FOURTH ANNUAL GOLD KEY DINNER SET FOR DECEMBER 2

DINNER SPEAKER

Hilary J. Sandoval, Jr. Administrator of the Small Business Administration, Washington, D.C., To Be Guest of Honor and Principal Speaker

The Administrator of the Small Business Administration of the United States Government, Hilary J. Sandoval, Jr., of El Paso, Texas, will be the guest of honor and principal speaker at the annual gourmet dinner of GOLD KEY of Nova University on Tuesday, December 2, atop the Sheraton Hotel on Fort Lauderdale beach, GOLD KEY President Cy Young announced today.

President Nixon nominated Sandoval on February 20 of this year, and he was confirmed by the Senate Banking and Currency Committee on March 4 and took the oath of office the next day, according to Mr. Young.

Sandoval is knowledgeable on all the Small Business Administration programs and objectives. Prior to his appointment he served the Small Business Administration as a member of the Lubbock, Texas Advisory Council.

He headed, as President, the Sandoval News Service, Inc., and engaged in the wholesale distribution of magazines, newspapers, and books, a business established in 1919 by his father. He also directed KINT Radio, El Paso and was Vice President of KPAR of Albuquerque.

He holds a rank of Captain in the U.S. Army Reserves. He served as a U.S. Intelligence Agent, Counter-intelligence Corps, in the Caribbean.

In 1967 he was Area Coordinator for the International Executive Service Corps, supplying technical aid to overseas private concerns.

IMPACT OF 1968-69 EVENTS REVEALED IN ALL-IMPORTANT PRESIDENTIAL ANNUAL REPORT

Nova University values highly its GOLD KEY organization. So, to keep members abreast of fast-breaking developments, President Winstead has permitted the Novacrat to quote from his Annual Report in advance of its formal printing.

The year 1968-1969, the second year with students, was one of decision. (Continued on page 2)
PRINCIPAL SPEAKER (Continued)

Mr. Sandoval served as president of the El Paso Sales and Marketing Executives International and of the Mid-American Periodicals Distributors Association; was co-chairman of the Bureau of Independent Publishers and Distributors and was president of the League of United Latin American Citizens.

He was a director of the Rotary Club of El Paso and is a member of the El Paso Chamber of Commerce.

He received a BA degree from the University of Arizona and attended the Universidad de Mexico and Texas Technological College, majoring in liberal arts.

He was "Sales Executive of the Year" of SME-International-El Paso.

Sandoval was honored by the Air Force Association in 1968 when he was chosen Texas State "Man of the Year."

President Young, the GOLD KEY Directors, Trustees and officers of the University will act as hosts at this most important of all GOLD KEY gatherings.

1968-69 IMPACT (Continued)

A self-supporting program in the Life Sciences was added. It is developed around the Germ Free Life Research Center in Tampa, supported by the National Cancer Institute.

Several programs, unproductive, were phased out in the Physical Sciences.

The Administration consolidated activities at East Las Olas Boulevard on campus, and phased out the development office, to sharply reduce administrative costs.

When the Vice President for Administration resigned, his duties were placed under the President’s Office.

Consolidation

Activities on East Las Olas Boulevard were consolidated into the Parker Building with a concurrent saving in secretarial and clerical personnel. The entire Las Olas property was converted into an income-producing rental facility.

Major emphasis was placed on a fund-raising campaign to begin in December in Fort Lauderdale to place the University on a self-sustaining basis; and to construct needed facilities in Port Everglades for the growing oceanographic group, as well as facilities for the new Cancer Institute in the Parker Building.

The University lost two key people in the Development Department, William Calkins, Director of University Relations, died in November, and Robert Loberfeld, Campaign Director, in December. Duval S. Adams, Assistant to the President, and James McCraken, Comptroller, left the University in March. James H. Brodhead is the new Assistant to the President and Arthur Karel our new Comptroller. Mr. Karel is the first in this position with prior experience as a Comptroller.

To Remain Private

The campaign, which began with $150,000 in pledges in December, gained support with the appointment of GOLD KEY member Stanley Emerson as Chairman.

However, when a proposal was received from the President of Florida State University to make the Nova University campus part of the State system, and the graduate arm of Florida State University in South Florida, rumors of negotiations brought the fund campaign to a standstill. Additional inquiries from other institutions in and out of Florida took more time and added to the confusion. The University found itself in a critical financial situation. This problem is presently being resolved with the decision of the Trustees to remain a private independent, and locally controlled institution, and the decision to add several more broadly based and community oriented programs.

Important News

In November, the University was voted to candidacy by the Southern Association of Colleges and Schools, giving it all the prerogatives of accreditation until it has granted its first degree, at which time the committee will return for another evaluation.

Leo Goodwin, Sr.

Through the kindness of Leo Goodwin, Sr., who made available stock as security for loans, the University was able to proceed in December with construction on the third floor of the Parker Building on the Davie campus to accommodate the Cancer Institute.

The Formans

The pledge by Charles and Hamilton Forman enabled the University to prepare the site in Port Everglades so that Oceanographic facilities, now crammed in the Lauderdale Marina, may move to the Port.

Mailman Guarantees

Through guarantees by A.L. Mailman to raise the remaining funds in the Hollywood campaign, the Federal Government agreed to permit the University contracts for the construction of the Hollywood Education
This campaign, in excess of $1 million with a $552,000 Federal Grant, will provide 50,000 square feet of space on campus and will be ready February, 1970.

Three dormitory units were completed in October, bringing the total on-campus facilities to five buildings, with a sixth under construction.

An intensive reassessment of goals, purposes and directions of the University has led to conclusions which, it is planned, will be implemented next year.

**Moving Closer To Community**

Authorization for new programs in Education and Business Administration to bring the University closer to the local community are planned.

**Human Development**

The addition of a self-supporting institute of human development to provide treatment of children with educational and emotional problems, as well as for families with normal children seeking guidance and counseling, is under consideration.

**Supporting Local Industry**

Also under consideration are non-degree courses in technical areas where we have an in-house instructional capability to support local industry and a possible upper division undergraduate program.

Preferably these would be in cooperation with another institution which would provide the link between publicly-supported educational activities on campus and the University.

Also under consideration is the development of a private University laboratory school which would complement the present publicly-supported experimental Nova Elementary and Secondary schools within the South Florida Education Center complex.

**Financial Program**

A financial program is being implemented to enable the University to move forward without dependence upon major local contributions for day-to-day operations.

In conclusion, we should not forget the tremendous, almost impossible strides taken in the past five years.

From a downtown rental office next to a furniture store, the University has moved to a 300-acre campus with excellent facilities, distinguished programs, and a faculty and student body of recognized excellence.

This progress was paraphrased by Advisory Board member Richard Folsom, President of Rensselaer Polytechnic Institute in New York, when he stated “Had you told me in 1963 when I first met with the original group of citizens who wished to start a University in Fort Lauderdale that you would achieve what you have in being now in 1969, I would have said that it was impossible, unbelievable, that this progress could be accomplished in so short a period of time.

**IT WAS SAID IN 1966**

**IT'S EVEN TRUER TODAY**

Editor’s Note: The following statement was made for an important Radio Station in 1966. It is even more true today, three years later.

Here is the profile of one of the new breed of men who are changing the face of Florida.

Big men physically are encountered often. Big men in intellectual vision and leadership - the dreamers of big dreams who can make reality of those dreams - are rare.

Six-foot, four-inch Harvard-trained Dr. Winstead, is President of Nova University of Advanced Technology, Broward County, which is designed and destined to meet, in part, man’s quest for new knowledge; and mankind’s need to find better and quicker ways to transmit and absorb knowledge that is increasing at so fantastic a pace.

Said a wise editor: “Areas that establish institutions geared to these objectives are going to be the pacemakers in the years ahead . . . .”

Make a note of these names: “Warren Winstead and Nova University.” You’re going to hear more and more of them.

**NEWSY DOTS**

Bernard Castro was in Fort Lauderdale in early September to serve as a pallbearer at the funeral of Rocky Marciano . . . . The George W. Englishes visited in many places in Europe. George was an officer in the Judge Advocate Section of the American Army in World War II and was headquartered in England and European mainland points.
GOLD KEY RECEPTION
FACULTY – STUDENT WELCOME
FOR 1969-70 IS POPULAR EVENT

For the third consecutive year, on September 11, GOLD KEY played host to faculty and students, incident to the 69-70 University opening formalities.

President Cy Young and other officials were on hand. The affair was pronounced the best such event yet staged by GOLD KEY. Dr. Bruno Schmidt, Poet Laureate, and Mrs. Schmidt were among interested participants.

Never has any party anywhere had more attractive young hostesses to preside over its punchbowls, and the hot and cold hors d'oeuvres, based on the volume of consumption, were never better.

Presiding over the punchbowls were Miss Patricia Graef, Executive Secretary to the President; Miss Sue Addeo, Executive Secretary to the Assistant to the President; Mrs. Gary Beebe, Receptionist - PBX Operator; Mrs. Curtis Clifford, Secretary.

The Novacrat is glad to present in the current issue two full pages of pictures of personalities and activities at the Welcoming Party.

As information, the student, faculty, and staff list, as released by Dr. Arthur Wishart, Registrar and Director of Admissions, follows:

FACULTY

Dr. Warren J. Winstead - President
Dr. William S. Richardson - Dean of Graduate Faculty and Gulfstream Professor of Oceanography
Dr. Abraham S. Fischler - Dean of Graduate Studies and James Donn Professor of Education
Dr. Dayton E. Carritt - GOLD KEY Professor of Chemical Oceanography
Dr. Roy Herndon - Associate Professor of Physics
Dr. Charles S. Yentsch - Associate Professor of Marine Biology
Dr. Robert J. Jones - Assistant Professor of Psychology
Dr. William A. Love, Jr. - Assistant Professor of Psychology
Dr. Dennis W. Moore - Assistant Professor of Theoretical Oceanography
Dr. Peter P. Niiler - Assistant Professor of Theoretical Oceanography
Dr. Russell Snyder - Assistant Professor of Physical Oceanography
Dr. Judith R. Steward - Assistant Professor of Psychology
Dr. John M. Flynn - Instructor of Educational Psychology
Dr. Stephen R. Baig - Post-Doctoral Fellow in Chemical Oceanography
Dr. J. R. Moed - Post-Doctoral Fellow in Biochemistry
H. Richard Peto - Research Associate, Education

STUDENTS – OCEANOGRAPHY

Alexander J. Brincko, Jr.
Bruce Burgener
James Howald
Robert Kendall
Elliott C. Maynard
Clarice Moreth

STUDENTS – SOCIAL & BEHAVIORAL SCIENCES

Edward L. Griefer, III
Alan R. Herrin
Earl Hughes
Robert Lehman

STUDENTS – EDUCATIONAL RESEARCH

Richard LaRue
Marlene Mitchell
Donald E. Myers

LIFE SCIENCE CENTER (& Germfree Life Research Center)

Dr. Joel Warren - Director
Dr. Robert Schwartz - Research Scientist
Miriam Sacksteder - Deputy Director
Leon F. Reyniers - Treasurer
Letha Husmann - Secretary
Martin C. Cook - Machinist
Robert Simonson, Jr. - Biochemist
Glenn Chassereau - Maintenance Technician
Randall Moran - Maintenance Technician
Jacqueline Van Petten - Laboratory Technician
Morris Occhipinti - Laboratory Technician
C. Lee Jones - Animal Care Technician

NEWSY DOTS

The presidency of the First National Bank in Fort Lauderdale, held so brilliantly for a number of years by Nova Trustee and GOLD KEY member, Howard Allen has recently been filled by a 40-year old Fred Millsaps, Financial Vice President of the Florida Power and Light Company in Miami. He too comes to Fort Lauderdale with quite a reputation. He assumed his new office May 1.

Executive Director
DONNS OFF TO ALASKA
BARRYS SEE RUSSIA

James Donn, Jr., leaves in late September for a hunting trip to the wilds of Alaska. Mary Anna is going with him. . . . Bob Gill, Jr., spent several weeks on safari in darkest Africa. The Gene Whiddons are back from Disneyland, California, and the Canadian Northwest . . .

The Gregory Barrys visited Russia earlier in the summer. The $10.8 million dollar Ocean Club Apartment Building has been started as a joint venture by President Cy Young and the General Builders Corporation.

The Stan Emersons, after a visit in Boston, left on an extended visit to Europe. Stan has a few days business in London; then they will drive and golf in Portugal and Spain and other points, returning to Fort Lauderdale in early November . . .

GOLD KEY Director John E. Morris will be in Honolulu in early October . . . Jim Farquhar has been in Paris visiting his son . . . The Bill Runnstroms and the Leo Goodwins, Jr., have been in Europe, and it looks like Leo was sporting a new mustache when the foursome left.

Mr. and Mrs. Norman K. Parks leave in late September for Lake Toxaway - and some active Carolina golfing.

CHARLIE FORMAN RECIPIENT OR NATIONAL ATHLETIC SCHOLARSHIP AWARD

Charlie Forman, son of Charles R. Forman, DVM, and Mrs. Forman, has been selected by the National Football Hall of Fame as the outstanding Class AA football player-scholar in the entire state of Florida. He is a recent Nova graduate. This Hall of Fame award is considered the top prize in Florida high school prep circles.

He stands 5 feet eleven inches and weighs 205 pounds. This fall he enters the University of Texas at Austin, where he will major in mathematics.

TRAVIS DUNGAN'S COMPANY DOES IMPORTANT WORK FOR FP&L

Travis Dungan's Carter Construction Company is engaged in foundation work, sinking great fifty and sixty-foot pilings for plants at the site of the big Florida Power and Light operation in northwest Dania. These plants are to be gas turbine generators. There will be six of them with a total capacity of 240,000 kilowatts. They will give the FP&L flexibility, reliability, increased strength, and will pick up power immediately. They will be ready in 1970.

The Dungans plan to leave in November for a vacation in Spain.

NEWSY DOTS

Frederick B. Youngblood, first president of GOLD KEY, now president of the Hundred Club of Broward County, has been named by Governor Claude Kirk as a Commissioner of the North Broward Hospital District Board. Fred will make a fine addition to the Board, which is losing another GOLD KEY member, Hamilton C. Forman, former chairman, who served under two prior governors for eight years.

An affiliate of Earle M. Scott Associates, Inc., of Pompano Beach, a management service company, has been awarded a contract for training supervisory and technical personnel of the Venezuelan Sun Oil Company. The affiliate is the ATCO, Inc., of Houston. The program will train both Venezuelans and Americans for service at plants and installations in the Lake Maracaibo area of Venezuela.

Aaron Barzilay, mutual fund specialist and estate planner, has staged another of his early-fall seminars, this time in morning hours, at Heilman's Restaurant. Aaron has held these sessions annually since 1958 . . .

ATOMS OF RIME

by DR. BRUNO C. SCHMIDT

Break with the old,
Foster the new,
Stand firm and bold;
Gung·ho, Nova U.

BANKS AND FLEMING ON NEW COUNTRY CLUB BOARD

GOLD KEY members, Sidney Banks and Foy B. Fleming, are serving on the initial Board of Directors of the Lago Mar Country Club, seven miles west of U.S. 441 on the North side of Road 84 - beyond the Nova University campus. Walter Banks, son of Sidney, who has attended GOLD KEY affairs, is President.

The new club occupies 170 acres, is contoured with 500,000 cu. yds. of fill with some hills 20 feet high. It will be 6,800 yards, par 72.
BROWARD GROWTH EMULATES SKYROCKET

Tom Vincegura of the news made this prediction:
Let's see if Broward is Number 2 in 1970.

Census Bureau figures show Broward with no equal in Florida for percentage growth increase between July 1, 1966, and April 1, 1960.

Broward's population increased from 333,946 to 464,400 in the six-year period, a 39.1 per cent gain. Dade increased 15.6 per cent, Duval 9.6, Hillsborough 12.4 and Pinellas 15. Broward has undisputed control of the third largest county slot and is pushing Duval out of second place real fast. The 1970 census is expected to show Broward No. 2.

NEWSY DOTS

Robert C. "Bob" Ellyson is Vice President of the Florida Institute of CPA's . . . . He has addressed four chapters of Fort Lauderdale CPA's on "Unaudited Financial Statements . . . ."

Bob's firm, Ring, Mahony and Arner, has, as of September 1, 1969, merged with the firm of Lybrand, Ross Brothers and Montgomery, one of the outstanding firms in the accounting profession, with 60 offices in the United States, and through the international firm of Coopers and Lybrand, maintains offices in 145 cities throughout the world.
