NSUWorks Citation
Nova Southeastern University, "Graduate School of Computer and Information Sciences--Master of Science Degree Programs 2001-2003" (2001). College of Engineering and Computing Course Catalogs. 21.
https://nsuworks.nova.edu/cec_coursecatalogs/21

This Course Catalog is brought to you for free and open access by the NSU Course Catalogs and Course Descriptions at NSUWorks. It has been accepted for inclusion in College of Engineering and Computing Course Catalogs by an authorized administrator of NSUWorks. For more information, please contact nsuworks@nova.edu.
Documents and Policies
The official catalog of the Graduate School of Computer and Information Sciences is the governing document for all program-related information. Non-academic policies and procedures are contained in the Student Handbook which is provided to students on CD-ROM or may be downloaded from the school’s Web site. Please become familiar with the policies and procedures contained in these documents. Failure to do so does not excuse students from the rules and procedures contained therein. If there is any conflict between the information contained in the catalog and handbook and that contained in this or any other documents, the information in the catalog and handbook prevails. Policies, regulations, requirements, and fees, are necessarily subject to change without notice at any time at the discretion of the Nova Southeastern University administration. The university reserves the right for any reason to cancel or modify any course or program listed herein. In addition, individual course offerings may vary from year to year as circumstances dictate.

Accreditation
Nova Southeastern University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (1866 Southern Lane, Decatur, Georgia 30033-4097; telephone number (404) 679-4501) to award bachelor’s, master’s, educational specialist, and doctoral degrees. The school's master's programs have been certified for inclusion in the Southern Regional Education Board's Electronic Campus.

Notice of Nondiscrimination
Nova Southeastern University admits students of any race, color, sex, age, nondisqualifying disability, religion or creed, or national or ethnic origin to all rights, privileges, programs, and activities generally accorded or made available to students at the school, and does not discriminate in administration of its educational policies, admissions policies, scholarship and loan programs, and athletic and other school-administered programs.

Academic Calendar, Master's Program
(Master's programs have rolling admissions)

Fall 2001 (Sep 17 - Dec 7 01) Term Code: 200220
- Jul 23 - Sep 7 01 Registration period (no late fees)
- Sep 8 - 17 01 Late registration period (late fees)
- Sep 17 01 First day of term
- Sep 22 01 Drop/add deadline
- Sep 18 01 Holiday
- Sep 27 01 Holiday
- Nov 22-23 01 Holiday
- Dec 7 01 Last day to withdraw from a course with a final grade of W
- Dec 7 01 Last day of term

Winter 2002 (Jan 7 - Mar 29 02) Term Code: 200230
- Nov 5 - Dec 28 01 Registration period (no late fees)
- Dec 29 - Jan 7 02 Late registration period (late fees)
- Jan 7 02 First day of term
- Jan 12 02 Drop/add deadline
- Jan 21 02 Holiday
- Mar 29 02 Holiday
- Mar 29 02 Last day to withdraw from a course with a final grade of W
- Mar 29 02 Last day of term

Spring 2002 (Apr 1 - Jun 21 02) Term Code: 200240
- Feb 4 - Mar 22 02 Registration period (no late fees)
- Mar 23 - Apr 1 02 Late registration period (late fees)
- Apr 1 02 First day of term
- Apr 6 02 Drop/add deadline
- May 27 02 Holiday
- Jun 21 02 Last day to withdraw from a course with a final grade of W
- Jun 21 02 Last day of term

Summer 2002 (Jun 24 - Sep 13 02) Term Code: 200305
- Apr 9 - Jun 14 02 Registration period (no late fees)
- Jun 15 - 24 02 Late registration period (late fees)
- Jun 24 02 First day of term
- Jun 29 02 Drop/add deadline
- Jul 4 02 Holiday
- Sep 2 02 Holiday
- Sep 13 02 Last day to withdraw from a course with a final grade of W
- Sep 13 02 Last day of term

Fall 2002 (Sep 23 - Dec 13 02) Term Code: 200320
- Jul 29 - Sep 13 02 Registration period (no late fees)
- Sep 14 - 23 02 Late registration period (late fees)
- Sep 23 02 First day of term
- Sep 29 02 Drop/add deadline
- Sep 16 02 Holiday
- Nov 28 02 Holiday
- Dec 13 02 Last day to withdraw from a course with a final grade of W
- Dec 13 02 Last day of term

Winter 2003 (Jan 6 - Mar 28 03) Term Code: 200330
- Nov 11 - Dec 27 02 Registration period (no late fees)
- Dec 28 02 - Jan 6 03 Late registration period (late fees)
- Jan 6 03 First day of term
- Jan 11 03 Drop/add deadline
- Jan 20 03 Holiday
- Mar 28 03 Last day to withdraw from a course with a final grade of W
- Mar 28 03 Last day of term

Spring 2003 (Mar 31 - Jun 20 03) Term Code: 200340
- Feb 3 - Mar 21 03 Registration period (no late fees)
- Mar 22 - 31 03 Late registration period (late fees)
- Mar 31 03 First day of term
- Apr 5 03 Drop/add deadline
- Apr 18 03 Holiday
- May 26 03 Holiday
- Jun 20 03 Last day to withdraw from a course with a final grade of W
- Jun 20 03 Last day of term
- Jan 7 03 Drop/add deadline
- Jun 6 03 Last day to withdraw from a course with a final grade of W
- Jun 6 03 Last day of term
A major force in educational innovation, the Graduate School of Computer and Information Sciences (SCIS) provides educational programs of distinction to prepare students for leadership roles in its disciplines. The school's strengths include a distinguished faculty, a cutting edge curriculum, and flexible online and campus-based formats for its four M.S. and five Ph.D. programs. It has approximately 2,000 graduate students. All of the school's programs enable working professionals to earn the M.S., Ph.D., or Ed.D. without interrupting their careers. On-campus evening master's degree programs are tailored to meet the needs of those who reside in South Florida. Online master's degree programs, which require no campus attendance, are available to part-time or full-time students worldwide. A unique online doctoral program requires only four weekends or two weeklong visits to the campus each year. The school has online students living in every state in the U.S. and in 35 foreign countries. The school welcomes students who wish to attend full-time, whether on-campus or online.

Ranked by Forbes magazine as one of the nation's top 20 cyber-universities, and listed in the Princeton Review's The Best Distance Learning Graduate Schools, SCIS pioneered online graduate education with its creation of the electronic classroom, and has been offering online graduate programs and programs with an online component since 1983. All four online M.S. programs are part of the Southern Regional Electronic Campus. The school has been awarding graduate degrees since 1980. Its research advances knowledge, improves professional practice, and contributes to understanding in the computer and information sciences. In addition to its regional accreditation by the Commission on Colleges of the Southern Association of Colleges and Schools, the school is a certified member of the Electronic Campus of the Southern Regional Education Board, and all of its online M.S. courses and programs are offered via this highly successful consortium. It also participates in several federal and military programs including the Information Resources Management (IRM) Graduate Certificate Program, the DANTES Distance Learning Program, and the U.S. Army’s new online initiative, eArmyU.

The M.S., which is offered on-campus or online, requires 36 credit hours and may be completed in 12–18 months. Terms are 12 weeks long and there are four terms each year. Master's terms start in September, January, April, and July. SCIS master's students may apply for early admission into the doctoral program. Early admission provides the student the opportunity to earn the Ph.D. or Ed.D. in a shorter time.

Depending on the program, doctoral students may take one of two formats: cluster or institute. Clusters and institutes bring together students and faculty for participation in courses, seminars, and dissertation counseling. Between meetings, students work on assignments and projects, and participate in online activities that facilitate frequent interaction with the faculty and with other students. Cluster students, while taking courses, attend four cluster sessions per year, held quarterly over an extended weekend at the university. Institute terms start in March and September. Institute students, while taking courses attend weeklong sessions at the university twice a year at the start of each term. Institute terms start in January and July. Cluster and institute terms are five months long.

Online learning methods involve Web pages to access course materials, announcements, the electronic library, and other information, plus a range of activities that facilitate frequent student–professor and student–student interaction. Faculty members and students interact via online forums using threaded discussion boards, chat rooms, email, electronic classrooms, and online submission of assignments in multimedia formats.

Located on a beautiful 250-acre campus in Fort Lauderdale, Florida NSU has over 20,000 students and is the largest independent institution of higher education in the Southeast. It is the 14th largest private university in the United States. NSU awards bachelor’s, master’s, educational specialist, doctoral, and first-professional degrees in more than 80 disciplines. It has an undergraduate college and graduate schools of medicine, dentistry, pharmacy, allied health, optometry, law, computer and information sciences, psychology, education, business, oceanography, and humanities and social sciences.

The success of NSU's programs is reflected in the accomplishments of its graduates among whom are:

- Thirty-nine college presidents and chancellors
- More than 100 college vice presidents, provosts, deans, and department chairs
- Sixty-five school superintendents in 16 states, including nine of the nation's largest school districts
- Hundreds of college and university faculty members nationwide
- High-ranking United States military officers, including admirals and generals, and business presidents, vice presidents, executives, middle managers, and researchers at companies such as American Express, AT&T, Bell Atlantic, BellSouth, General Electric, GTE, Harris Corporation, IBM, Lenox China, Microsoft, Motorola, Nortel Networks, Sun Microsystems, Texas Instruments, Westinghouse, and William Penn Bank

Application for Admission to the Master’s Degree Program (U.S. Citizens or Permanent Residents)

Admission to the Graduate School of Computer and Information Sciences is competitive, consequently applicants who meet the minimum requirements specified in the catalog are not assured admission. The school qualitatively and quantitatively evaluates applicants and makes selections based on performance, personal qualifications, and evidence of potential for success. Admission decisions are made on a rolling basis. Before an application can be considered reviewable by the Admissions Committee, the following items must be received by the admissions office: application form, application fee, essay, summary of professional experience or GRE scores, at least two of the required three evaluation forms and all transcripts (unofficial copies are acceptable pending receipt of official transcripts). To ensure evaluation for the desired starting term, reviewable applications must be received at least one month prior to the start of that term. Late applications that cannot be processed in time for the desired starting term will be considered for the next term.

Applicants must meet the general requirements, submit the items specified below, and must also satisfy the program-specific admission requirements contained in the individual program sections of this brochure. Detailed instructions for the preparation and mailing of admissions materials are contained in the school’s admission forms. Admission forms, brochures, the catalog, and this brochure may be downloaded from the school’s Web site: www.scis.nova.edu.

1. An earned bachelor’s degree from a regionally accredited institution with an appropriate major (see program-specific admission requirements).
2. Application form, application fee, and essay.
3. Official transcripts of all graduate and undergraduate education. Transcripts must show an undergraduate GPA of at least 2.5 and a GPA of 3.0 in a major field.
4. Evaluation forms from three individuals who are familiar with your academic and/or professional capabilities and are able to assess your intellectual abilities, maturity, and motivation. Forms from family members or individuals who are unable to evaluate your academic or professional background are unacceptable.
5. Summary of Professional Experience or score report of the Graduate Record Examination (GRE).
6. Proficiency in the English language is a prerequisite for study at the Graduate School of Computer and Information Sciences. Master’s students are expected to write numerous papers. It is very important to note that grammatical errors, spelling errors, and writing that does not express ideas clearly will affect a student’s grades and the completion of his or her degree. The faculty will not provide remedial help concerning grammatical errors or other writing problems. Applicants who are unable to write correctly and clearly are urged to seek remedial help before enrolling in any of the school’s programs.

Additional Admission Requirements for International Master’s Students

1. The application fee must be in U.S. dollars.
2. Online international students who do not live in the United States do not need visas to participate in the program because they do not have to travel to the United States to complete the degree.
3. Requirements for campus-based students: The university will not enroll a campus-based student who has not been approved initially, or approved for transfer, by the Immigration and Naturalization Services (INS) to attend Nova Southeastern University. The INS requires that all students on an F-1 student visa must enroll full time and attend the main campus only. All students holding J-1 or F-1 visas are required to carry medical insurance. Students on J-1 visas are required to secure an affidavit of support, from an agency or government who will be the financial sponsor, stating that they have a sufficient amount of money to support themselves for the duration of their study. Students on F-1 visas need an affidavit of support and a notarized/attested financial statement proving that they have a sufficient amount of money to support themselves for one academic year (generally nine months). Non-degree or provisional admission status is not considered a basis for the issuance of an I-20. After applicants receive a written offer of admission, the I-20 will be provided, upon request, to those who have verified financial support and require an F-1 student visa. International students must enter the United States on a valid student or other visa. Nonresident aliens currently in the United States must have a valid student or nonimmigrant visa (except B1/B2 visa) for
enrollment in the university. Students sponsored by the United States government or their home government are required to enter the United States on a J-1 visa (exchange visitor’s visa). For additional information regarding international students, contact the university’s International Student Advising Service at (954) 262-7240 or 800-541-6682, ext. 7240; fax: (954) 262-7265.

4. Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). A minimum test score of 550 is required for applicants taking the written examination. A minimum test score of 213 is required for applicants taking the computer-based examination. (Scores must be no more than two years old.) Test results must be sent directly to the Graduate School of Computer and Information Sciences from TOEFL/TSE Services, P.O. Box 6153, Princeton, NJ, 08541-6153, USA; phone: (609) 771-7100; fax: (609) 771-7500, Web site: www.toefl.org.

5. The applicant must have a university-level education at least equivalent to a regionally-accredited United States bachelor’s degree in a related field (see program-specific admission requirements) with an equivalent GPA of at least 2.5 and an equivalent GPA in the applicant’s major field of 3.0. To enable SCIS to determine these equivalencies, the applicant must have his or her degree evaluated by an agency that is a member of the National Association of Credential Evaluation Services (NACES). (For more information about evaluation agencies you may contact the SCIS Office of Admissions.) To apply for the transfer of graduate credits from a foreign institution, the applicant must have the courses proposed for transfer evaluated by an agency that is a member of the National Association of Credential Evaluation Services.

Admission of Non-Degree Students

A qualified applicant wishing to take one or more master’s-level courses but not having an immediate degree objective is welcome to the extent that school resources allow. An applicant requesting non-degree status must have an earned bachelor’s degree in a related field from a regionally accredited college or university and must submit an application form, official transcripts of undergraduate and graduate education, a request for Unix account form, and an application fee. Admission forms may be obtained from the school’s Office of Admissions or may be downloaded from the school’s Web site (www.scis.nova.edu).

Non-degree students may take up to 18 credits and must maintain a 3.0 GPA to continue enrollment in non-degree status. The non-degree student may apply for degree status at any time by completing the regular graduate admissions application process. Satisfactory completion of courses by non-degree students does not guarantee admission to the master’s degree program. Courses completed while the student is in a non-degree status will be evaluated by a faculty committee as to the suitability of their transfer into the desired master’s degree program. Courses applied to a graduate degree must fall within the time frame specified for the master’s degree. An international student on an I-20 may not enroll in the non-degree status. Non-degree students are not eligible for financial aid.

Provisional or Conditional Admission

A degree-seeking applicant who has missing documents but appears to be acceptable based on documents received by SCIS may be offered provisional admission. Official admission will be granted upon receipt and acceptability of the remaining required documents. Examples of missing documents are an official transcript and an evaluation form. All missing documents must be submitted by the end of the student’s first term. An applicant who has not met all admission requirements may be offered conditional admission if sufficient evidence exists to suggest the ability to perform successfully in the program. A student with conditional status must remove stated deficiencies as specified in the acceptance letter.

Transfer Credit Policy

Up to six graduate credits may be transferred from a regionally accredited institution. Courses proposed for transfer must have received grades of at least B. Students must request approval of transfer credits in writing at the time of application (see instruction on the application form). Copies of catalog course descriptions or course syllabi are required to process requests for transfer credits. Federal regulations require that veteran students MUST report all prior credit and training, and that the school MUST evaluate such and grant credit as appropriate, with training time and tuition reduced proportionately and with the VA and student so notified.

Financial Aid

The Office of Student Financial Assistance administers the university’s financial aid programs of grants, loans, scholarships, and student employment, and provides professional financial advisers to help students plan for the most efficient use of their financial resources for education. In order to participate in financial aid programs, a student must be admitted into a university program, and must be a citizen, a national, or a permanent resident of the United States, or be in the United States for other than a temporary purpose. A prospective student who requires financial assistance must apply for financial aid while he or she is a candidate for admission. Students/applicants may apply for financial aid
Students must work directly with the university’s Office of Student Financial Assistance because the school’s program office does not administer or manage the financial aid process. For additional information or application forms call (954) 262-3380, 800-806-3680, or send email to lordcarl@nova.edu or finaid@nova.edu. To continue financial aid, at a minimum, enrolled students must demonstrate satisfactory academic progress toward a stated educational objective in accordance with the university’s policy on satisfactory progress for financial aid recipients.

Orientation and Advisement Program

New students are invited to the campus for an orientation and are also provided Web-based and CD-ROM-based orientations that includes computer/software requirements, online access, tools and methods, and library access. A guide to the school’s online learning environment can be downloaded. The school’s Web site provides an extensive online “help” system including downloadable software and documents. Advisement is provided by the master’s program office and the faculty.

Early Admission into the Doctoral Program (See SCIS Graduate Catalog for details and specific options.)

This option provides the school’s M.S. students the opportunity to earn the doctorate in a shorter time. Minimum requirements for early admission are the completion of 24 credits in the M.S. program with a GPA of 3.5 or higher and the completion of specific master’s courses (see doctoral program sections for details). If admitted into the doctoral program, students will take the remaining 12 credits for the M.S. degree in the doctoral program. Master’s students may apply for early admission no sooner than during the term in which they will be completing 24 credits. Students must submit applications for early admission to the SCIS Office of Admissions. Doctoral admission forms may be downloaded from the SCIS Web site. An application fee is not required. The SCIS Office of Admissions will supply the Admissions Committee with the student’s current transcripts. Three evaluation forms must be completed by SCIS faculty members. Upon successful completion of 12 credits in the doctoral program, the student may apply for the master’s degree. Contact the master’s program office for a degree application.

Thesis and Non-Thesis Options

For the thesis option, 30 credit hours of course work and six credit hours for the master’s thesis are required. For the non-thesis option, 36 credit hours of course work are required. Students interested in completing the master’s thesis should contact the master’s program office to make arrangements.

Term Dates

Four 12-week terms are offered each year. Terms start in September, January, April, and July. (The Academic Calendar for the master’s program is printed on the inside of the front cover of this catalog.)

Program Formats

The 36-credit hour program is designed so it may be completed by full-time students in 12 months or by working professionals in 18 months while remaining in their current positions. To earn the degree in 12 months, students must enroll in three courses per term. To earn the degree in 18 months, students must enroll in two courses per term. Terms are 12 weeks long and there are four terms each year. Students select one of two formats: online or on-campus (on-campus is not available for the M.S. in computing technology in education).

The online format requires the completion of 12 courses via online techniques or 10 online courses and a six-credit thesis (see section on thesis option). Students participate in online courses from anywhere in the world where Internet access is available.

The on-campus format requires the completion of 12 courses or 10 courses and a six-credit thesis (see section on thesis option). Classes are held on the campus in Fort Lauderdale. Each class meets once a week from 6:30 p.m. to 9:30 p.m. for 12 weeks.

All SCIS students are provided NSU computer accounts but must obtain their own Internet service providers and use their own computer systems. New students are provided an orientation on computer and software requirements, online access, online tools and methods, and library resources. Students use the Web to access course materials, announcements, email, the Electronic Library, and other information, and for interaction with faculty and fellow students. Online activities may include Web pages, forums using threaded bulletin boards, and chatrooms. In addition, the school provides a system that enables the student to submit assignments online in multimedia formats and to receive the professor’s online reviews of assignments in the same multimedia formats. Some online courses may include electronic classroom sessions. Students must comply with NSU policies on acceptable use of computing resources and use of material in Web pages.
Grade Requirements and Time Limitations (See SCIS Graduate Catalog for additional information.)

Each student must maintain a cumulative grade point average of at least 3.0 for the duration of his or her program to remain in good academic standing. Failure to do so will result in probation and possible dismissal. Students must complete requirements for the master’s degree within five years from the date of their first registration.

Independent Study and Directed Independent Study

A student wishing to take an existing course on an independent study basis must obtain written approval from the faculty member responsible for the course and then forward a request to the program office for final approval. A student interested in conducting study or research under the supervision of a faculty member in areas not normally covered in regular courses may request approval by a faculty member and the program office to register for directed independent study. A contract for independent study or directed independent study must be prepared by the student and must include an assignment timeline. The contract must be approved by the mentoring faculty member and the program director.

Cross-Registration

Students may apply to cross-register for courses offered in other SCIS master’s degree programs. Approval for cross-registration must be obtained from the master’s program office prior to registration.

Library Resources

Students must be registered in order to use the university’s library services. NSU’s library system comprises: Library, Research, and Information Technology Center; Health Professions Division Library; Law Library; East Campus Library; North Miami Beach Fischler Graduate School of Education and Human Services Media Union; Oceanographic Library; and four additional school libraries on the main campus. The catalogs of all NSU libraries are accessible for remote searching (as are catalogs of other university libraries) to online students via the Electronic Library. Online and CD-ROM databases complement the paper-based holdings and provide full-text resources. Interlibrary loan arrangements through networked organizations such as the Online Computer Library Center (OCLC), the Southeast Florida Library Information Network (SEFLIN), the Consortium of Southeastern Law Libraries (COSELL), and the National Library of Medicine provide broad access to a wide range of materials. The library also has lending agreements with large research libraries in the Midwest, which provide priority document delivery services to students. The NSU library system is a cooperating member of the Foundation Center in New York, giving students access to collections for grants and foundation research.

Online students have access to books, journal articles, microfiche, dissertations, index searches, catalog searches, and reference librarians. Distance students may request library materials using fax, mail, or online forms. To contact Distance Library Services (DLS) by phone, call 800-541-6682, ext. 4602, or (954) 262-4602. Use the toll-free fax to order library materials: 888-347-3627 (in Broward County, fax 262-3947). Students can send email to DLS: library@nova.edu, or can reach DLS via the Web: www.nova.edu/library. All materials mailed by the DLS office are sent by first-class mail. When books are borrowed, the student will have to pay a small charge for third-class postage to return the books. Books are loaned for one month. Periodical copies or ERIC documents need not be returned.

Tuition and Fees (Rates are subject to change. Textbooks are not included and must be purchased separately.)

Tuition Payment Policy

Tuition and fees may be satisfied with payment by check, money order, credit card, or official financial aid award letter with associated financial aid documentation. Cash will not be accepted as payment for tuition and fees unless paid at the Office of the University Bursar. All postdated checks or credit card authorizations will be held by the university for processing until the due dates specified in this policy. The tuition payment policy is subject to change at any time at the discretion of the administration of Nova Southeastern University. There are five options available for the payment of tuition. These options are described below:
1. **Full payment by the student**: Full payment of tuition and fees is to be made at the time of registration. Registration after the registration period, when permitted, will involve payment of a late registration fee.

2. **Installment payment by the student (students attending on an 1-20 are not eligible for this option)**: This plan requires three payments spread over the first 90 days of the term. The first payment must be made by check, money order, or credit card. At the time of registration, the student must submit postdated checks or credit card authorizations for the second and third installments. The first payment, due at registration, includes all fees, 50 percent of the tuition, plus a $50 deferment fee. The second payment, due 60 days from the beginning of the term, shall equal 25 percent of the tuition. The third payment, due 90 days from the beginning of the term, shall equal 25 percent of the tuition. Registrations received without the three payments cannot be processed.

3. **Direct payment by the student’s employer**: If a letter of commitment or a voucher from the student’s employer accompanies the registration form, then the student will not be required to make a payment at registration time. The letter of commitment or the voucher must indicate that the employer will remit full payment of tuition and fees to Nova Southeastern University upon receipt of the invoice from the university’s accounts receivable office.

4. **Tuition reimbursement by the student’s employer**: If the student submits a letter from the employer at registration time that establishes eligibility for tuition reimbursement, the student may choose a two-payment plan. The first payment, due at registration, shall include all fees, 50 percent of the tuition, plus a $50 deferment fee. The second payment, due five weeks after the end of the term, shall equal 50 percent of the tuition. To secure this plan, the student must provide, at registration, a postdated check or credit card authorization for the deferred portion.

5. **Financial aid award**: Students who have applied for financial aid and have submitted all the required paperwork to the Office of Student Financial Assistance may register without payment.

Additional Information on Policies and Procedures
For additional information on policies and procedures consult the graduate catalog of the Graduate School of Computer and Information Sciences located on the school’s Web site: [www.scis.nova.edu](http://www.scis.nova.edu).

**Master of Science (M.S.) in Computer Information Systems**

This program offers a course of study leading to the master of science (M.S.) in computer information systems. It focuses on the technological foundations of computer information systems including areas such as database systems, human-computer interaction, data and computer communications, computer security, computer graphics, software engineering, and object-orientation. It is designed to give students a thorough knowledge of the field and to provide an enduring foundation for future professional growth. The program blends theory and practice into a learning experience that develops skills applicable to complex real-world problems. Its formats offer full-time students the opportunity to earn the master's degree in 12 months and working professionals the opportunity to earn the degree in 18 months while remaining in their current positions. The curriculum is consistent with recommendations for a model curriculum in computer information systems as outlined by the Association of Computing Machinery (ACM).

**Program-Specific Admission Requirements** (See pp. 2–3 for general admission requirements.)

This program is designed for students with undergraduate majors in computer science, information systems, engineering, mathematics, or physics. Applicants must have knowledge of data structures and algorithms, assembly language and computer architecture, structured programming in a modern high-level language, college algebra, and discrete mathematics. An applicant who does not have an adequate background may be required to take one or more of the following 500-level graduate courses during the first two terms of the student’s program. These are in addition to the required 36 credit hours at the 600 level. Courses at the 500 level, when required, must be completed prior to taking courses at the 600 level; however, some exceptions may be permitted by the program director. Students must earn a B or better in 500-level courses. Grades for 500-level courses are not included in the student’s GPA. MCIS 501 is a prerequisite to MCIS 503.

- **MCIS 500** Assembly Language and Architecture
- **MCIS 501** Java Programming Language
- **MCIS 502** Mathematics in Computing
- **MCIS 503** Data Structures and Algorithms

**The Curriculum for the M.S. in Computer Information Systems**
Core courses and electives are listed below. Students may substitute up to two electives in lieu of two core courses. Students who wish to take an additional elective in lieu of a core course must request approval from the program office prior to registration. If the thesis option is elected, two courses may be omitted. Plans for the thesis option must be made with the program office. A student wishing to register for MCIS 682, Project in Information Systems, must first obtain the approval of the faculty member who would supervise the project.
**Core Courses:**
- MCIS 611 Survey of Programming Languages
- MCIS 615 Operating Systems Concepts
- MCIS 620 Information Systems
- MCIS 625 Computer Graphics
- MCIS 630 Database Systems
- MCIS 645 Software Engineering
- MCIS 650 Data Communications Networks
- MCIS 661 Object-Oriented Applications
- MCIS 665 Client–Server Computing
- MCIS 670 Artificial Intelligence and Expert Systems
- MCIS 671 Decision Support Systems
- MCIS 680 Human-Computer Interaction

**Electives:**
- MCIS 621 Information Systems Project Management
- MCIS 623 Legal and Ethical Aspects of Computing
- MCIS 631 Database Systems Project
- MCIS 651 Project in Data Communications Networks
- MCIS 652 Computer Security
- MCIS 654 Electronic Commerce on the Internet
- MCIS 681 Multimedia Systems
- MCIS 682 Project in Information Systems
- MCIS 688 Continuing Thesis in Computer Information Systems
- MCIS 691 Special Topics in Computer Information Systems
- MCIS 699 Master's Thesis in Computer Information Systems

**Course Descriptions for the M.S. in Computer Information Systems**

**MCIS 500 Assembly Language and Architecture (3 credits)**
A comprehensive examination of the fundamental concepts and architectural structures of contemporary computers. The course focuses on assembly language programming and the influence of low-level computer architecture on modern computer applications.

**MCIS 501 Java Programming Language (3 credits)**

**MCIS 502 Mathematics in Computing (3 credits)**
Graph theory, lattices and boolean algebras, state models and abstract algebraic structures, logical systems, production systems, computability theory, recursive function theory.

**MCIS 503 Data Structures and Algorithms (3 credits)**
Sorting and searching, algorithms for tree structures, advanced data structures, graph algorithms, complexity, dynamic programming, optimization problems. Prerequisite: MCIS 501 or equivalent.

**MCIS 611 Survey of Programming Languages (3 credits)**
Organization and types of programming languages. Analysis of imperative, object-oriented, and declarative language paradigms. Higher-level languages. Comparative analysis of programming languages used in the development of computer information systems.

**MCIS 615 Operating Systems Concepts (3 credits)**
Objectives of managing computer system resources. Memory management, process management, file system management, scheduling, synchronization, interrupt processing, distributed processing, and parallel systems. An analysis of the role of operating systems in computer information systems development, operation, and evolution.

**MCIS 620 Information Systems (3 credits)**
Covers major concepts and architecture of computer information systems, including information concepts; information flow; types of information systems; the role of information in planning operations, control, and decision making; integrated information systems across a range of functional elements. Computer information systems in organizations.

**MCIS 621 Information Systems Project Management (3 credits)**

**MCIS 623 Legal and Ethical Aspects of Computing (3 credits)**
Building on a foundation in classical ethics, we examine the impact of the computer and the Internet on our society. Topics covered include ethical decision making; professional codes; whistle-blowing; computer crime; copyrights, patents and intellectual property; privacy; and risk management. Students will analyze case studies and write a research paper.

**MCIS 625 Computer Graphics (3 credits)**
Principles and concepts of computer graphics useful to information managers. Topics include an introduction to raster graphics, concepts of 2-D and 3-D graphics, modeling, rendering, graphic file formats, color, graphical user interfaces, virtual reality, and the graphical presentation of information.

**MCIS 630 Database Systems (3 credits)**
Methodologies and principles of database analysis and design are presented. Conceptual modeling and specifications of databases, database design process and tools, functional analysis, the entity relationship model, and advanced semantic modeling methods are discussed. Topics include theories of database systems, including the architectures of database systems, logical and physical database organizations, data models for database systems (network, hierarchical, relational, and object-oriented model), relational algebra and calculus, query languages, normal forms, null values and partial information, relational database design utilizing dependencies, view
design and integration, concurrency control, query optimization, client–server database applications, distributed databases, object-oriented databases, and the current research and development trends of database analysis, design, modeling, and applications.

**MCIS 631 Database Systems Project (3 credits)**
The techniques of database management systems are applied to practical projects. Prerequisite: MCIS 630.

**MCIS 645 Software Engineering (3 credits)**
The development of software-intensive systems; software quality factors; software engineering principles; system life-cycle models and paradigms; requirements definition and analysis; behavioral specification; software design; implementation; software testing techniques; verification and validation; system evolution; software project management. This course is only for students in the CIS master’s program.

**MCIS 650 Data Communications Networks (3 credits)**
This course covers the technical concepts of data networks, network components, associated network technologies, and data communications protocols. Specification, design, testing, managing, and updating of data networks from legacy systems through high-speed networks are discussed. Network components, guided and unguided media, as well as routing and high-speed switching systems are studied. This course examines the relationship of computer applications to network architecture and subsystems. Current network and data communication topics are presented, as well as future trends.

**MCIS 652 Computer Security (3 credits)**
Concepts and applications of system and data security. Topics include risks and vulnerabilities, policy formation, controls and protection methods, database security, encryption, authentication technologies, host-based and network-based security issues, personnel and physical security issues, issues of law and privacy. Areas of particular focus include secure network design, implementation and transition issues, and techniques for responding to security breaches.

**MCIS 654 Electronic Commerce on the Internet (3 credits)**
The combination of the computer and the Internet have created an incredible “market space”. We will examine the foundation, operation and implications of the Internet economy. Topics include Internet technologies, online market mechanisms, interactive customers, knowledge-based products, smart physical products and services, pricing in the Internet economy, online auctions and e-marketplaces, digital governance, policies for the Internet economy and an outlook for the new economy. Students will participate in an Internet shopping experience, analyze a company that focuses on e-commerce and write a research paper.

**MCIS 661 Object-Oriented Applications (3 credits)**
Principles and concepts of the object-oriented paradigm and object-oriented programming languages. Notation and techniques for the analysis, design, and implementation of object-oriented systems. Mechanisms for reuse, including composition, inheritance, design patterns, and application frameworks. The use of object-oriented methods in common applications.

**MCIS 665 Client–Server Computing (3 credits)**
Concepts and principles of client–server architecture, protocols, networks, and distributed computing are presented. The focus of this course is on distributed application design and implementation. Topics include inter-process communication, the role of the GUI and front-end development tools, middleware, multi-tier architectures, distributed objects, and database interaction. Discussions include the various relationships between client–server computing and business processes. Migration from legacy systems is considered along with concerns for meeting customer requirements.

**MCIS 667 Artificial Intelligence and Expert Systems (3 credits)**
Theory and practice of artificial intelligence and knowledge-based expert systems. Topics include knowledge representation and inference, heuristic and adversarial search, genetic algorithms, machine learning, neural computing, reasoning under uncertainty, symbolic programming using Lisp, logic programming using Prolog, and expert systems. Examples from current application areas such as robotics, planning, machine vision, natural language processing, and intelligent agents are used to reinforce the concepts.

**MCIS 671 Decision Support Systems (3 credits)**
This course examines concepts of decision support in both automated and non-automated environments. The focus is on application of decision theory, analytical modeling, and simulation techniques to solve organizational problems. Group Decision Support Systems, Executive Information Systems, and Expert Systems are also discussed. Case studies of existing systems are used to reinforce concepts discussed in class. A major component of the course is a project entailing the design, implementation, and evaluation of a Decision Support System. Emphasis is placed on the technical aspects of decision support systems.

**MCIS 680 Human–Computer Interaction (3 credits)**
Focuses on the dynamics of human–computer interaction (HCI). Provides a broad overview of HCI as a sub-area of computer science and explores user-centered design approaches in information systems applications. Addresses the user interface and software design strategies, user experience levels, interaction styles, usability engineering, and collaborative systems technology. Students will perform formal software evaluations and usability tests.

**MCIS 681 Multimedia Systems (3 credits)**
Introduction to multimedia systems. Multimedia terms and concepts. Trends in the development and use of multimedia. Tools, techniques, and guidelines facilitating the planning, design, production, and implementation of multimedia products.

**MCIS 682 Project in Information Systems (3 credits)**
Students pursue a project, research study, or implementation under the supervision of a faculty member.
MCIS 688 Continuing Thesis in Computer Information Systems (1.5 credits)
Students who have not completed the thesis by the end of the second thesis registration must register for continuing thesis. This allows the student to receive faculty and administrative advice and support related to the thesis. Prerequisite: Completion of second thesis registration.

MCIS 691 Special Topics in Computer Information Systems (3 credits)
This seminar focuses on the professor's current research interests. Requires consent of course professor and program director.

MCIS 699 Master's Thesis in Computer Information Systems (3 credits)
The student develops a framework within which research will be conducted and offers evidence of qualifications to pursue the research. Concepts and theories underlying the student's thesis research are articulated, the problem is clearly stated, specific, measurable goals are specified, a literature review is presented, the methods of conducting research are delineated, and strategy to achieve the goal is given. Registration for MCIS 699 must be repeated for three more credits, for a total of six thesis credits. Prerequisite: Completion of eight courses.

Master of Science (M.S.) in Computer Science
This program offers a course of study leading to the master of science (M.S.) in computer science. It is designed to give students a thorough knowledge of the field and to provide an enduring foundation for future professional growth. The program blends theory and practice into a learning experience that develops skills applicable to complex real-world problems. Its formats offer full-time students the opportunity to earn the master's degree in 12 months and working professionals the opportunity to earn the degree in 18 months while remaining in their current positions. The curriculum is consistent with recommendations for a model curriculum in computer science as outlined by the Association of Computing Machinery (ACM).

Program-Specific Admission Requirements (See pp. 12-13 for general admission requirements.)
This program is designed for students with undergraduate majors in computer science, engineering, mathematics, or physics and who have completed courses or have equivalent experience in data structures and algorithms, assembly language, computer architecture, structured programming in a modern high-level language, systems software (compilers or operating systems), calculus (differential and integral calculus), and discrete mathematics. An applicant who does not have an adequate background may be required to take one or more of the following 500-level graduate courses during the first two terms of the student's program. These are in addition to the required 36 credit hours of courses at the 600 level. Courses at the 500 level, when required, must be completed prior to taking courses at the 600 level; however, some exceptions may be permitted by the program director. Students must earn a B or better in 500-level courses. Grades for 500-level courses are not included in the student's GPA. MCIS 501 is a prerequisite to MCIS 503.

MCIS 500 Assembly Language and Architecture  MCIS 502 Mathematics in Computing
MCIS 501 Java Programming Language  MCIS 503 Data Structures and Algorithms

The Curriculum for the M.S. in Computer Science
Core courses and electives are listed below. The student may substitute up to two electives in lieu of two core courses. Students who wish to take an additional elective in lieu of a core course must request approval from the program office prior to registration. If the thesis option is elected, two courses may be omitted. Plans for the thesis option must be made with the program office. A student wishing to register for CISC 691, Project in Computer Science, must first obtain the approval of the faculty member who would supervise the project.

Core Courses:
CISC 610 Programming Languages  Electives:
CISC 615 Design and Analysis of Algorithms  CISC 620 Modeling and Simulation
CISC 630 Compiler Design Theory  CISC 622 Numerical Analysis
CISC 640 Operating Systems Theory and Design  CISC 631 Language Theory and Automata
CISC 650 Data Communications Networks  CISC 632 Compiler Implementation
CISC 660 Database Management Systems  CISC 644 Operating Systems Implementation
CISC 665 Client–Server Computing  CISC 647 Advanced Computer Architecture
CISC 670 Artificial Intelligence  CISC 651 Project in Data Communications Networks
CISC 680 Software Engineering  CISC 654 Computer Security
CISC 681 Interactive Computer Graphics  CISC 661 Database Management Systems Implementation
CISC 683 Object-Oriented Design  CISC 663 Object-Oriented Database Systems
CISC 685 Human-Computer Interaction  CISC 682 Software Engineering Implementation

MCIS 688 Continuing Thesis in Computer Information Systems (1.5 credits)
Students who have not completed the thesis by the end of the second thesis registration must register for continuing thesis. This allows the student to receive faculty and administrative advice and support related to the thesis. Prerequisite: Completion of second thesis registration.

MCIS 691 Special Topics in Computer Information Systems (3 credits)
This seminar focuses on the professor's current research interests. Requires consent of course professor and program director.

MCIS 699 Master's Thesis in Computer Information Systems (3 credits)
The student develops a framework within which research will be conducted and offers evidence of qualifications to pursue the research. Concepts and theories underlying the student's thesis research are articulated, the problem is clearly stated, specific, measurable goals are specified, a literature review is presented, the methods of conducting research are delineated, and strategy to achieve the goal is given. Registration for MCIS 699 must be repeated for three more credits, for a total of six thesis credits. Prerequisite: Completion of eight courses.

CISC 691 Project in Computer Science  CISC 699 Master's Thesis in Computer Science
Course Descriptions for the M.S. in Computer Science

CISC 610 Programming Languages (3 credits)
Formal languages and language hierarchies, syntactic and semantic specification, abstract machines and corresponding languages, context-free languages, abstraction, modularity, and program structure. Fundamental programming language concepts. Analysis of imperative, object-oriented, and declarative language paradigms. Several programming languages will be analyzed.

CISC 615 Design and Analysis of Algorithms (3 credits)
Topics include sorting, algorithms for tree structures, dynamic programming, greedy methods, advanced data structures, divide and conquer, graph algorithms, arithmetic operations, algorithms for parallel computers, matrix operations, string/pattern matching, network problems, approximation algorithms, and NP-completeness.

CISC 620 Modeling and Simulation (3 credits)
Use of logical and mathematical models to represent and simulate events and processes as well as computer, information, and communications systems. Introduction to computer modeling techniques and discrete-event simulation. Model development and testing. Output and problem analysis. Application of techniques to a multiprocessor system model and an Ethernet model. Examination of development programs such as GPSS, SIMULA, and SIMSCRIPT.

CISC 622 Numerical Analysis (3 credits)
Introduction to error analysis, iterative methods, eigenvalue problems, integration and differentiation by computer, interpolation, and ill-conditioned problems.

CISC 630 Compiler Design Theory (3 credits)
Language theory will be applied to the design of a compiler for a high-level language. Parsing, syntax analysis, semantic analysis, and code generation. Other areas of the compilation process will be covered, such as storage allocation, symbol table management, searching and sorting, and optimization.

CISC 631 Language Theory and Automata (3 credits)
Introduction to formal grammars, Backus-Naur notation. The formal theory behind the design of a computer language is studied. The corresponding types of automata that may serve as recognizers and generators for a language will be described.

CISC 632 Compiler Implementation (3 credits)
Design, implementation, and testing of a compiler for a high-level language. The project will utilize state-of-the-art compiler generation tools, including parser generators and code-generator generators. Prerequisite: CISC 630.

CISC 640 Operating Systems Theory and Design (3 credits)
Analysis of computer operating systems with emphasis on structured design. Multiprogramming and multiprocessing, real time, time-sharing, networks, job control, scheduling, synchronization, and other forms of resource management, I/O programming, and memory and file system management.

CISC 644 Operating Systems Implementation (3 credits)
Implementation and testing of operating system designs. Prerequisite: CISC 640.

CISC 647 Advanced Computer Architecture (3 credits)
Organizational structures of computer systems and subsystems. Topics include processor organization, memory organization, virtual memory, microarchitecture, I/O controllers and processors, architectures for complex instruction set computers (CISC) and reduced instruction set computers (RISC), performance evaluation, multiprocessors, and parallel architectures.

CISC 650 Data Communications Networks (3 credits)
Concepts of communication protocols, network and protocol architectures, switching techniques, topology, internetworking, network design and analysis methods are covered. Detailed technical examination of network components, guided and unguided media, switching, and routing are conducted. Network architectural topics include software and conceptual models, error detection and prevention systems, transfer and routing protocols, congestion and flow control, and current and future applications.

CISC 651 Project in Data Communications Networks (3 credits)
Students pursue a project, research study, or implementation in data and computer communications. Prerequisite: CISC 650.

CISC 654 Computer Security (3 credits)
Theory and principles of information security and data protection. Topics include formal models for computer security, secure operating systems, mechanisms for mandatory and discretionary access controls, distributed secure system architectures, encryption and authentication, integrity models and mechanisms, secure protocols and vulnerability analysis.

CISC 660 Database Management Systems (3 credits)
Principles of database management systems. Topics include concepts of database architectures such as three-schema architectures, logical and physical data organizations, data models for database systems (network model, hierarchical model, relational model, and object-oriented model), relational algebra and calculus, query languages, design theory for relational databases, functional dependencies and normal forms, null values and partial information, semantic data modeling, transaction management and concurrency control, index schemas, file structures and access methods, query systems and query optimization, view management, client–server database architectures, distributed databases, object-oriented databases, logic-based databases, and the current research and development trends of database systems.

CISC 661 Database Management Systems Implementation (3 credits)
Techniques of database management will be applied to practical projects. Prerequisite: CISC 660.
CISC 663 Object-Oriented Database Systems (3 credits)
Object-oriented data models and other data models with semantic extensions such as functional data models, object-oriented database query model and languages, object-oriented database schema evolution and modification, version management and control, object data storage structure (clustering and indexing), query processing and transaction management, authorization mechanism and security, integrating object-oriented programming and databases, and applications of object-oriented databases. Prerequisite: CISC 660 or equivalent.

CISC 665 Client–Server Computing (3 credits)
This course presents the concepts and design of client-server and distributed systems. Protocols, inter-process communication principles, language issues, system architecture, concurrency, distributed resource management are among the topics discussed. The role of standards in client-server development and distributed systems is discussed, along with middleware, distributed objects, and applications.

CISC 670 Artificial Intelligence (3 credits)
Covers the theory and practice of artificial intelligence and knowledge-based expert systems. Topics discussed include knowledge representation and inference using predicate calculus, heuristic and adversarial search, genetic algorithms, machine learning, neural computing, reasoning under uncertainty, symbolic programming using Lisp, logic programming using Prolog, and expert systems. Development and implementation of algorithms for intelligent systems is emphasized. Examples from current application areas such as robotics, planning, machine vision, natural language processing, and intelligent agents are used to reinforce the concepts.

CISC 680 Software Engineering (3 credits)
The development of software-intensive systems; software quality factors; software engineering principles; system life-cycle models; requirements definition and analysis; behavioral specification; software design; implementation; software testing techniques; verification and validation; system evolution; software project management. This course is only for students in the computer science master's program.

CISC 681 Interactive Computer Graphics (3 credits)
Principles of interactive computer graphics. Concepts include fundamental raster operations, such as scan conversion, fill methods, and anti-aliasing; transformations; graphic languages, such as PHIGS and Open GL; projection; hidden surface removal methods; 3D modeling techniques; ray tracing; animation; and graphical user interfaces.

CISC 682 Software Engineering Implementation (3 credits)
Techniques of software engineering will be applied in projects. Prerequisite: CISC 680.

CISC 683 Object-Oriented Design (3 credits)
Principles and concepts of the object-oriented paradigm. Notation and techniques for the analysis, design, and implementation of object-oriented systems. Mechanisms for reuse, including composition, inheritance, design patterns, and application frameworks. Object-oriented programming.

CISC 685 Human-Computer Interaction (3 credits)
Provides a broad overview of human-computer interaction (HCI) as a sub-area of computer science and explores user-centered design approaches in computer systems applications. Focuses on the dynamics of HCI including addressing user interface and software design strategies, user experience levels, interaction styles, usability engineering, Web design principles, innovative interfaces including collaborative systems technology. Working model prototypes may be designed and tested. Students will perform formal software evaluations and usability tests.

CISC 688 Continuing Thesis in Computer Science (1.5 credits)
Students who have not completed the thesis by the end of the second thesis registration must register for continuing thesis. This allows the student to receive faculty and administrative advice and support related to the thesis. Prerequisite: Completion of second thesis registration.

CISC 690 Special Topics in Computer Science (3 credits)
This seminar focuses on the professor’s current research interests. Requires consent of course professor and program director.

CISC 691 Project in Computer Science (3 credits)
Students pursue a project, research study, or implementation under the supervision of a faculty member.

CISC 699 Master’s Thesis in Computer Science (3 credits)
The student develops a framework within which research will be conducted and offers evidence of qualifications to pursue the research. Concepts and theories underlying the student’s thesis research are articulated, the problem is clearly stated, specific, measurable goals are specified, a literature review is presented, the methods of conducting research are delineated, and strategy to achieve the goal is given. Registration for CISC 699 must be repeated for three more credits, for a total of six thesis credits. Prerequisite: Completion of eight courses.

Master of Science (M.S.) in Computing Technology in Education

This program offers a course of study leading to the master of science (M.S.) in computing technology in education. It is designed to meet the needs of working professionals such as teachers, educational administrators, and trainers working in either the public or the private sector. The program blends educational theory and practice into a learning experience that develops skills applicable to complex real-world problems. It enhances knowledge of how computers, software, and
other forms of high technology can be used to improve learning outcomes. The program’s online format offers full-time students the opportunity to earn the master’s degree in 12 months and working professionals the opportunity to earn the degree in 18 months while remaining in their current positions. Many of the courses in the program have been approved for teacher certification in computer science (grades K–12) or recertification by Florida’s Bureau of Teacher Certification. They may be taken as part of the degree program or independently. (Satisfactory completion of the master’s program does not guarantee that students will meet certificate requirements for their states.)

Program-Specific Admission Requirements (See pp. 2–3 for general admission requirements.)

The applicant must have an earned bachelor’s degree in a related field from a regionally accredited institution and extensive experience with computer applications and the World Wide Web.

The Curriculum for the M.S. in Computing Technology in Education

Core courses are listed below. If the thesis option is elected, two courses may be omitted. Plans for the thesis option must be made with the program office.

MCTE 615 The Internet  
MCTE 660 Multimedia Systems
MCTE 625 Survey of Courseware  
MCTE 661 Online Learning Environments
MCTE 628 Instructional Systems Design  
MCTE 670 Learning Theory and Computer Applications
MCTE 630 Database Systems  
MCTE 680 Human-Computer Interaction
MCTE 645 Integrated Applications  
MCTE 690 Research Methodology
MCTE 650 Computer Networks  
MCTE 691 Master’s Project in CTE

Course Descriptions for the M.S. in Computing Technology in Education

MCTE 615 The Internet (3 credits)
The Internet and online information systems associated with the evolving information superhighway. This course emphasizes the development of effective online skills so that bibliographic, full-text, graphical, and numerical information can be accessed in an efficient manner. It also addresses skills and approaches required to teach about the Internet.

MCTE 625 Survey of Courseware (3 credits)
State-of-the-art, content-rich courseware, across the grades, subjects, and platforms, will be explored and evaluated for educational value. Methods for integrating these programs into the curriculum will be discussed. Tutorials, drill and practice, instructional games, simulations, tests, and reference programs are included.

MCTE 628 Instructional Systems Design (3 credits)
This course develops practical instructional systems design competencies appropriate for the development of computer-assisted instruction applications. Students will experience both theory and best practices from the areas of education and training as they develop and acquire instructional systems design skills and knowledge.

MCTE 630 Database Systems (3 credits)
This course covers fundamentals of database architecture, database management systems, and database systems. Principles and methodologies of database design, and techniques for database application development.

MCTE 645 Integrated Applications (3 credits)
This course provides experience with the multiple roles of electronic spreadsheets, databases, and graphs in teaching, learning, and the management of instruction. Using an integrated software package, these tools will be used to develop and reinforce skills in organizing, problem solving, generalizing, predicting, decision making, and hypothesizing.

MCTE 650 Computer Networks (3 credits)
This course provides a framework for understanding computer network functionality, characteristics, and configurations. Topics include network topologies, protocols, and architectures; emerging trends in network technologies and services; and the role of ISDN (Integrated Services Digital Network) and ATM (Asynchronous Transfer Mode) in the educational environment. Strategies for network planning, implementation, management, and security. Recent advances in standardization, internetworking, and deployment of LANs (local area networks), MANs (metropolitan area networks), and WANs (wide area networks).

MCTE 660 Multimedia Systems (3 credits)
Introduction to multimedia systems. Recent advances and future trends in learning technology and educational computing are examined. Definition of terms and concepts related to multimedia. Trends in the development and the use of multimedia. Tools, techniques, and guidelines facilitating the planning, design, production, and implementation of multimedia products.

MCTE 661 Online Learning Environments (3 credits)
The course explores research trends in the area of online learning. Student will explore the requirements needed for successful online learning and teaching. Topics investigated may include the process of teaching and learning in an OLE, evaluating effective courseware and online communications technologies, integration of technology into OLEs, working with online classroom dynamics, addressing the needs of the online student, making the transition to online teaching, promoting the development of an online learning community, comparing Learning Management Systems (LMSs), and investigating emerging trends in e-learning and e-training in industry settings.
MCTE 670 Learning Theory and Computer Applications (3 credits)
Students will explore learning theories and how learning is achieved when instruction is presented from a computer-based paradigm. The course will emphasize the computer as a learning device that can be used in an effective manner to model learning theories associated with behaviorism, cognitivism, and human information processing.

MCTE 680 Human-Computer Interaction (3 credits)
Explores the field of human–computer interaction (HCI). Investigates the design and usability of educational-related technology. Explores how design practices are integrated with human factors, principles, and methods. Other issues explored may include user experience levels, interaction styles, usability engineering, Web design, and future research. Students will perform formal software evaluations and usability tests.

MCTE 688 Continuing Thesis in Computing Technology in Education (1.5 credits)
Students who have not completed the thesis by the end of the second thesis registration must register for continuing thesis. This allows the student to receive faculty and administrative advice and support related to the thesis. Prerequisite: Thesis registrations.

MCTE 690 Research Methodology (3 credits)
This course is an introduction to research, statistical analysis, and decision making. Close attention is paid to data types, data contributions, the identification of variables, and descriptive data presentation techniques. Students are introduced to both parametric and nonparametric data analysis procedures including independent and dependent sample t-tests, chi-square analysis, and simple analysis of variance. Hypothesis testing and the use of statistical software packages are emphasized.

MCTE 691 Master's Project in Computing Technology in Education (3 credits)
This course is the capstone of the program. Each student will develop a comprehensive technology-based project using an environment of choice. Its purpose is to allow students the opportunity to further pursue topics or areas in which they have considerable interest. Each project will be closely mentored by faculty.

MCTE 695 Special Topics in Computing Technology in Education (3 credits)
This seminar focuses on the professor's current research interests. Requires consent of course professor and program director.

MCTE 699 Master's Thesis in Computing Technology in Education (3 credits)
The student develops a framework within which research will be conducted and offers evidence of qualifications to pursue the research. Concepts and theories underlying the student's thesis research are articulated, the problem is clearly stated, specific, measurable goals are specified, a literature review is presented, the methods of conducting research are delineated, and strategy to achieve the goal is given. Registration for MCTE 699 must be repeated for three more credits, for a total of six thesis credits. Prerequisite: Completion of eight courses.

Master of Science (M.S.) in Management Information Systems
This program offers a course of study leading to the master of science (M.S.) in management information systems. It focuses on the application of information system concepts to the collection, retention, and dissemination of information for management planning and decision making. The program blends theory and practice into a learning experience that develops skills applicable to complex real-world problems. Its formats offer full-time students the opportunity to earn the master's degree in 12 months and working professionals the opportunity to earn the degree in 18 months while remaining in their current positions. As an option, the student may earn the M.S. in M.I.S. with a specialization in electronic commerce, which requires 39 credit hours (see curriculum below).

Program-Specific Admission Requirements (See pp. 2–3 for general admission requirements.)
This program is designed for students with undergraduate majors in management information systems, computer information systems, business administration, or a related field, and having knowledge and significant experience in computer applications. Experience with the Internet is preferred. Students who cannot demonstrate competence in programming in a high-level language such as C, C++, or Java must take MMIS 501 Introduction to Java Programming. This course is in addition to the required 36 credit hours at the 600 level. MMIS 501 must be completed prior to taking courses at the 600 level; however, some exceptions may be permitted by the program director. Students must earn a B or better in MMIS 501. Grades for 500-level courses are not included in the student's GPA.

The Curriculum for the M.S. in Management Information Systems
Core courses and electives are listed below. The student may substitute up to two electives for two core courses. Students who wish to take an additional elective in lieu of a core course must request approval from the program office prior to registration. If the thesis option is elected, two courses may be omitted. Plans for the thesis option must be made with the program office. A student wishing to register for MMIS 682, Project in Management Information Systems, must obtain the approval of the faculty member who would supervise the project.
Automated project management tools. Software maintenance and risk management. Students will analyze case studies and write a research paper.

Ethical quality. Inspections, walkthroughs, and reviews. Approaches to team organization. Documentation and configuration management.

The application of information system concepts to the collection, management, and the fit between the system and the organization.

Project Management (3 credits)
Issues such as personnel selection, budgeting, policy development, and organizational interfacing are discussed. Conceptual foundations and planning and development of management information systems. The role of MIS in an organization and the fit between the system and the organization.

MMIS 621 Information Systems Project Management (3 credits)
Practical examination of how projects can be managed from start to finish. Life-cycle models and paradigms. Life-cycle phases. Project planning and risk analysis. Project control including work breakdown structures, project scheduling, activities, and milestones. Software cost estimations techniques/models. Software quality assurance and metrics for software productivity and quality. Inspections, walkthroughs, and reviews. Approaches to team organization. Documentation and configuration management. Automated project management tools. Software maintenance. Procurement of software services and systems.

MMIS 623 Legal and Ethical Aspects of Computing (3 credits)
Building on a foundation in classical ethics, we examine the impact of the computer and the Internet on our society. Topics include: ethical decision making; professional codes; whistle-blowing; computer crime; copyrights, patents and intellectual property; privacy; and risk management. Students will analyze case studies and write a research paper.

Course Descriptions for the M.S. in Management Information Systems

MMIS 501 Introduction to Java Programming (3 credits)
This course is an introduction to the Java programming language. The course will include an introduction to the concepts of object-oriented programming and will show how Java supports this programming paradigm. You will learn about the Java environment and will write both applets (programs that execute in a Web browser) and applications (stand alone program). In addition to learning about basic language statements, you will also learn how Java provides support for such diverse applications as Web pages, multimedia, educational, etc.

MMIS 610 Survey of Computer Languages (3 credits)
A study of high-level languages, fourth-generation languages, and command languages used in the development of software for management information systems. The logical and physical structure of programs and data. Concepts of structured programming. Data structures, file management, and their use in problem solving. Students will complete a variety of high-level language computer programs.

MMIS 611 Computer Structures and Algorithms Using COBOL (3 credits)
Data and file structure concepts, data record format and file organization, sequential vs. random file access methods, tree-based file structure and search techniques, indexing and data clustering, multiway sort/merge and sort algorithms, input/output blocking and buffering. The student will design and implement programs in COBOL.

MMIS 615 Quantitative Methods (3 credits)
An introduction to the basic quantitative tools needed to support problem solving and decision making in the information systems environment. Heavy emphasis is placed on the application of these tools in a case-based, real-world environment.

MMIS 620 Management Information Systems (3 credits)
The application of information system concepts to the collection, retention, and dissemination of information for management planning and decision making. Issues such as personnel selection, budgeting, policy development, and organizational interfacing are discussed. Conceptual foundations and planning and development of management information systems. The role of MIS in an organization and the fit between the system and the organization.

MMIS 621 Information Systems Project Management (3 credits)
Practical examination of how projects can be managed from start to finish. Life-cycle models and paradigms. Life-cycle phases. Project planning and risk analysis. Project control including work breakdown structures, project scheduling, activities, and milestones. Software cost estimations techniques/models. Software quality assurance and metrics for software productivity and quality. Inspections, walkthroughs, and reviews. Approaches to team organization. Documentation and configuration management. Automated project management tools. Software maintenance. Procurement of software services and systems.

MMIS 623 Legal and Ethical Aspects of Computing (3 credits)
Building on a foundation in classical ethics, we examine the impact of the computer and the Internet on our society. Topics include: ethical decision making; professional codes; whistle-blowing; computer crime; copyrights, patents and intellectual property; privacy; and risk management. Students will analyze case studies and write a research paper.

MMIS 652 Computer Security

MMIS 653 Telecommunications and Computer Networking

MMIS 654 Electronic Commerce on the Internet

MMIS 660 Systems Analysis and Design

MMIS 661 Object-Oriented Applications

MMIS 671 Decision Support Systems

MMIS 680 Human-Computer Interaction

MMIS 681 Computer Graphics

MMIS 685 Computer Software Engineering

MMIS 687 Human-Computer Interaction

MMIS 691 Special Topics in MIS

MMIS 699 Master's Thesis in MIS

MMIS 655 Electronic Commerce Applications

MMIS 656 Web Design Technologies

MMIS 657 Electronic Commerce Applications Software

MMIS 658 Electronic Commerce Project

MMIS 660 Systems Analysis and Design

MMIS 662 Database Systems

MMIS 663 Client-Server and Distributed Computing

MMIS 664 Data Warehousing

MMIS 665 Database and Transaction Processing

MMIS 666 Professional Issues in MIS

MMIS 668 Continuing Thesis in MIS

MMIS 670 Artificial Intelligence and Expert Systems

MMIS 671 Decision Support Systems

MMIS 677 Database Systems

MMIS 680Human-Computer Interaction

MMIS 685 Telecommunications and Computer Networking

MMIS 688 Project in Management Information Systems

MMIS 689 Special Topics in MIS

MMIS 699 Master's Thesis in MIS
MMIS 625 Computer Graphics (3 credits)
Principles and concepts of computer graphics useful to information managers. Topics include an introduction to raster graphics, concepts of 2-D and 3-D graphics, modeling, rendering, graphic file formats, color, graphical user interfaces and virtual reality, and the graphical presentation of information.

MMIS 626 Client–Server and Distributed Computing (3 credits)
Included in this course are a wide range of issues, methods, techniques, and case examples for developing and managing client–server and distributed systems. These include client–server development using RAD methodologies, transaction process monitors, types of aboveware and middleware, middleware standards (DCE, RPC, and CORBA), managing client–server environments, software installation and distribution, electronic mail architectures in client–server systems, evaluation of vendor strategies, issues in selecting client–server products, legacy system migration issues, interoperability, scalability, network and security concerns, the emerging desktop standards, the role of network computers and thin clients, and the emergence of the Web as an extension of the client–server environment.

MMIS 630 Database Systems (3 credits)
The application of database concepts to management information systems. Design objectives, methods, costs, and benefits associated with the use of a database management system. Tools and techniques for the management of large amounts of data. Database design, performance, and administration. File organization and access methods. The architectures of database systems, data models for database systems (network, hierarchical, relational, and object-oriented model), client–server database applications, distributed databases, and object-oriented databases.

MMIS 631 Database Systems Project (3 credits)
The techniques of database management systems will be applied to practical projects. Prerequisite: MMIS 630.

MMIS 640 System Test and Evaluation (3 credits)
An analysis of the verification and validation process. Methods, procedures, and techniques for integration and acceptance testing. Reliability measurement. Goals for testing. Testing in the small and testing in the large. Allocation of testing resources. When to stop testing. Test case design methods. Black box software testing techniques including equivalence partitioning, boundary-value analysis, cause-effect graphing, and error guessing. White box software testing techniques including statement coverage criterion, edge coverage criterion, condition coverage criterion, and path coverage criterion. Test of concurrent and real-time systems.

MMIS 642 Data Warehousing (3 credits)
This course includes the various factors involved in developing data warehouses and data marts: planning, design, implementation, and evaluation; review of vendor data warehouse products; cases involving contemporary implementations in business, government, and industry; techniques for maximizing effectiveness through OLAP and data mining.

MMIS 652 Computer Security (3 credits)
Concepts and principles of system and data security. Risk assessment, evaluation of vulnerabilities, policy formation, control and protection methods. Review and evaluation of security models. Issues in physical, system, network, database and application security. Protection methods of encryption, authentication technologies, and access control are used to examine host-based and network-based security issues. Management of security, policy formulation, security personnel and issues of law and legal protection of privacy. System design and network design for security and techniques for combating security breaches.

MMIS 653 Telecommunications and Computer Networking (3 credits)
This course provides a framework for understanding telecommunications fundamentals and computer network functionality, characteristics, and configurations. Topics include wire-free and wire-based communications; network topologies, protocols, and architectures; emerging trends in network technologies and services; and the role of ISDN (Integrated Services Digital Network) and ATM (Asynchronous Transfer Mode) in the corporate environment. Strategies for network planning, implementation, and management are introduced. Recent advances in standardization, internetworking, and deployment of LANs (local area networks), MANs (metropolitan area networks), and WANs (wide area networks) are examined.

MMIS 654 Electronic Commerce on the Internet (3 credits)
The combination of the computer and the Internet have created an incredible "market space". We will examine the foundation, operation and implications of the Internet economy. Topics include Internet technologies, online market mechanisms, interactive customers, knowledge-based products, smart physical products and services, pricing in the internet economy, online auctions and e-marketplaces, digital governance, policies for the internet economy and an outlook for the new economy. Students will participate in an Internet shopping experience, analyze a company that focuses on e-commerce and write a research paper.

MMIS 655 Electronic Commerce Applications (3 credits)
This course describes the components necessary to implement EDI. It considers the use of eCommerce by small and medium enterprises (SMEs) as well as by governments and community groups. Topics covered include: traditional electronic payment systems, Internet-based payment systems, virtual organizations, virtual communities, electronic markets, call centers, electronic service delivery, eCommerce use by government, and eCommerce use by small business.

MMIS 656 Web Design Technologies (3 credits)
Topics include: aligning electronic business models with Web site designs, planning a Web site, understanding the principles and elements of effective Web site design, using Web development and design tools, and evaluating Web site effectiveness.
The student develops a framework within which research will be conducted and offers evidence of qualifications to pursue the goal. Registration for MMIS 699 must be repeated for three more credits, for a total of six thesis credits.

This seminar focuses on the professor’s current research interests. Requires consent of course professor and program director.

Students who have not completed the thesis by the end of the second thesis registration must register for continuing thesis. This allows the student to receive faculty and administrative advice and support related to the thesis. Prerequisite: Completion of second thesis registration.

This project course integrates all the knowledge accumulated through the previous courses. The class focuses on best practices as demonstrated through case studies. Working in teams, students develop a comprehensive electronic commerce system. Students may enroll in this class only after completing all of the electronic commerce specialization courses.

MMIS 658 Electronic Commerce Project (3 credits)

This course examines application software for business-to-business and business-to-consumer e-commerce. Studied are several e-commerce application software tools, and transaction processing software tools specific to business-to-business transaction exchange, Electronic Data Interchange (EDI) and Electronic Funds Transfer (EFT).

MMIS 659 Master’s Thesis in Management Information Systems (3 credits)

The student develops a framework within which research will be conducted and offers evidence of qualifications to pursue the research. Concepts and theories underlying the student’s thesis research are articulated, the problem is clearly stated, specific, measurable goals are specified, a literature review is presented, the methods of conducting research are delineated, and strategy to achieve the goal is given. Registration for MMIS 699 must be repeated for three more credits, for a total of six thesis credits. Prerequisite: Completion of eight courses.
Faculty and Staff of the Graduate School of Computer and Information Sciences

The Faculty

James Cannady, Ph.D., Nova Southeastern University. Assistant Professor. Information security, artificial neural networks, distributed computing, machine learning, artificial intelligence.

Maxine S. Cohen, Ph.D., State University of New York at Binghamton. Associate Professor. Human-computer interaction, multimedia, usability engineering, human factors, database systems, distance education.

Laurie P. Dringus, Ph.D., Nova Southeastern University. Professor. Human-computer interaction, group support systems, usability engineering, online learning environments, learning theory, distance learning.

Timothy J. Ellis, Ph.D., Nova Southeastern University. Assistant Professor. Multimedia design and application, application of database technology to education, online learning environments, adult education.

George K. Fornshell, Ph.D., Nova Southeastern University. Associate Professor. Instructional design, instructional technology, instructional video, streaming media, distance learning, multimedia, authoring tools, human factors.

William L. Hafner, Ph.D., Nova Southeastern University. Assistant Professor. Information storage and retrieval, data warehousing, knowledge management, artificial intelligence, co-operation in computing, group and decision support systems, computer security.

William M. Hartman, Ph.D., Nova Southeastern University. Lecturer. Software engineering, data communications, computer networks, decision support systems, mathematics in computing.

Michael J. Laszlo, Ph.D., Princeton University. Professor. Computer graphics, data structures and algorithms, software engineering, programming.

Jacques Lévin, Ph.D., University of Grenoble. Professor. Database management, modeling, distance education, decision support systems, numerical analysis.

Edward Lieblein, Ph.D., University of Pennsylvania. Professor and Dean. Software engineering, object-oriented design, programming languages, automata theory.

Frank Mitropoulos, M.S., Nova Southeastern University. Instructor. Programming languages, data structures, software engineering, object-oriented design, C, C++, Java.

Sumitra Mukherjee, Ph.D., Carnegie Mellon University. Associate Professor. Artificial intelligence, decision support systems, knowledge-based expert systems, database security, database management, economics of information systems.

Easwar Nyshadham, Ph.D., University of Mississippi. Assistant Professor. Electronic commerce, decision support systems, security, privacy and trust in online environments, economics of information systems.

Greg Simco, Ph.D., Nova Southeastern University. Assistant Professor. Operating systems, data communications, computer networks, client-server computing, distributed systems, systems performance evaluation.

Jinping Sun, Ph.D., Wayne State University. Associate Professor. Database management systems, data warehousing, knowledge discovery and data mining.

Visiting and Adjunct Faculty

Ray Albert, Ph.D. Phyllis Chasser, Ph.D. Patricia Deubel, Ph.D. Andre Folleco, Ph.D.
Lee Leitner, Ph.D. Robert Lipton, Ph.D. Richard Manning, Ph.D. Ronald McFarland, Ph.D.
Terry McQueen, D.B.A. David Metcalf II, Ph.D. Margaret Thombs, Ph.D. Steven Zink, Ph.D.

Teaching Assistants

Mohamad Foustok, M.S. Ellen Scalese, M.Ed.

The faculty and administration of the Graduate School of Computer and Information Sciences (SCIS) are pleased that you have chosen to apply for admission. The admissions application should be accompanied by a $50 application fee (make checks payable to Nova Southeastern University).

Admission decisions are made on a rolling basis. To ensure evaluation for the desired starting term, reviewable applications must be received at least one month prior to the start of that term. Late applications that cannot be processed in time for the desired starting term will be considered for the next available term. Applicants may be granted provisional admission status pending completion of the application process.

To ensure that your application is complete, please use the checklist below and follow the detailed instructions provided for each item. Degree-seeking applicants must attend to items 1 through 7. If you are not pursuing a degree from the Graduate School of Computer and Information Sciences but wish to take courses as a non-degree student you must attend to the items marked with an asterisk (*).

1. Application Form*
2. Application Fee or Reinstatement Fee*
3. Essay
4. Summary of Professional Experience or GRE Scores
5. Three Evaluation Forms
6. Transcript Request Form(s)*
7. Request for Computer Account Form*

Please mail items 1 through 4 and item 7 to:

Office of Admissions
Graduate School of Computer and Information Sciences
Nova Southeastern University
6100 Griffin Road
Fort Lauderdale, FL 33314-4416

For items 5 and 6, please follow the mailing instructions specified in the forms.

If you have any questions about the admissions process you may contact the Office of Admissions at (954) 262-2000 or toll free at 800-986-2247, or send email to scisinfo@nova.edu.

CITIZENSHIP STATUS:  

☐ U.S. Citizen  ☐ Resident Alien  ☐ Nonresident Alien

Do you require an I-20?  

☐ YES  ☐ NO  

If you have a visa, indicate status code: _______________________

Country of Citizenship: ______________________ (Additional procedures are required for nonresident aliens.)

Is English your primary language?  

☐ YES  ☐ NO  

(If no, a TOEFL score of 550 or higher is needed.)

FINANCIAL AID:  

Have you filed for Financial Aid?  

☐ YES  ☐ NO

Have you filed a Free Application for Federal Student Aid (FAFSA)?  

☐ YES  ☐ NO

If yes, when was the FAFSA mailed? ___________  

Are you eligible for VA benefits?  

☐ YES  ☐ NO

COMPUTER EXPERIENCE:

How would you rate your overall computer ability:  

Please circle:  0  1  2  3  4  5

0 = No experience  3 = Ability to use standard applications software  5 = Very Experienced

Are you able to upload and download files via the Internet?  

☐ YES  ☐ NO

What programming languages can you use with a high degree of proficiency? (Please use a separate sheet, if necessary, to explain your experience with these languages.)

What application programs can you use with a high degree of proficiency?
HOW DID YOU FIRST HEAR ABOUT THIS PROGRAM? Please check appropriate box.

ESSAY
(Please use separate sheets)

The content of your essay, as well as the quality of your writing, will be evaluated by the Admissions Committee. The essay should contain a minimum of 500 words but should not exceed two pages of single-spaced text. You should discuss your reasons for pursuing this degree, why you decided to apply to the Graduate School of Computer and Information Sciences at Nova Southeastern University, the nature of your work, your long-term goals, and any other topics you wish to bring to the attention of the Admissions Committee.

Certification of Authorship of Essay

(Attach this form to the essay.)

Applicant's Name: ____________________________

Date: ____________________________

Certification of Authorship: I hereby certify that I am the author of this essay and that any assistance I received in its preparation is fully acknowledged and disclosed in this document. I have also cited all sources from which I obtained data, ideas, or words that are copied directly or paraphrased in the document. Sources are properly credited according to accepted standards for professional publications.

Applicant's Signature: ____________________________
SUMMARY OF PROFESSIONAL EXPERIENCE (or GRE Scores)

Please submit a Summary of Professional Experience or GRE scores. These will be evaluated thoroughly to determine, in part, your potential ability to succeed in graduate studies. The Summary of Professional Experience is a special type of resume designed to highlight the skills and knowledge you have gained through your professional career. The importance of detail and completeness in the preparation of this summary cannot be underestimated.

The following areas should be included in the Summary of Professional Experience:

1. **Employment history** (specific job titles and dates). Include all relevant work experience including job descriptions and responsibilities.

2. **Experience with computer systems.** List relevant computer-based work experiences with operating systems, software, hardware computer languages, teleconferencing, multimedia, and video. Describe the nature and length of experiences.

3. **Workshops, seminars, conferences, and special meetings attended** (list topics). Technical education course work should be fully documented. You may include course descriptions to support relevance of courses you have taken. Provide a detailed description of the learning activities that you have participated in at conferences.

4. **Publications, proposals, and reports you have authored.** Writing is a critical success factor in graduate work. Your Summary of Professional Experience should be used to highlight your writing abilities and scholarship potential. Where appropriate, provide a detailed list covering the following areas (titles, dates, coauthors, and publishers should be listed):
   - Grants
   - Professional Publications
   - Proposals
   - Reports
   - Other

5. **Technology accomplishments of significance.** Provide detailed descriptions of your roles and contributions.

6. **Awards, achievements, or special recognition you have received.** Provide a list.

7. **Membership and offices held in professional organizations.** Identify special roles and functions you may have performed.

While the above areas are specific, you should tailor the contents of each section to support your acceptance into the SCIS program of your intent. Special attention should be given to your strengths. Your goal is to provide the most effective materials that prove you have an adequate background to enter and succeed in the specialization area in which you are seeking your master's degree.
Graduate School of Computer and Information Sciences
Nova Southeastern University

EVALUATION FORM
(Please photocopy this form as necessary)

TO THE APPLICANT: Please send this form to individuals who are familiar with your academic and/or professional capabilities and are able to assess your intellectual abilities, maturity, and motivation. Forms from family members or individuals who are unable to evaluate your academic or professional background are unacceptable. The evaluator must fill out the form. Letters may be provided but they must be supplemental to the form.

TYPE OR PRINT THE FOLLOWING INFORMATION:

Applicant’s Name: ____________________________  SS#: ___________ - ___________

Last Name: ____________________________  First Name: ____________________________  MI: ________

Mailing Address: ____________________________________________________________

City: ____________  State: ____________  ZIP: ____________  Country: ____________

Present Occupation: ____________________________  Employer/Institution: ____________________________

Degree Sought: ____________________________  Program: ____________________________

Expected Date of Entry: ____________________________

NAME AND TITLE OF EVALUATOR:

__________________________________________

Family Educational Rights and Privacy Act (Buckley Amendment)
Under the provisions of this act, you have the right, if you enroll at Nova Southeastern University, to review your educational records. The act further provides that you may waive your right to see recommendations for admission. Please indicate below by checking the appropriate phrase and signing your name whether or not you wish to waive that right.

I WAIVE ____ or DO NOT WAIVE ____ any right that I have to this recommendation.

Applicant’s Signature: ____________________________________  Date: ____________

__________________________________________
TO THE EVALUATOR: The person named on the previous page has applied for admission to a master’s degree program at the Graduate School of Computer and Information Sciences, Nova Southeastern University. You are being asked to evaluate his/her potential for success in this program. Please complete the following form. Letters may be provided but they must be supplemental to the form.

1. How long have you known the applicant and in what capacity? (Give dates, if possible.)

________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________________ TRANSCRIPT REQUEST FORM
(Please photocopy this form as necessary)

TO THE APPLICANT: It is important that transcript requests are sent to your previous school(s) in a timely fashion in order to aid in the admission process. Fill in the blanks on both parts of the form. It is suggested that you call your previous school(s) to find out if a fee should accompany this transcript request form. Mail the entire form and any fee required to your previous school(s).

TO PREVIOUS SCHOOL/COLLEGE:
Please send an official transcript of my academic work while attending your institution to the Graduate School of Computer and Information Sciences at Nova Southeastern University.

A. I attended your institution from _____________ to _____________

B. While in attendance, my name was:

Last First MI Maiden

C. My student identification number was: _______________________

________________________
Signature

---

PREVIOUS SCHOOL: PLEASE RETURN THIS FORM WITH TRANSCRIPT. THANK YOU.

Nova Southeastern University

COMPUTING ACCOUNT SECURITY AGREEMENT

Nova Southeastern University has adopted rules for computing. The following rules outline your responsibilities for securing your computing account. This is not, however, a comprehensive list of all online policies, procedures, and responsibilities. Consult the NSU Policy Regarding Use of Computers and Network Systems. If you misuse your account, these privileges may be withheld. You must read and agree to abide by this agreement by signing your account request form before your account can be activated.

Your computer account is to be used only by you. Do not share your account with other individuals. The password to your account must be kept secure. Make sure you commit your password to memory. You may change your password at any time with the passwd command. Always choose a password that is difficult to guess. Your password should conform to the following rules:

- It must be eight characters in length.
- It must not be any word that may be found in a dictionary.

Choose a password that is meaningful to you but not obvious to anyone else. Examples of acceptable passwords are: 29py94ju, x#jk*azd, 1 xx%bcd.

NSU computer systems will automatically monitor your password on a regular basis. If your password is “guessed” by the system, you will be sent electronic mail indicating that this has happened. If this occurs, change your password immediately to prevent anyone from tampering with your account.

It is your responsibility to make backups of your files on your own computer. NSU is not responsible for the loss of your computer files.

There are no specific limits to online time; however, you are encouraged to use your online time wisely in order to conserve resources. Online time that has been excessive and/or used for unauthorized purposes can result in a charge to you.

If you do not access your account for a period of one year, your account will be reviewed and may be deactivated. You must contact your account coordinator to request reactivation of your account.

If you have trouble accessing your account or forget your password, please contact your account coordinator. He/she can facilitate any changes needed to get you working again.
Policy on Acceptable Use of Computing Resources

This policy provides guidelines for the appropriate and inappropriate use of the computing resources of Nova Southeastern University. It applies to all users of the university's computing resources, including students, faculty members, staff, alumni, and guests of the university. Computing resources include all computers, related equipment, software, data, and local area networks for which the university is responsible, as well as networks throughout the world to which the university provides computer access.

The computing resources of Nova Southeastern University are intended to be used for its programs of instruction and research and to conduct the legitimate business of the university. All users must have proper authorization for the use of the university's computing resources. Users are responsible for seeing that these computing resources are used in an effective, ethical, and legal manner. Users must apply standards of normal academic and professional ethics and considerate conduct to their use of the university's computing resources. Users must be aware of the legal and moral responsibility for ethical conduct in the use of computing resources. Users have a responsibility not to abuse the network and resources, and to respect the privacy, copyrights, and intellectual property rights of others.

In addition to the policy contained herein, usage must be in accordance with applicable university policies (see "Related Policies" listed elsewhere in this policy) and applicable state and federal laws. Among the more important laws are the Florida Computer Crimes Act, the Federal Computer Abuse Amendment Act 1994, the Federal Electronic Communications Privacy Act, and the U.S. Copyright Act. Copies of these laws and the NSU copyright policy may be examined in the Office of Academic Affairs.

Policy violations generally fall into five categories that involve the use of computing resources:

1. for purposes other than the university's programs of instruction and research and the legitimate business of the university
2. to harass, threaten, or otherwise cause harm to specific individuals or classes of individuals
3. to impede, interfere with, impair, or otherwise cause harm to the activities of others
4. to download, post, or install to university computers, or transport across university networks, material that is illegal, proprietary, in violation of license agreements, in violation of copyrights, in violation of university contracts, or otherwise damaging to the institution
5. to recklessly or maliciously interfere with or damage computer or network resources or computer data, files, or other information

Examples (not a comprehensive list) of policy violations related to the above five categories include:

- using computer resources for personal reasons
- sending email on matters not concerning the legitimate business of the university
- sending an individual or group repeated and unwanted (harassing) email or using email to threaten someone
- accessing, or attempting to access, another individual's data or information without proper authorization (e.g., using another's computing account and password to look at his/her personal information)
- propagating electronic chain mail, pyramid schemes, or sending forged or falsified email
- obtaining, possessing, using, or attempting to use someone else's password, regardless of how the password was obtained
• copying a graphical image from a Web site without permission
• posting a university site-licensed program to a public bulletin board
• using illegally obtained licensed data/software, or using licensed data/software in violation of its license or purchase agreement
• releasing a virus, worm, or other program that damages or otherwise harms a system or network
• preventing others from accessing services
• attempting to tamper with or obstruct the operation of NSU's computer systems or networks
• using or attempting to use NSU's computer systems or networks as a means for the unauthorized access to computer systems or networks outside the university
• viewing, distributing, downloading, posting, or transporting child, or any, pornography via the Web, including sexually explicit material for personal use that is not required for educational purposes
• using university resources for unauthorized purposes (e.g., using personal computers connected to the campus network to set up Web servers for illegal, commercial, or profit-making purposes)
• violating federal copyright laws or the NSU copyright policy

Inappropriate conduct and violations of this policy will be addressed by the appropriate procedures and agents (e.g., the Office of the Dean, the Office of the Vice President for Academic Affairs, or the Office of Human Resources) depending on the individual's affiliation to the university. In cases where a user violates any of the terms of this policy, the university may, in addition to other remedies, temporarily or permanently deny access to any and all NSU computing resources, and appropriate disciplinary actions may be taken, up to and including dismissal.

Policy on the Use of Material in Web Pages

You should assume that materials you find on the Web are copyrighted unless a disclaimer or waiver is expressly stated. You may not place any materials owned by others, i.e., copyrighted works, on your Web page(s) without the expressed permission of the copyright owner. (Examples: graphic images from other Web pages, articles, video, audio, photographs, software, or images scanned from published works.) You may include short quotations of text, provided you identify in an obvious way (e.g., in a footnote) the author and the work from which the quotation is taken. If you want to include something from another Web page in one of your Web pages, then link to it rather than copy it. The occurrence of plagiarism on your Web page is subject to the same sanctions that apply to plagiarism in any other media. Images in the NSU graphics repository may be used on Web pages without permission. Clip art images provided with licensed software may be used if permitted in the license agreement for such software. You may not place any pictures or videos of people on a Web page without the expressed permission of the people in the picture or video. Every person has a right to privacy, which includes the right to restrict the use of his/her own image. In addition, the picture or video may be protected by copyright.

If you have received formal permission to use material owned by another, place the following notice on the page that contains the copied material:

Copyright <year of copyright> by <name of the copyright owner>. Used with permission.

Although a copyright notice is not required to assert your rights to your own original material, you may want to include a minimal notice of copyright in a Web page footer when appropriate. When used, the copyright notice should appear as follows*:

Individual Web pages*:
Copyright <year of copyright> <your name>. All Rights Reserved.

Organization Web pages (examples):
Copyright © 2000 Cornell Law Review. All Rights Reserved.
Copyright 1997 Nova Southeastern University. All Rights Reserved.
© 1999 Graduate School of Computer and Information Sciences. All Rights Reserved.

Related policies that also apply to Web pages are as follows:

1. General Policies:
   Policy on Acceptable use of Computing Resources
   Copyright and Patent Policy
   Computing Account Security Agreement

2. Student-related: Student Code of Conduct and Academic Integrity (in SCIS Graduate Catalog)

3. Faculty/Administrator-related: Faculty/Academic Administrator Policy Manual

4. Staff-related: The NSU Employee Handbook

*The symbol © may be used in lieu of "copyright" or immediately after it.
What are my computer requirements?

You must have an active account with an Internet Service Provider (ISP). Students may use either a IBM-compatible PC or Apple/Macintosh computer for their online studies. The following are minimum computer system requirements:

**IBM-compatible PC:**
- Pentium 200 MMX processor or higher, Pentium III/4 processor recommended
- 64 Megabytes of RAM (or higher)
- Floppy/CD-ROM/hard drive
- SVGA (1024 x 768) or higher display
- Full Duplex Sound card with speakers/headphones and microphone
- Windows 95 or higher, Windows NT 4 or higher
- 28.8kb Modem (or faster) internet connection through an account on an ISP (Internet Service Provider), or a network connection to the Internet

**Macintosh:**
- PowerPC 120Mhz processor or higher, G3/4 processor recommended
- 64 Megabytes of RAM (or higher)
- Floppy/CD-ROM/hard drive
- 1024 x 768 or higher display resolution, thousands of colors
- Full Duplex Sound with a microphone
- System 8.0 or higher operating system
- 28.8kb Modem (or faster) internet connection through an account on an ISP (Internet Service Provider) or a network connection to the Internet

**Software:**
- Netscape 4.04 or higher, or Microsoft Internet Explorer 4.0 or higher
- Suggested: Microsoft Office 97 (or higher)

**PLEASE NOTE:**

Proprietary browser versions (those not downloaded directly from Netscape or Microsoft) may not work reliably with SCIS online systems.

If you use other "office" type programs, please some professors may require you to convert your files to a MS-Office compatible format for online submission.

Your connection to the internet must **not** initiate from behind a **firewall**.
NOTICE OF NONDISCRIMINATION
Nova Southeastern University admits students of any race, color, sex, age, nondisqualifying disability, religion or creed, or national or ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the school, and does not discriminate in administration of its educational policies, admissions policies, scholarship and loan programs, and athletic and other school-administered programs.

The official catalog of the Graduate School of Computer and Information Sciences is the governing document for all program-related information. The catalog is posted on the school's Web site: www.scis.nova.edu. Nonacademic policies and procedures are contained in the NSU/SCIS Student Handbook, which may be downloaded from the school's Web site. If there is any conflict between the information contained in the catalog and that contained in this brochure or any other document, the information in the catalog prevails. Policies, regulations, and requirements, including fees, are necessarily subject to change without notice at any time at the discretion of the Nova Southeastern University administration. Adequate notice of anticipated changes will be given to the student, whenever possible. The university reserves the right for any reason to cancel or modify any course or program listed herein. In addition, individual course offerings may vary from year to year as circumstances dictate.

Nova Southeastern University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (1866 Southern Lane, Decatur, Georgia 30033-4097: Telephone number 404-679-4501) to award bachelor's, master's, educational specialist, and doctoral degrees. The master of science curricula for computer science and computer information systems follow the guidelines of the Association for Computing Machinery (ACM).
