This Mailer is brought to you for free and open access by the NSU Course Catalogs and Course Descriptions at NSUWorks. It has been accepted for inclusion in College of Engineering and Computing Course Catalogs by an authorized administrator of NSUWorks. For more information, please contact nsuworks@nova.edu.
Doctor of Arts in Information Science

Computer-Based Program Delivered Through UNIX*

Leadership for the Information Society

*UNIX is a trademark of AT&T and Bell Laboratories
The doctor of arts in information science (D.A.I.S.) program, delivered through UNIX®, is for professionals concerned with the effective transfer of information through systems from sources to users. The program is designed to provide a vehicle for practitioners to advance in their professions by learning to apply to their organizations or institutions the latest developments in information science, computer science, telecommunications, and strategic management.

This program, by combining individual study, computer-based learning, teleconferences, regional seminars, and field projects in the students' own places of work, permits them to acquire advanced degrees, and at the same time, make significant contributions to the organizations in which they are employed.

This information science doctoral program is designed for those professionals who hold one of the following (or similar) positions:
- Library Director
- Information Scientist
- Media Specialist
- Learning Resource Center Director
- Information Retrieval Specialist
- Instructional Librarian
- Public Services Librarian
- Government Publications Librarian

*UNIX is a trademark of AT&T and Bell Laboratories
Students are also required to attend four regional seminars each year of the three-year program. The regional seminars will be held in urban centers in different regions of the country and students may select the seminar most conveniently located geographically. The content of the regional seminars is integrated with the core courses, practicums, and the major field projects.

Other requirements include four practicums, a major field project, and a comprehensive examination. Practicums are applied research projects undertaken by students to address significant problems in their institutions or organizations.

Teleconferences, interactive computer experiences, regional seminars, self-paced instructional courseware, reading, and written assignments will form a major part of the students' work in the program. All written assignments are to be typed online and thus become searchable resources to students and faculty.

Seminars consist of presentations by recognized authorities, small group discussions, and workshop sessions. Demonstrations of the latest developments in digital computers, telecommunications, and information science will be presented. Pre- and post-seminar study materials will be available to each student. The seminars serve to extend insights gained in computer-based courses and also to acquaint students with other topics of significance in the information science field. Students will be responsible for their own lodging and travel expenses for these seminars.
ADMISSION

• A master's degree in library, media, or information science (or equivalent) from a regionally accredited university
• Current employment in a library, media, or information center
• A minimum of two years professional experience in the library or information science field
• GRE score or completion of a portfolio with appropriate work experience and credentials

TUITION

Tuition is $4250 per year. Quarterly payments may be made. Each student will need equipment with communication capabilities. Tuition payments may be made with Master Card, Visa, American Express, Choice, or Discover credit cards.

Interaction Between Student and Computer
YES, please send more information about the Doctor of Arts in Information Science Program.

Degree programs offered through the Center for Computer-Based Learning are:

- Doctor of Arts in Information Science
- Doctor of Arts in Training and Learning
- Doctor of Science in Computer Science
- Doctor of Education in Computer Education
- Master of Science in Computer-Based Learning
- Educational Specialist in Computer-Based Learning

Courses offered through the Center are:

- Computer Simulation (GPSS)
- Database Management Systems
- Statistics
- UNIX courses
- Strategic Management
- Telecommunications

Please send me more information about the programs I have checked.

NOVA UNIVERSITY
CENTER FOR COMPUTER-BASED LEARNING
3301 College Avenue
Ft. Lauderdale, FL 33314-9990
Looking across Gold Circle Pond toward the Mailman-
Hollywood Building and the Family Center.

Nova University, in Fort Lauderdale, Florida, is an
independent, nonprofit institution that is not tax-
supported. It offers courses of study leading to
bachelor’s, master’s, educational specialist, and
doctoral degrees, on its main campus, throughout the
State of Florida, and across the nation. Nova also
provides community services and conducts research in
a variety of fields.

Nova University is accredited by the Commission on
Colleges of the Southern Association of Colleges and
Schools to award bachelor’s, master’s, educational
specialist, and doctoral degrees. Nova University
admits students of any race, color, and national or
ethnic origin.
