University Holds Summer Institutes

**Dr. Albert Sabin to Address Graduates**

"The second 1977 commencement ceremony of Nova University will be held July 24 at the Fort Lauderdale Auditorium. Dr. Albert B. Sabin, distinguished research professor at The Medical College of the University of South Carolina and developer of live poliomyelitis vaccine. Dr. Sabin’s topic will be "Objectives of Higher Education in Contemporary America.'"

Some 350 degrees will be conferred in business, education, educational supervision, and public administration.

Dr. Sabin will be recipient of an honorary Doctor of Science degree, and Dr. Leland B. Medsker, director of Research and Development of Higher Education, University of California at Berkeley, will be named the second Nova fellow.

Dr. Medsker is director of Major Applied Research Project Advisors for the National E.D. Program for Community College Faculty. He holds an Ed.D. degree from Stanford University, and M.B.A. and bachelor’s degrees from Northwestern University.

From 1956 to 1974 he served in a number of positions at the University of California at Berkeley including that of director of the Project on Non-traditional Education.

**Dr. Albert Sabin**

Dr. Sabin discontinued personal work in the laboratory two years ago and is currently engaged in what he calls synthesis of information in a basis for policy decisions in selected fields of biomedical research.

He is a consultant to the World Health Organization, the Pan American Health Organization, the U.S. Army Medical Research and Development Command, and the Department of Health, Education and Welfare. He is a recipient of the U.S. National Medal of Science as well as of many other awards and prizes.

Novo University will conduct two institutes in the Greater Fort Lauderdale area this summer.

National Systems in Higher Education will be the theme of the 60th annual Institute for Higher Education at the Diplomat Hotel in Hollywood July 21-27. Attendance at the summer institute is one of the academic year’s programs for preparation in the E.D. Program for Community College Faculty.

Dr. Marie Martin, director of the Community College Unit of the United States Office of Education, will speak on "Federal Perspective on National Issues" at the opening session, July 22 at 9:05 a.m.

In addition, a Family Welfare Institute sponsored by the Early Childhood Ed.D. Program and the Center for Public Affairs and Administration will be held July 24-28 at the Rolling Hills Country Club and on the Nova University campus.

Ms. Peggy Pizzo, director of Public Policy Intern Program at the Coalition for Children and Youth, Washington, D.C., will discuss "The Family in America: Major Initiatives in the Carter Administration in Reference to the Family" at the opening session, July 24 at 7:30 p.m. at Rolling Hills.

**INSTITUTE FOR HIGHER EDUCATION**

Dr. Martin is recipient of the Association of Community and Junior Colleges 1975 Outstanding Educator of the Year Award. In her Washington post she represents the interest of community colleges with the Office of Education, Bureau of Higher Continuing Education.

Prior to assuming this position in 1971, she was president of Los Angeles Metropolitan College and has been associated with Los Angeles City College and Los Angeles State College.

"The purpose of the institute," says Director John Scigliano, "is to acquaint participants with input from national officers of the program from across the country in order that the participants’ own efforts at improving educational practice can be made more effective."

This year the Institute will initiate a show-case of the arts presented by the Practitioners’ Hall of Fame, to provide an annual exchange of ideas within the higher education community. Presenters this year will be: Dr. Forrest D. Etheredge, president of Washington Community College, on "The Waybourn Ad Hoc: An Experiment in College Governance," Dr. Lawrence F. Fieldsdorfer, director of Academic and Related Programs, The State University and Community College System of Tennessee, on "General Education: A Governing Board Mandate;" Dr. Jerry Priga, professor, Reed College, Portland, on "Improving the Life of the Mind," and Miss Mary A. Stevens, Black Hawk College, Moline, Illinois.

Among the other speakers will be: Dr. John E. Roche, professor of Community College Education at the University of Texas, who will speak on "Competency Based Education: Promise and Problems;" and Dr. Ralph Kirkman, editor for the Pabody College Press, on "Publications Lab: The Professor as Writer and Publisher."

Mr. Peter Smith, president of Community College of Vernon, will speak on "A New Community of Educators" and Dr. Frederick Kittner, director of the Community College Leadership Program at the University of Los Angeles, will speak on "COPA: The New Driving Force in Accreditation."

**Leo Goodwin, Jr., Receives H.E.I.F. Award**

Leo Goodwin, Jr., Fort Lauderdale corporate executive, industrial leader and philanthropist, was named recipient of a Champion of Higher Independent Education in Florida (H.E.I.F.) award. The presentation was made by the Independent Colleges and Universities of Florida.

Mr. Goodwin was presented the H.E.I.F. award in recognition of the Goodwin Library at the Sidwell Friends School.

"Leo Goodwin, Jr., has for many years given of his personal resources and leadership abilities to help improve the civic, cultural and educational life of his community," Dr. Fischler pointed out.

An early and enthusiastic supporter of Nova University, Mr. Goodwin, Jr., C.S., served as a member of its board of trustees. His philanthropic interests also included establishment of the Goodwin Professorship of Western History and Cultural Studies at the University of South Florida and in Boston's Rindge Hall School in Washington, D.C.

A member of the Broward County community, Goodwin has served as a member of the board of trustees of the Swimming Hall of Fame.

**Leo Goodwin, Jr.**

As the executive vice-president of the Government Employees Insurance Company, he provided over the corporate affairs of a world-wide business enterprise. Following 30 years in the insurance business, during which GEICO became a leader in the industry, Goodwin moved to Ft. Lauderdale, where he became involved in the marine industry of Broward County.

"With a lifelong dedication to the preservation of the American tradition of the rule of law over the rule of men, Goodwin, Jr., has throughout his adult life promoted projects designed to improve the criminal justice system in the United States," Fischler said.

Goodwin was honored for his "long-time and continuing counsel and support of the aims and aspirations of Nova University and in recognition of a life dedicated to the improvement of his community and the lives of his fellow man."

Other H.E.I.F. recipients were: Thomas F. Carney, President of the University of Biotechnology; Harris Mullen, University of Tampa; Harvey T. Reid, University of Miami, and F. Reed attainment. Barry College.

Tarabella Chairman of Coral Springs Board

Dr. George Lawniczak Named Director of Oceanographic Center

Vice Presidents Named for Financial Affairs and Development

Trustee Profile

August Paoli

University Trustee August C. Paoli is counted among the most distinguished residents of Broward County, having been prominently associated with the law, banking, local government and civic affairs almost from his arrival in Hollywood in 1947. He has been an outstanding supporter of Nova University for many years, having taken an active role in the founding of the Center for Study of Law and having headed its campaign for funds with which to provide the library space and other facilities on the second floor of the Parker Building.

Paoli is a former city attorney for Holly­wood, a position which he held for eight years. He has been chairman of the Commis­sion of 108 there, a director of the Chamber of Commerce and president of the Junior Chamber of Commerce.

A native of New York City, Paoli served in the Navy during World War II and thereafter began the study of law. He took his bachelor's degree at Ford­ham University and earned his law degree at Miami, where he gained his legal training and became the first editor of the Miami Law Review.

Professionally, he has served for seven years as a member of the Florida Board of Bar

Examiners and for two years as chairman of this Board. His service in the law also in­cludes a term as president of the Florida Council of Presidents. He belongs to the American Bar Association as well as the Broward County and Greater Hollywood Bar associations.

Paoli's civic activities have led him to such positions as the presidency of the Hollywood Beach Kiwanis Club, and the Hollywood Optimist Club and the vice presidency of the Florida Junior Chamber of Commerce. He serves on the board of directors of the First National Bank of Hollywood and of Florida Bankers, the holding company. He is a member of the Navy League, the Elks Lodge, the American Legion and Delta Theta Phi fraternity.

Of his work on behalf of Nova University, Paoli says that he finds it among the most rewarding of all his civic work.

"I'm completely sold on the University, particularly on the progress that's been made with the Law School. Hopefully we're going to break ground for the Law School building within the next two years. This will give the community a feeling that the University is continuing to be a permanent part of the community.

"The University has made remarkable progress, not just on the campus but around the country, in its cluster type programs which are needed today. This has given us a lot of impetus in other parts of the country, and now we need to develop the spirit within our own community.

"I see only great things for the University in the next 10 years. We've, in the land, our curriculum is in the forefront, and I see no way for the University to continue but up." Mr. Paoli also is active on behalf of the Law School and other university functions. He has one son and two daughters.

Florida Bankers, the holding company. He is a member of the Navy League, the Elks Lodge, the American Legion and Delta Theta Phi fraternity.

Dr. George Lawniczak announced his resignation as general manager of Nova University Center for Oceanographic Sciences, President Abraham Fischler has announced.

Lawniczak retired from a 22-year career to begin his new position July 1. Dr. Dennis W. Moore, who has been acting director, becomes chief scientist at the center.

Lawniczak received his undergraduate and master's degrees from the U.S. Naval Academy at Annapolis and his doctoral degree in marine science from the University of Michigan. He served as a photo reconnaissance officer for five years in Jacksonville.

"He is the author of several scientific publi­cations, an associate editor of the "Journal of Applied Meteorology," and a reviewer for the National Science Foundation. He was designated as first chairman of the new board was both historically proper and deserved.

"Personally and professionally," Fischler said, "he (Taravella) is the individual who has already contributed the most to attracting Nova University into Coral Springs and in making it a viable success here.

"That is why officially he serves as a leader in further formation of the Nova University at Coral Springs development and he is historically acknowledged as chair­man of the University's first board of govern­ors.

"Nova University at Coral Springs opened its doors in late January 1976, and achieved record front quarter enrollment of Coral Ridge Properties.

Subsequently, it moved its "campus" to the second floor of the Bank of Coral Springs building where it now offers both graduate and undergraduate courses and a variety of community-based seminars from its own modern facilities, including the Coral Ridge Auditorium.

Enrollments currently average about 100 students in each of the accelerated eight- and 12-week term periods with courses and cur­riculum designed to meet community-based needs. Dr. Scigliano said Taravella's commitment as chairman will continue through full organization of the board of governors and probably into early fall at which time the board members themselves will re-elect according to by-laws yet to be drawn and approved.

J.P. TARAVELLA

J. P. Taravella, president of Coral Ridge Properties and the Westinghouse Community Development Group, has accepted the invita­tion to sit as first and founding chairman of the board of governors of Nova University at Coral Springs. Dr. Abraham Fischler, president of Nova University and Dr. Virginia Scigliano, director of Nova University at Coral Springs, jointly announced Tara­vella's acceptance of the position.

Taravella, as chairman, and Dr. Scigliano will moderate assemblages of a 10-15 member board of governors, including both local and national figures, to advise policy making for the Coral Springs based institution in future years.

Fischler said Taravella's designation as first chairman of the new board was both historically proper and deserved.

"Personally and professionally," Fischler said, "he (Taravella) is the individual who has already contributed the most to attracting Nova University into Coral Springs and in making it a viable success here.

"That is why officially he serves as a leader in further formation of the Nova University at Coral Springs development and he is historically acknowledged as chair­man of the University's first board of govern­ors.

Dr. Scigliano said Taravella's commitment as chairman will continue through full organization of the board of governors and probably into early fall at which time the board members themselves will re-elect according to by-laws yet to be drawn and approved.

WILLIAM M. MCLaughlin

William F. McLaughlin, director of financial affairs at Nova University for the past year, has been appointed vice president for financial affairs, President Abraham S. Fischler announced.

In the newly created position, McLaughlin will be responsible for all financial, fiscal and business activities of the University and cer­tain administrative functions, the president said.

McLaughlin came to Nova University from the University of Miami, where he was assistant vice president for financial affairs. Earlier he had been deputy director of both the Dade County Department of Hospitals and Jackson Memorial Hospital.

He studied mechanical engineering and business administration at the University of Arkansas and the University of Florida in a military leadership capacity in the active U.S. Army Reserve.

"I am happy to make this announcement," says Dr. Fischler. "Since coming on board Mr. McLaughlin has managed the cash flow of the University, set up systems to insure money management, worked hard with the faculty, and he deserves the position."

In his new position, Dr. Fischler said, McLaughlin will have significant responsi­bilities in the administration of a 1977-78 budget of approximately $20 million.

JOSEPH P. MURPHY

President Abraham S. Fischler announced the appointment of Joseph P. Murphy as Vice-President for Development at Nova University, effective July 1, 1977.

Murphy had served as Assistant to the President for Development since July, 1974, when he came to Nova University following seven years at the University of Miami in a variety of development posts, including Di­rector of Public Relations.

A graduate of the University of South Florida, Murphy was a Heine Fellow in the Graduate School of Public and International Affairs, University of Pittsburgh and subse­quently earned a Masters of Public Adminis­tration degree from Nova University, where currently is a doctoral candidate.

Murphy is an accredited member of the Public Relations Society of America, a mem­ber of the Executives Association of Fort Lauderdale and Davie Chamber of Com­merce and has served as president of the South Florida Chapter, National Cystic Fibrosis Research Foundation.

A resident of Lauderdale-By-The-Sea, Murphy and his wife, Eugenia, have one daughter, Elizabeth, age 14.

Vice President in Charge of Internet

As we reach the end of another academic year, much progress has been made; yet much more remains to be made. This year Nova University graduates its first law class, and of course, we are awaiting the results of the bar exams. I'm happy to report that each of the first nine students who took the Florida Bar examination passed.

This year we also graduated our first stu­dents from Nova College. These deserve a great deal of credit for, in addition to working full time, they were able to gradu­ate within a two year period and to do better than adequate work. Many graduated with honors.

Our Ed. Specialists Program also awarded degrees for the first time. This program is designed to improve the instruction of teachers within the classroom.

The Criminal Justice Program will be graduating its first group at the July com­mencement, some students receiving the Bachelor's Degree, and others the Master's. I mention the above to show that Nova University is constantly looking for ways to fill needs within the society, both domestically and internationally. Individuals receiving the Nova News are an important link to the complex society in which we live. We want to hear from you, for you serve as our "eyes and ears." We need to know how we can better adapt to a rapidly changing world and what needs exist with your field might be filled by a university interested in providing quality education to those who desire it.

One of the major issues which you might consider is how to provide equal opportunity for education to all those who desire it.

Abraham S. Fischler
Five honorary Doctor of Laws degrees were awarded at Nova University Commencement ceremonies May 22 at the Sunrise Theatre. Recipients were Retired Associate Justice of the U.S. Supreme Court Tom C. Clark, who delivered the commencement address; W. Tinsley Ellis, civic leader, Hollywood lawyer and Nova University Law teacher; Ben F. Overton, Chief Justice of the Supreme Court of Florida; Jerome C. Prince, dean emeritus of Brooklyn Law School, and Peter W. Thornton, charter dean of the Nova University Center for the Study of Law and director of the Nova Dame Law School London Center.

Justice Clark was cited for his lifelong dedication to public affairs, contribution to the study and practice of jurisprudence, advancement of legal education and reform of the criminal justice system.

Ellis was cited for his leadership as a member of the South Florida Educational Center, original member of the Nova University Board of Trustees, chairmanship of the Board of Governors of the Nova University Center for the Study of Law and civic roles in Hollywood with the Committee of 100 of Hollywood, the 100 Club of Broward County, Hollywood Kiwanis Club, Hollywood Bar Association, and the Executive Committee of the Broward County Bar Association.

Chief Justice Overton was cited for his dedication to the improvement of the legal profession through a lifetime of concerned participation as a member of the Supreme Court of Florida, the Continuing Legal Education Committee, State of Florida, chairmanship of the Florida Institute for the Judiciary and faculty role with the National College of the State Judiciary.

Dean Prince was cited for his legal scholarship and contributions to the reform and revitalization of the criminal justice system while serving as Chief Counsel, New York State Joint Legislative Committee on Court Reorganization and Committee to Study the Administration of Justice. He was also cited for his distinctive service as a member of the American Bar Association Committee on Law School Standards of the Section of Legal Education, his writings on Evidence, and his role as one of the intellectual and administrative forces which helped bring the Nova University Center for the Study of Law into being.

Dean Thornton was cited for his contributions to the advancement of jurisprudence as a teacher, legal scholar, practitioner and author, as chairman for the Practicing Law Institute sessions on Civil Practice Law and Rules in the state of New York; as reporter to the Pattern Jury Committee of the Association of Supreme Court Judges of the State of New York; for his creative vision as founding dean of the Nova University Center for the Study of Law and for the counsel, encouragement, and enthusiasm he has given both faculty and students alike.

The recipients were teachers and administrators from the public school systems of more than 20 states and Puerto Rico.

Other doctorates were awarded to students from Florida, Washington, D.C., and Nashville, Tenn., who represented the first graduates of Nova's Graduate Program in Public Administration, which trains persons in local, state and federal government agencies.

Masters' degrees were presented in public administration, behavioral sciences, business administration and education. Bachelor of science degrees were awarded by Nova College and by the Nova campus of the all-female New York Institute of Technology.

Noting that 20 of the law graduates were women, Justice Clark in his address hailed this trend in the law schools and added:

"Women are much better advocates than men. They're much better prepared when they come to court. Our profession is going to improve because of this.

"Urging the graduates to go into advocacy law as contrasted with corporate or government law, the former U.S. Attorney General said, "We don't have too many real advocates in this country today."

"They're either not prepared or not capable. The law schools are not turning out the complete lawyer, the one who has been exposed to the trial court. Law is made in the trial court, not in the legislature. Twenty million people go into the trial courts of this country every year, and on the Supreme Court we see only 100 cases."

"The image of justice is seen more often in the trial court. That image is made at the trial level."

Clark was introduced by Florida Supreme Court Chief Justice Ben F. Overton, who praised the 78-year-old Clark for his role in the establishment of the American Bar Association's program of higher education for judges and for his continuing promotion of professional responsibility in the legal profession.

"Dr. Fischler noted in his remarks that when the responsibility for establishing a law school was thrust upon the University in 1972, "I fought to delay its start. We had just come through a difficult period and I wanted a year's rest. But the wisdom of the chancellor and the trustees prevailed, and today shows that they were right."

"On days only before his death, Justice Clark had told reporters he was having chest pains and was being treated for a bad heart. Still he went on working, saying he would be all right."

TOM CLARK

DEATH has claimed Tom C. Clark, who served only for 18 years on the U.S. Supreme Court, but the hard-working Texan left a legacy with special meaning for those troubled times.

"A good name," he told the first graduating class at Nova University Law School, "is to be chosen rather than any other thing. It was a faith that he practiced throughout his 77 years.

Early in his career, Mr. Clark as a government prosecutor led the legal crackdown on the American Communist Party. Labor, civil rights and civil liberties leaders criticized his appointment to the Supreme Court on the grounds that he was too conservative.

Justice Clark was a conservative by conscience, and at times unorthodox with the Earl Warren court. But he wrote some of the notable civil rights opinions of the age, including those which banned the use of illegal obtained evidence in state courts, and outlawed state-ordered prayers in the public schools.

When his son, Ramsey Clark, was appointed U.S. Attorney General, Mr. Clark resigned, saying he wanted no chance of a conflict of interest. Since then, he had been serving as a "visiting judge" to help ease the workload on the federal courts of appeals. He is the only person ever to serve as a judge in all 11 circuits.

On the morning of his death, Justice Clark had told reporters he was having chest pains and was being treated for a bad heart. He was having work, saying he would be all right.

Tom Clark won't be remembered by history as a brilliant mind or an innovator, but he had qualities all too rare nowadays: a devotion to duty and an ironclad sense of honor.

Edward Curtis receives a kiss from his wife, Barbara after receiving his Juris Doctor degree. Curtis, a former U.S. Navy test pilot, now practices aviation law with the firm of James B. Dohan, Fort Lauderdale.

Diana Christensen, an RN, graduated summa cum laude from Nova University, resident of Coral Springs, was the first graduate to complete her studies at Nova University at Coral Springs.

**P. Paul Burgess Will Head New Program in Population & Health**

Nova University has established a new program in Population and Health.

Initially, it will focus on training health care professionals via short term training seminars at Nova and via degree programs in classrooms established in Brazil and elsewhere in South America as resources become available.

Participants for the short term training will be recruited primarily in Latin America.

Professor P. Paul Burgess, who joined the faculty July 1, will direct the program assisted by Mrs. Virginia Miller.

Professor Burgess comes to Nova on a leave of absence from the University of Florida at Gainesville where he directed the Division of Population and Family Planning and the Interdisciplinary Program on Population and Health. While there he developed and coordinated a statewide network of family planning services.

Prior to this, Professor Burgess was with the Carolina Population Center and the Department of Health Administration of the University of North Carolina at Chapel Hill. He has consulted for the World Bank, the Council of Rectors of Brazilian Universities and the Pan American Health Organization.

Before entering the population field, he was first secretary and later charge d'affaires of the Vatican Embassy in Monrovia, Liberia. He also had been attaché to the Vatican Secretariat of State in Rome.

He obtained a master of science in public health from the University of North Carolina at Chapel Hill and has completed all course work toward the Doctor of Public Health. He received his B.A. from St. Columbanus College in Galway, Ireland, and his L.Ths. from Drontaniste College in North Ireland. He also attended the Vatican School of Diplomats and the Dante Alighieri Language Institute in Rome.

“The Population and Health program is characteristic of Nova’s innovative endeavors in the education field,” President Aabraham S. Fischer states. “Drawing on innovative training techniques and existing programs at Nova, the program will expand our horizons toward the interdisciplinary health management and population fields. As Nova is aimed toward solving problems of immediate concern to mankind, this new program will focus on developing interdisciplinary understandings in field-based research, technical cooperation, service and teaching, both nationally and internationally.”

“Nationally, health care problems exist and professional on-the-job training is needed to develop appropriate health care delivery systems,” he adds. “The program will attempt to develop a Health Maintenance Organization which can serve as a model for researchers, demonstration and training.”

The program office is located temporarily in the rear offices of the George W. English Library of Life Sciences, Lois Parker building.

**Faculty/Administration News**

**LARRY D. BARNETT**

assistant professor of law, had an article in the March issue of the University of North Carolina law review. The article, written at the invitation of the law review, was published as part of a female symposium and was the lead piece in the symposium. Entitled "The Constitutionality of Selected Fertility Control Policies," it examined the validity under the United States Constitution of four fertility control measures that might be adopted to curb population growth in this country. The measures were raising the minimum age for marriage, charging tuition in the public schools, limiting living space in new housing, and placing family-size restrictions on government employment.

**PROF. LARRY D. BARNETT**

**Robert Bogoff**, Life Sciences librarian, attended the Special Library Association convention in New York, June 7-10.

**DR. SAMUEL HUMES**

director of the Center for Public Affairs and Administration, gave the commencement address to the Pine High School graduating class, June 5th at the Sunrise Musical Theater. He called it "An Un-Commencement Address to New Adults," in which he stressed the importance of using one's own judgement and integrity when applying any given principal to a particular situation; that there is no standard principal applicable to all situations.

**Peter A. Korn**, program professor and assistant director of the Center for Public Affairs and Administration, has been chosen president of the Gold Coast Chapter, American Society for Public Administration for 1977-78.

**Shirley Long**, senior PBX operator at Nova University, was elected president of the PBX Club of Florida at the state convention May 6-8 at Holiday Inn, Fort Lauderdale. Mrs. Long had been Broward County president. The club is a philanthropic organization which gives to muscular dystrophy and the Broward County Welfare Children.

**Dr. Fred A. Nelson**, vice president for External Affairs, was the commencement speaker at the Art Institute of Fort Lauderdale on June 2nd. Dr. Nelson has also been invited to speak on "Regulation of Institutions and Accreditation" at a national convention in July sponsored by the State Higher Education Executive Officers (SHEEO) and the Education Commission of the States (ECS).

**Connie Pine**, assistant director of the Law Library, has been named executive coordinator of the Duplex Exchange Committee of the American Association of Law Libraries for the coming year. Along with Dean Trefles, director of the Law Library, and Phyllis Harke, reference assistant, she represented the American Association at the Annual Conference in July sponsored by the State Higher Education Executive Officers (SHEEO) and the Education Commission of the States (ECS).

**Judy Segal**, known as the father of the Head Start Program and now deputy director of the U.S. Civil Service Commission, will speak on “Focusing on the Child—A Response to the Critical Issues and a Discussion of National Policy Alternatives.”

**Robert Segal**, known as the father of the Head Start Program and now deputy director of the U.S. Civil Service Commission, will speak on “Focusing on the Child—A Response to the Critical Issues and a Discussion of National Policy Alternatives.”

1977 Summer Institutes

A joint seminar on admissions titled "Marketing a Community College is More Than Recruiting: An Explanation of the Process," will be presented by Dr. Gurria Fischer and Dr. Gary E. Rankin. Dr. Fischer is professor and vice president of student affairs at Williams and Rainey Harper College in Illinois. Dr. Rankin is vice president of student development at South Carolina City Junior College.

Dr. Dean Hannon, professor and coordinat­or of Industrial Education, North Carolina State University, will speak on “Professional in Occupational Education,” and created the program in Career Development Center, Arlington, Texas, who will discuss “That’s the Way It Is—1977 (Interactions Between Men and Women in the World of Work).”

**Family Welfare Institute**

The Family Welfare Institute is an effort to draw upon the resources of the faculty and participants of two Nova programs to examine issues in government and administration using the broad, substantive area of child and family welfare, according to Dr. Glenn Nesswicht and Dr. Samuel Humes, directors of the sponsoring programs.

Ms. Piazza, opening speaker at the work­shop, has been with the Day Care and Child Development Councils, where she was editor of the monthly magazine “Volunteer for Child.” She also served as consultant to Dr. Benjamin Slepick on the most recent revision of “Baby and Child Care,” particularly on

**Continued on page 5**
Ronald Klein, now practicing commercial law with Walter Heller of Miami, comments on the "open door policy" to the dean. "I was always able to discuss anything with him. He had," says Klein, who holds a bachelor's and his degree in civics from the University of Miami and Florida International University, respectively. According to Klein, those who graduated early are number one in the class during the first year, "the exam crash courses were superfluous. And in my practice I feel at least as well prepared as anyone else," says Garfield, who soon adds his name added to the Fort Lauderdale firm of Huth and Superstein, where he clerked and saw practices general litigation. While at Nova, Garfield won awards in torts, commercial transactions, federal litigation and Florida Bar Board of Bar Examiners high scholarship. Originally from Bronxville, N.Y. he holds a degree in English from Dickinson College and a M.B.A. in accounting from Iona College. George Evans, now practicing general litigation with Koppen & Watkins of Miami, also said he had "no trouble with the bar exam." A Miamian and former history major, at the University of Maryland, he is the grandson of an attorney who practiced before the International Court in The Hague. The son of an Army officer who came to Miami via Bogota, Columbia, Evans aspires to serve in the state legislature and a federal judiciary. You are no holiday of the real world of law, not just the academic," he commented, "like to comment," said Prof. Joel Berman for giving above and beyond in time on a person-to-person basis, to let us know what to expect on the bar exam. "I guess I slept only four or five hours a day," says Tindall who worked as an investigator for the Hollywood- Hialeah Police Department, reservation, tutu. But he managed to swing by it in his free-time all his life through law school. "I think we have a police with the Hollywood Police Department for five years. He holds his A.A. in criminal justice from Florida Community College.

Pageano served for two years as first director of the university. He is also responsible for the formulation of policies and procedures in the establishment and administration of the administration and administration of the Peace Corps. Currently he is the chief of the Administration of Public Law. Pageano was also a member of the board of directors of the Florida International University, international administrator, a participant in the Board of Directors of the National Association of Public Administration. The organization represents 250 institutions of higher education.

MARC KIRC, a graduate of Nova University Center for the Study of Law, won the 1977 Energy Law Essay Competition sponsored by the National Energy Law Journal and the National Law Journal Institute (NELPI) at the University of Tulsa College of Law, Tulsa, Oklahoma. Kirk's winning research article, one of 25 submitted, was described as the best example of current efforts in protecting human health from the harmful effects of radioactive wastes. It was published later this year by NELPI. It was originally written for an environmental law course at the University of Florida, under Prof. James B. Kirk, 28, is the son of Mr. and Mrs. C. V. Kirk of Plantation. His wife, Barbara, is a social worker with the Florida Department of Health & Rehabilitative Services.

BRUCE ROGOW, associate professor of law, was one of four attorneys recommended for the appointment as U.S. Attorney in Miami by the select committee created by Florida International University and the Florida International University, international administrator, a participant in the Board of Directors of the National Association of Public Administration. The organization represents 250 institutions of higher education.

Robert Shevin, attorney general of the State of Florida, spoke at the fourth annual commencement of The University School of Nova University, July 14, at the Inverrary Country Club, Lauderdale.

The presentation of diplomas was made by Martin J. Abie, chairman of the Board of Governors, Dr. Joseph D. Randazzo, headmaster, and Dr. James E. Smith, director of the Upper House.

There was no formal valedictorian or salutatorian, but students offered their own thoughts upon receiving their diplomas.

The senior class included 34 graduates.

On May 31st the first annual academic banquet was held in the school cafeteria.

Students heard talks on careers for the college bound.

Dr. Smith then made presentations of awards. Seniors who achieved academic honors in the 1976-77 year included: Mark Barnett, Andrea Bandeian, John Beach, Kenny Block, Jane Marlowe, Tanya Neirnack, Michael Nentsky, Michael Rathy, Kathy Richardhorn and Kim Rodriguez.

Graduates will attend the following colleges: Robert Alfano, Glendale Community College, Glendale, Arizona; Ana Andrade, Broward Community College; Lauren Avelino, Madonna Community College (Nursing); Mark Barnett, Columbia University; Andrea Bandeian, Florida State University; John Beach, Tufts University; David Berman, University of Florida; Kenny Block, University of Arizona; Robin Brewer, University of Miami; Thomas Cola, Emory University; Mitchell Erblich, University of Florida; David Ethington, Jacksonville University; Malinda Feuer, Emory University; Randy Helberg, Roger Williams College; Maria Horn, Broward Community College; Jane Marlowe, Tufts University; Craig Meadows, Pensacola Jr. College; Tanya Neirnack, Colorado College; Michael Rathy, Boston University; Kathy Richardson, University of New Orleans; Kimberly Rodrigues, Broward Community College; Julia Rose, Nova College; Margaret Ross, Marymount College of Virginia; Cindy Schneider, Emerson College; Guy Seligman, University of Florida; Keith Shiffin, Culinary School of New York; Mark Smith, American Community College, Glendale, Arizona; Stephen Solomon, Florida State University; Mark Walker, University of Miami; Jess Weiss, University of South Carolina; and Gail Zeisel, Ogletorpe University.

The following article by Dr. Joseph D. Randazzo, headmaster, of The University School, was highlighted on the cover of the school's newsletter "Back to Basics." The American education system during the latter half of this decade finds itself at a major crossroad.

Nationally and locally, concerned educators are in a dilemma as to the philosophic direction they should take in programming for the education of children. Should they continue in the concept of a child-centered, humanistic and relevant preparation for a future society which has been the thrust of the past ten years in the movement called Humanistic Education? Or, should they succumb to the call heralded as "back to the basics" and return to the old days (the Traditional School movement)?

Obviously the answers to our society's needs cannot be found in any hard-line compromise in the schoolroom. The solutions, I am convinced, lie somewhere in between—balance that maintains that which is good of the old and adds those elements which most experts agree are necessary for a child today to survive successfully in the world of tomorrow.

Following this line, I would like to adapt the biblical axiom, "man does not live by bread alone" and suggest that "a child does not learn by the three R's alone." There is no question that the three R's are important. The skills of communication (reading, riting) and computation (arithmetic) are basic and the intellectual development.

However, I maintain that because of the demands of our present and future society, there are additional basics which should be taught by schools as they endeavor to prepare the child for the many roles he must play in the world of tomorrow.

What are these additional basics?

From the humanistic point of view, the primary goal of education is to help the child learn to cope with others, himself and his environment in ways that are satisfying and will lead to a more meaningful life. With this objective in mind, I submit that the three R's should be viewed at the beginning, not the end, of the school experience.

Basic to an individual's education should be:

- learning how to learn as well as what to learn;
- learning that which is useful and meaningful;
- learning how to deal with emotions, attitudes and values.

In a school in which these goals are recognized and assumed a special nature, the school becomes a place that takes all aspects of a child's development into consideration, a place that makes the total child more important than his or her abilities, a place that gives priority to education for the child as a human being.

Implicit in this viewpoint is a curriculum which:

- includes materials and experiences relevant to a child's life now and in the future;
- gives children strategies for coping with their real-life concerns as they deal with themselves and others;
- creates an atmosphere which promotes acceptance, risk-taking and openness, all of which lead to the development of self-worth and trust.

With these additional basics in mind, most educators of the Humanistic School maintain that: the three R's will come sooner and last longer, the child will be able to function better with the uncertainties of life; the child will become a more self-directed and independent learner; the child will more closely fulfill his intellectual and creative potential and hopefully become a productive and contributing member of society.

This is a monumental challenge to any educational institution.

The University School has accepted this challenge for the past seven years and remains unwavering in its future commitment. There is no question in my mind that all staff and the nature of our school environment can

Is Back to Basics Really the Good Old Days?

Nora University's Criminal Justice Program held a one-day seminar on Hostage Tactics and Negotiation Techniques, June 6 in the Miami-Hollywood auditorium.

Dr. Irving Goldaber and Richard Kobetz presented an overview of the state of the art of negotiation. Small group discussions and dilemna exercises were held in the afternoon.

"The idea is to keep negotiations alive as long as possible because you know nothing has happened yet," said Richard Kobetz, director of the International Association of Chiefs of Police, Behavioral Research Division, Gresham, Md.

"You have four possibilities—on-pers, chemical agents, assault team or negotiations. If you start with any of the first three, it's going to be difficult or impossible to negoti­ate. If you start with negotiations, you can always go to any of the other three later," he said.

"The hostage-taker must be made to feel that the negotiator is working for him," said Goldaber, a sociologist and international consultant in conflict management based in North Beverly, N.Y. "It's not really the words the negotiator uses, it's the ability to connect with the person on the other end."

Goldaber and Kobetz, who have negotiated with hostages themselves and are preparing a book to be supplied all police departments, say it is not uncommon for hostages to develop strong bonds of understanding, even friendship, from their shared ordeal.

"It's awfully hard to kill someone you've been in such close quarters with, someone you've shared stories with and called Ed and Charlie for three or four days," Goldaber commented.

The seminar, which was free and open to those engaged in criminal justice, was offered at the request of the Broward County Chiefs of Police Association, according to William Gelfant, director of Nova University's Criminal Justice Program.

Police from 22 cities of South Florida, the Broward Sheriff's Department and the General Bureau of Investigation attended the seminar, which was covered by five newspapers and two TV channels.

The Laurel School Learning Abilities Program

The Laurel School of Nova University, a new facility designed to meet the needs of students with learning disabilities, will begin September 7, Ken Dosé, program coordinator, announced.

Self-contained classes with a low student-teacher ratio will be geared to help students develop motivation and a desire to learn.

Children aged 7 to 18 years, will receive specific remediation and instruction from certified professionals in the areas of language arts, math, reading, speech and language development, guidance and learning ability skills.

Students will be introduced into a general educational setting for part of each day in various activities and classes such as music, physical education, art, shop, media skills, science, speech, and after school clubs and sports.

For more information write The Laurel School, 219 Business U.S. 1, Fort Lauderdale, Florida 33314, or call 792-1144.
