misconduct include, but are not limited to, cheating, plagiarism, knowingly furnishing false information to the University, and forging or altering University documents or academic credentials. The institution reserves the right to require a student to withdraw at any time for misconduct as described above. It also reserves the right to impose probation or suspension on a student whose conduct is determined to be unsatisfactory.

Students who feel their rights have been denied are entitled to due process. Information on grievance procedures is contained in the Policy and Procedures Manual and is available from the Center for Computer and Information Sciences.
ORIGINAL WORK AT NOVA UNIVERSITY
Assignments such as course preparations, exams, tests, projects, term papers, practicums, etc., must be the original work of the student. Original work may include the thoughts and words of another author, but if this is the case, those ideas or words must be indicated by quotation marks or other accepted reference devices.

Work is not original that has been submitted previously by the author (except with the permission of the instructors involved) or by anyone else for academic credit. Work is not original that has been copied or partially copied from any other source, including another student, unless such copying is acknowledged by the person submitting the work for the credit at the time the work is being submitted or unless copying, sharing, or joint authorship is an expressed part of the assignment. Exams and tests are original work when no unauthorized aid is given, received, or used prior to or during the course of the examination.

REFERENCING THE WORK OF ANOTHER AUTHOR
All academic work submitted to Nova University for credit or as partial fulfillment of course requirements must adhere to the accepted rules of documentation. Standards of scholarship require that proper acknowledgement be given by the writer when the thoughts and words of another author are used. It is recommended that students acquire a style manual appropriate to their program of student and become familiar with accepted scholarly and editorial practice.

CERTIFICATION
State certification, promotion, and pay increases for students enrolled in CCIS programs are local decisions made by agencies not connected with Nova University. Therefore, it is the individual responsibility of current and prospective students to check with the appropriate agencies to insure that the program selected meets their specific needs. No claims are made by the university about certification or licensure.

RESERVATION OF POWER
Nova shall reserve the right to amend, modify, change, add to or delete from such rules and regulations that may affect its relations with its students, as may be prescribed by law or deemed necessary by the administration. Further, Nova reserves the right to change academic requirements, curriculum, tuition, and/or fees when in the judgment of the administration such changes are required.

Nova University practices a policy of nondiscrimination in employment and admission. Nova University does not discriminate on basis of race, color, age, sex, religion or creed, national or ethnic origin, or handicap.
Please complete the following Admissions Portfolio to the best of your ability. Provide documentation or examples of any of these items that you feel necessary to support your portfolio. When you have completed these items, sign the portfolio form and return it with your portfolio.

**Please type or use black pen.**

1. Employment History (specific job descriptions and dates)
2. Experience with automated systems or computers (Micros, mini or mainframe -- describe the nature and length of the experience)
3. What computer equipment do you have available for use in this program? (Terminals, mainframes, micro computers, etc). Also indicate the types of operating systems you have used on these machines.
4. Graduate courses for credit
5. Workshops, seminars, conferences, and special meetings (list topics)
6. Publications, proposals, and reports you have authored
7. Major improvement projects or innovations you have instituted in your organization or institution
8. Awards, achievements, or special recognition you have received
9. Offices held in professional organizations
10. Community involvement (clubs, churches, committees, etc.)
If applying for the Computer Science programs, DO NOT complete this form. ALL other programs complete.

GRADUATE RECOMMENDATION FORM

Applicant's Section

Full Name (Please Print)

Family Educational Rights and Privacy Act (FERPA) Buckley Amendment

Under the provisions of this act you have the right, if you enroll at Nova University, to review your educational records. The act further provides that you may waive your right to see recommendations for admission. Please indicate below by circling the appropriate phrase and signing your name whether or not you wish to waive that right. **I WAIVE** **DO NOT WAIVE** any right of access that I have to this recommendation.

Applicant's signature __________________________ Date __________

Recommender's Section

Name of Recommender __________________________ Title or Position __________________________

University or Company __________________________ Telephone __________________________

Address (City, State, Zip) __________________________

The programs offered by the Center for Computer and Information Sciences are designed to prepare outstanding students each year. The Admissions Committee would appreciate your assessment of this applicant's potential. Your evaluation will be regarded as confidential information, exclusively for the use of the Admissions Committee. Please complete both sides of this form. If more space is needed, please continue on additional sheets (label each with a page number and the applicant's name). Please return the completed form to:

NOVA UNIVERSITY
Graduate Admissions Committee
Center for Computer & Information Sciences
3301 College Avenue
Fort Lauderdale, Florida 33314

Thank you for taking the time to respond. The Admissions Committee feels that recommendations are among the most valuable data in the selection process. We sincerely appreciate your help.

Recommender's signature __________________________ Date __________

(OVER)
EVALUATION CRITERIA:

The Admission Committee's assessment of this student is based strongly on your recommendation. How long have you known this applicant, and in what capacity? Does this applicant have the maturity and stability to be able to work independently and with others? Please describe the particular strengths/weaknesses of this applicant. Also describe any special talents or experience that the applicant can bring to the program of study. If you have worked with the applicant on any special projects, please describe his/her role on the project and give an evaluation of his/her performance.
