A Priceless Asset in Danger

January 1982 was declared Independent Higher Education Month in Florida by Governor Bob Graham. The Governor pointed out that our independent institutions of higher learning have long provided "irreplaceable" such schools, founded by churches in science, the arts, and public offices. America's most distinguished leaders (ICUF), which are members of the Independent Colleges and Universities of Florida, Inc. (ICUF), known as "eye-cuff." Many of these are also members of the Florida Independent Colleges and Universities Fund (FICF). It is this two nonprofit associations which are sponsoring Independent Higher Education Month.

Also Jacksonville University at Jacksonville; Palm Beach Atlantic University of Miami at Coral Gables; and Warner Southern College at Lake Wales.

Because these independent institutions are free to experiment, innovate, and specialize in certain areas, they give a richness and diversity to the higher educational structure in Florida. They deserve your continuous encouragement as they strive for excellence.

Nationally even as recently as 1950, independent colleges and universities enrolled half the college students in this nation. With the expansion of the public sector since 1950, particularly community colleges, the independent college share of enrollment has dropped to 22 percent of the total.

Margaret Truman Daniels is seen here departing the Wednesday Luncheon Series at Nova University where she discussed her White House Days.

Center for School Leadership and Development Named Finalists in Competition

The National Ed.D. program for Educational Leaders has been selected as one of three finalists in the 1982 AASA Outstanding School Administrators Preparatory Program competition. The staff of the National Ed.D. Program for Educational Leaders were very pleased with this latest recognition of their efforts. Dr. Gerald E. Stroufe, Director, called the nomination as finalist in the competition a nice acknowledgment of the hard work of many people, and pointed out that it was especially welcome as the program entered its tenth year of operation.

The award was introduced by AASA in 1981 to call attention to outstanding preparation programs for school administrators. Criteria used in selecting the three programs judged to be the best entries in this year's competition were: (1) the degree to which the philosophy of the program is carried out through the actual goals and procedures of the program; (2) the degree to which the education of school children can be improved by making $750 per year available to every Florida resident who attends the public or private college or university of their choice. This program, however, has fared remarkably well, because the tuition gap that these independent institutions have had to contend with has been narrowed just enough by lowering tuition and providing grants to Florida students in need of assistance. Florida's independent institutions have also been able to attract large numbers of students who might have otherwise gone to state-supported institutions.

In 1979, the Legislature responded to an appeal to common sense, and immediately closed the tuition gap by making $750 per year available to every Florida resident who chooses to attend a private college or university. As a result, the costs of providing a private education in Florida have declined steadily.

In 1979, the Legislature responded to an appeal to common sense, and immediately closed the tuition gap by making $750 per year available to every Florida resident who chooses to attend a private college or university. As a result, the costs of providing a private education in Florida have declined steadily.

In 1981, the tuition gap was narrowed to $500 per year, to allow nearly all Florida students to attend the public or private college or university of their choice. By making $750 per year available to every Florida resident who chooses to attend a private college or university, the costs of providing a private education in Florida have declined steadily.

Scientists To Meet
At Nova

During the week of February 9, several newsmakers will speak at the Oceanographic Center for a reportwriting session. They are representatives of the NASA Satellite Surface Stress (S) scientific working group, which is chaired by Dr. James E. O'Brien, a Nova University adjunct professor and NASA Goddard Space Flight Center's technical monitor for design.

Dr. Lewis has announced that the first group of graduates from the Osteopathic Medicine and the Medical College of Georgia will be presented in the writing session. They are:

Dean (Ovid Lewis) has announced that Alexander D. Brooks will be the Distinguished Visiting Professor at the law center next semester. Professor Brooks, currently a full member at Rutgers State University, will teach a seminar on law and public policy.

Group Therapy
For Agoraphobics

Vivi DeArmars, Asst. to the Director, Biofeedback Clinic, Nova University, has announced that, beginning the first of the new year, a group will be formed to aid agoraphobics.

Agoraphobia is a fear of the marketplace, a fear of four itself. Persons suffering from the condition often are afraid to leave their homes ... afraid to enter supermarkets, airplanes, 1-95, and much more.

DeArmars, a psychotherapist at the University, has been helping people suffering from agoraphobia for ten years now, but never in a group. She says that the new group will be the first of its kind in West Broward, and will be very helpful to people, in the sense that they will find their problems not alone with the problem.

There will be a small fee for the group which will meet once a week. Call the Nova University Psychology Clinic at 475-7588 for further information.

Ocean Sciences Receives Grants

The National Science Foundation recently awarded the following grants to Nova University, Herbert Yu Chao and Julian P. McCreary, of the Oceanographic Center:

C. BURNEY: "Direct In-Situ Rates of Microbial Release and Uptake of Dissolved Carbon in Marine Phytoplankton" $ 30,000 3/9/83

S. Y. Chao: "Models of 3-D Stratification" 164,607 4/18/82

J. McCreary: "Coastal Circulation" 3/31/84

Other grants and contracts in oceanography awarded since July 1981 are the following:

P. Blackwell: NSF/Harvard: "Cocolithophore Special Aspects and Morphology in Warm Core Rings" 25,000 7/1/81

Blackwell: "A Warm Core Ring in an Analog of Paleolatitude Change" 94,961 11/1/81

D. Dodge: NOAA: "Historical Pollution, Levels and Ecological Responses in Sub-tropical and Tropical Seas" 99,756 7/1/82

K. Dudoit: "Dynamical Studies of Turbulent Flows in the Ocean" 56,570 12/31/82

J. McCreary: NSF: "Studies of Tropical Wind-drive Ocean Circulation" 55,000 7/1/81

J. Witte: NASA: "Administrative Support for Satellite Surface Stress and Ocean Data Relay Satellite Working Groups" 80,000 9/1/81

Graduates Announced

The Master of Science in Human Services is proud to announce the following graduates who were counsellors during the summer months of 1982:

Lauren Ansvaard
Thelma Nichols
Clever Broady
Mary Ann Crane
Norma Stiles
Fred Monroe
Marty Waffendoff

We wish them the very best and feel good about sending such special people into the community as repre-

sentatives of Nova's Human Services Master's Program.

Our Orlando students are presently completing their coursework and beginning to experience the world of field placements and projects. They are approaching the new ventures with excitement and enthusiasm. Graduation can't be far behind.

Dear Nova University Friends:

During the last eight months while my son, Mark, was ill, so many of you rushed out to friendship. I am grateful for your help. during the most difficult period of my life.

I want to take this opportunity to thank you, not only for that help, but also for the many reminders that were donated in Mark's memory.

Thank you, not only for your kindness and generosity.

Stoneworth, Martin Vanessen

New Programs

In Orlando

Nova University is now accepting registrations into the Master of Science in Human Services program, a new program being offered in Orlando on Saturdays. For more information or to apply, please call 1-800-432-5020, ext. 7555 or 7519 (Human Services Program office). New term begins February 13, 1982.

New Program

In Orlando

Nova University is now accepting registrations into the Master of Science in Human Services program, a new program being offered in Orlando on Saturdays. For more information or to apply, please call 1-800-432-5020, ext. 7555 or 7519 (Human Services Program office). New term begins February 13, 1982.

Contemporary Issues

Workshops

The Master of Science in Human Services program continues to offer contemporary issues in Human Services workshops at the beginning of each nine-week cycle. The next 3-day workshop, entitled: Advocacy - The Key To Change will be offered Monday, February 22; and Wednesday, February 24 on Main Campus. The workshop runs from 6 to 10 p.m. each evening and is available for 1 graduate semester credit or as a non-credit workshop. Please call program office at 475-7585 for more information. (Attendence at all three sessions is required."

Our last workshop on Juvenile Justice was well received by the participants and brought in local experts who took the workshop to a higher level. There was "field" by visits to an area residential youth facility and a detention facility. Drs. Solomon, Dennis Helper and Barbara Mitchell were the presenters. We are pleased that they agreed to conduct the February workshop also.

Alexander D. Brooks
To Teach Law And Psychiatry Here

Dean (Ovid Lewis) has announced that Alexander D. Brooks will be the Distinguished Visiting Professor at the law center next semester. Professor Brooks, currently a full member at Rutgers State University, will teach a seminar on law and public policy.

According to Acting Dean Mechanic of Rutgers, Professor Brooks is "one of the distinguished scholars in the country in the area of mental health law, and a brilliant and charismatic teacher." He authored a casebook in mental health law which received an award from the American Psychiatric Association as the most important contribution in the field in the year it was published. He is also a recognized major figure in the mental health and law field for the National Institute of Mental Health.

Students and faculty look forward to welcoming Professor Brooks to the law center.

Early Admissions

Doctor Of Osteopathy

New York Institute of Technology - through its Center for the Natural Sciences and New York College of Osteopathic Medicine - offers a combined baccalaureate/osteopathic physician program to talented, highly motivated students beginning the fall semester 1982.

A select number of those who qualify for admission will be admitted to the college's Center for the Natural Sciences and New York College of Osteopathic Medicine, will receive a Bachelor of Science degree in life sciences (preprofessional option) and a Bachelor of Science degree in the natural sciences portion of the program, starting in the fall semester 1982.

Our program is designed for those who will qualify for admission to the college's Center for the Natural Sciences and New York College of Osteopathic Medicine, will receive a Bachelor of Science degree in life sciences (preprofessional option) and a Bachelor of Science degree in the natural sciences portion of the program, starting in the fall semester 1982.

Participants in the program will earn a Bachelor of Osteopathy degree after an additional three years in the medical college. The combined program enables students to achieve BS/DO degrees in seven years rather than the traditional eight. Additionally, while enrolled in the life sciences portion of the program, students will have the opportunity to familiarize themselves with osteopathic medicine and the medical college's faculty through supervised field placements and practica. They will also take the most important part in the writing session. They are:

Lauren Ansvaard
Thelma Nichols
Clever Broady
Mary Ann Crane
Norma Stiles
Fred Monroe
Marty Waffendoff

James W. Colvert Sr. Named Director of Development

James W. Colvert Sr., a resident of Broward County since 1965, has been named Director of Development for Nova University, it has been announced by President Abraham Fischer.

Colvert, who holds a B.A. degree from Birmingham Southern College and a Master's of Divinity from Louisville Presbyterian Seminary, has an extensive background in all phases of the development field.

Before joining Nova, Colvert was affiliated with American City Bureau/Beaver Associates, headquartered in Chicago. The firm is one of the top fund raising companies in the country, offering counsel to many well known entities. It was here that Colvert developed capital marketing programs, developed studies and operating fund campaigns for institutions such as the YMCA, church groups and colleges and universities.

During the years 1973-79, Colvert served as Trust Fund Development Executive for the South Florida Council, Boy Scouts of America. There, he designed, developed, implemented and administered deferred gifts programs.

Colvert says that he came to Nova because, "It affords me the stability that I was looking for." He then as an immediate goal tackling the capital needs of the university and implementing plans and designs for long range programs in the areas of endowment and deferred funding. Further down the road he would like to establish an endowment for the university and its various centers to provide operational dollars beyond tuition fees, etc. and to provide the university endowed chairs for leading scholars or senior professors.

Colvert is married to the former Sue Bentley and they are the parents of a daughter and two sons. Mrs. Colvert is a classical pianist who teaches privately and also performs. She is currently President of the Broward County Music Teachers Association and the Coral Springs Chairman for the National Guild of Piano Teachers. They make their home in Coral Springs.

Gifted Program at Family Center

Carl Labranza, left, and Dante Gagne are busy inspecting various objects, in this case a honey bee wing, in a class after school at the Mainland Family Center on the Nova University campus in Fort Lauderdale. The program, which is geared for the gifted child, grade second to twelve, still has openings. Call 475-7670 for further information.

INTER ALIA

By John F. Campbell and Scott Wright, Law Center

With the nomination of Judge SANDRA O’CONNOR to the United States Supreme Court, WPLG-TV, Channel 10, Miami, dedicated its Focus segment to "Women in Legal Education." The segment featured Associate Dean GAIL RICHMOND, Assistant Dean CAROLYN RUBIN, Professor ELLEN HYMAN, and third year students, LORI LAPIAN and AUDREY PAIN... At Professor BRUCE ROGOW’s urging, the PDA Great Lakes Adventure students... statute which limited the rights of political parties to endorse candidates in primaries. Professor ROGOW was also instrumental in the recent reversal of a death penalty case in the Florida Supreme Court... Professor MICHAEL RICHMOND has been named editor of the Florida Defense Lawyers Association Newsletter for the upcoming year... While beginning a study on the Florida Appeal Courts practice of issuing per curiam affirmations rather than full opinions, Professor MICHAEL MASINTER is awaiting the outcome of three petitions for certiorari now pending before the United States Supreme Court... NOVA LAW REVIEW has announced the publication of the third issue to its fifth volume. This is the first time in the history of the Law Review that a volume with this number of issues has been published. Director of Admissions, CATHY CICIKOWSKI reports that Nova Law Center sponsored Law Days three months in succession this fall. Law Days are held to give Florida college seniors interested in law school an opportunity to visit Nova and meet the professors... For the gifted students of family members of the graduate students... Professor MARK DOBSON has been appointed to the United States Court of Appeals for the Third Circuit, Judge, United States Court of Appeals for the Third Circuit, will speak Monday, February 15, at the Nova University Law Center Distinguished Lecture Series... Judge Higginbotham was invited to the United States Court of Appeals by president Jimmy Carter and was sworn in by Chief Justice Warren Burger in 1977. The author of more than 40 articles in scholarly journals, his most recent book, In The Matter of Color, Race and the American Legal Process, The Colonial Period, was published by Oxford University Press.

This Inaugural lecture by Judge Higginbotham is a continuation of community involvement in the Law Center’s tradition of community service, with significant legal and social issues.

Topic of Judge Higginbotham’s address will be “Race and the American Legal Process.” The event to be held at Fier 66 is open to the public and begins with drinks at 6:30 pm, dinner at 7:00 pm and speaker at 8:45 pm. The cost for dinner is $20 per person. Call 522-2500 for registration forms.

Competition

The University School

When James H. Shroeder became Director of the University School in Coral Springs last summer, he made it his top priority to get across the Nova philosophy to all new teachers... some who were part of the original Westford Academy which became the University School.

That philosophy, above all else, says Shroeder, is "focus on the individual and close communication between the school and the home."

Dr. Joseph Randazzo, headmaster of The University School, which is headquartered on the Davie campus, says that "The University School has always been committed to personalizing and individualizing the student's experience." Randazzo adds, "We are a school of quality education for school children in the range of normal to gifted."

Visiting the school on a windy-and-cold-for-Florida January morning, nothing was more apparent than the fact that "doing things out of the ordinary is ordinary here."

Kindergarten children learning to type? Third graders learning braille? Research projects in the second grade? A project that involves students' describing "what it feels like to be an Indian." And then there are the math skills of sixth to eighth graders that involve all sorts of projects. In a study of graphs, students surveyed every pupil in the school, 195 in all, and worked up graphs depicting everything from students' favorite candy to favorite sneakers. For measurement studies, they have measured their homes and given exact figures for carpeting, paneling and wallpapering. All these things, and so much more, take place daily in the two buildings located at 3621 N.W. 101 Ave., just south of Sample Road.

Shroeder, who knows the pressures of teaching, relates the philosophy, "Let them think, let them do. And so the kindergarten through eighth graders do just that. Shroeder, a native of Indiana, has his training in secondary education but taught first through fifth grades at the University School in Davie beginning in 1976 before becoming Asst. Dir. He remembers those early days at University School when there...
were 182 students in trailers, compared to the 1200 students today on the sprawling campus. Enrollment at the new school is up to 196 today from a starting enrollment in September of 161. Says Shroeder, "There is a great deal of interest for next year. Parents believe in Nova's philosophy.

Among the many services of the school is free tutoring after school, by appointment, for grades one through eight. There are after school clubs for grades three to eight that change every two months. Bowling, roller skating, volleyball, golf, games, library research... are just a few after school activities.

Shroeder sees a very strong interest in sports at the new school. He speaks with pride of the golf team forming under the direction of a local pro.

All students are involved in many field trips throughout the year... Recent trips included the Discovery Center for kindergartners through grade three, Tallahassee and Cape Kennedy for fourth graders, the Nova Oceanographic Lab for fifth graders, King Cromartie House for sixth graders. Eighth graders have visited a Spanish restaurant, Radio K-102 and a water treatment plant. Projected field trips for these students includes a seminar at sea.

In the midst of all this learning and doing is something that Jim Shroeder is quick to point out... a very strong parent volunteer program. Sid Vogel, director of parent volunteers, has assembled parents that come in daily, working individually with students for 20-30 minutes a day. The parents are very involved in the typing classes for kindergarten through third grade, for example. Complementing this is the UFO (University Family Organization) which has many special projects including a gift sale held for Hannakah and Christmas, enabling children to do their shopping at school.

And so it is that the school with the same, identical philosophy as the original University School on the Nova University campus in Davie, continues to grow... guided by a young man from Rolling Prairie, Indiana, who really cares.
Florida Derby Ball Luncheon

by Rose Ann Schaefer

Tri-County committee members for the annual Florida Derby Ball, sponsored by Gulfstream Park, will benefit for Nova University, met for luncheon at the Fort Lauderdale Marriott Hotel and Marina, the scene of the March 29th gala.

Perennial Chairman, Mrs. Robert A. Stewart (Mildred), greeted approximately 65 guests and introduced the General Chairmen, Mr. and Mrs. Thomas M. Clark (Midge) and Co-Chairmen, Mr. and Mrs. Dale Ledbetter (Mary).

Dr. Fischer explained that monies from this season’s ball will go towards the planned expansion program at Nova, and said that in all, the ball had provided more than $600,000 for Nova since 1969. He also introduced a dedicated Derby Ball supporter and former chairman of the ball, Mrs. Francis (Mary) McCaill, who now is chairman of the board of Nova University.

A special guest at the luncheon was Mrs. Joseph H. Fowler of Boca Raton, the former Mary Anna Donn of Miami, and a vice president of Gulfstream Park.

A Yacht also was emphasised at the luncheon in the outstanding outfits worn. Knee knickers, pants that resembled overcoat pants were on the scene, as were the more traditional ankle pants. And the weather played right into the hands of Dance Fashion being cool enough for pants suits, sweaters, hats and even furs. An old-time “Headache Band” accented one pants outfit.

Mrs. Douglas (Alice) Donn, wife of the young president of Gulfstream Park

A Priceless Asset

(Continued from Page 1)

ity has grown to the extent that the already, lower tuition charges at the State Universities are rising at a much slower rate than they are at private colleges.

It is ironic that more state tax funds go to support out of state and foreign students in our state-supported system than are invested in helping Floridians attend an independent college or university in Florida.

While some critics of the program charge that some affluent parents are being subsidized by tax dollars, it should be apparent that they would be subsidized more if they were to choose a State University, or even a community college. Florida taxpayers with children attending ICUF institutions are actually being short-changed.

Unless the Tuition Voucher program is nurtured and encouraged to grow it will cease to be an effective force in slowing the increase of dollar differential between the public and private tuition charges.

The only ones being short-changed by the Tuition Voucher program are those it was designed to help — the students who chose a private institution and their parents. They are taxpayers, but they are not receiving anywhere near the benefits from state tax dollars in terms of financing a college education as parents with youngsters enrolled in a State University.

There are statistics to prove that the state and its taxpayers are saving more money than ever as a result of Florida Student Assistance Grants and the Tuition Voucher program. Without these programs, the Independent Sector faces a bleak future, and everyone would lose. A major portion of a priceless asset would be lost to Florida and tax dollars.

L-R — James W. Colbert, Sr., (Director of Development) wife Sue and Nova University Board Chairman Mary McCaill.
Alumni Feature
Chester F. Kowalski:
Chief of Police, Seminole Police Dept.
Seminole Tribe of Florida

For the past 14 years Chester "Chet" Kowalski, a 1980 graduate of the Masters in Criminal Justice program at Nova, has lived with one goal uppermost in mind. To achieve a position such as the one he achieved in June of last year.

Chet became the Chief of Police of the Seminole Police Dept. of the Seminole Tribe of Florida. His responsibilities extend into five counties... Broward, Palm Beach, Glades, Hendry and Collier. Says Chet, "These are people of a different culture and a lot of people don't know what the tribe is all about."

Before joining the department, Kowalski met several times with the Tribal Council to learn about problems facing the reservation. He works closely with Jim Shore, attorney for the Seminole Indian Tribe.

Kowalski is very hopeful of persuading the youth of the reservation to join the police force, which has grown to a staff of 14, from two, since he took over June 1, 1981.

Before joining the Seminole group, Kowalski was Police Commander of the North Lauderdale Police. He credits Police Chief Jess Boytell, his boss in North Lauderdale, for expert guidance in his career and studies at Nova. Boytell is a graduate of the DPA program which Kowalski is now involved in himself. And, the Niagara Falls native also gives much praise to the University of Miami, where he is a graduate of the School of Law.

Kowalski says that most of his professors at Nova in the Criminal Justice program were in the judiciary, senators and persons in the corrections field. "Research is a big part of law enforcement and finding the solutions to problems," says Kowalski.

Kowalski, who is 38, has much to cite in accomplishments but the thing he is most proud of is the logo he now has for the Department. It is seen daily on the 13 Seminole Police cars that travel the many miles of the Seminole Reservation.

Contemporary labor management issues will be explored at the Annual Winter Training Conference, sponsored by New York Institute of Technology's Center for Labor and Industrial Relations in association with the CLIR Advisory Council. The five-day training conference will be held in Miami Beach, Florida, at the Kонтоver Hotel, from February 17 through 20.

Conducted by CLIR director, Dr. Michael M. D'Auria, and the Honorable Louis L. Levine,Chairperson of CLIR's Advisory Council, the seminar features speakers and panelists from both the private and public sector who are nationally recognized for their expertise in the areas of concentration covered at the seminar.

Topics include: "Labor Management Relations - One Year Into the Reagan Administration," "Impact of the Multi-Employer Terminations in Collective Bargaining Agreements," and "Media Treatment of Labor and Management Practices." At the conclusion of the conference, Certificates of Completion will be presented by Dr. D'Auria and Mr. Levine.

A distinguished faculty has been assembled including James Manning, Esq., partner in the law firm of Israeloff, Manning, and Raab; Richard J. Bornstein, executive vice president, Huntington Chamber of Commerce; Kenneth P. Camisa, senior vice president, Martin's Segal Company; Abraham S. Weiss, president, A.S. Weiss Associates, Inc.; Lewis W. Parker, director Asset Management, Aminvest Corporation; and Murray Foyntz, president, Consolidated Corporate Consultants, Inc.

The conference meets IRS requirements for continuing education programs. The Center for Labor and Industrial Relations of New York Institute of Technology offers the master of science degree in Labor and Industrial Relations at NYIT campuses in New York City and Long Island.

For additional information concerning registration fees and hotel arrangements (special rates available), contact NYIT's Center for Labor and Industrial Relations at (516) 686-7707/7703.
Dr. Richard Dodge was the recent invited guest speaker at the Miami Geological Society in Coral Gables, Florida. On December 2 he presented a slide lecture on the geological and sea level history implications of the raised reef terraces in Haiti. The results of this work indicate that the elevations of past sea level, which has varied many times due to glacier buildup during ice ages, may be accurately determined from the study of fossil coral reefs. For example, 80,000 years ago world-wide sea level stood as much as 20 meters (60 feet) below present-day sea level.

Dr. Pijush Kundu and Shenn-Yu Chao, of the Oceanographic Center, attended the annual fall meeting of the American Geophysical Union, December 7-11, in San Francisco. Dr. Chao presented a paper before the Physical Oceanography section.

On November 16, 1981, Professor Michael Masinter (Law) served as a Workshop Leader for the National Juvenile Litigation Advocacy Conference in Saint Louis, Missouri. Professor Masinter’s work was directed to more experienced litigators, dealt with Problems of Federal Litigation.

Dr. Edgar B. Cale, Director of Continuing Services, Center for Higher Education at Nova University, passed away suddenly Friday morning, December 18 at his home in Wilton Manors.

Dr. Cale joined the university in 1975 after serving as Dean, Moran Executive Institute where he developed and administered the training program for intermediate and senior management levels.

His career spanned some forty years in undergraduate and graduate teaching and administration both in large universities and in specialized institutions.

Dr. Abraham Fischler, President of Nova University, said, “He brought to Nova a great deal of experience and he was so willing to undertake a variety of tasks that he was a pleasure to have around.”

Dr. Ross Moreton, Director, Center for Higher Education, said, Ed will be greatly missed by all of us. He was working on a great many important things here at this university.

Dr. Cale is survived by his wife Margery F. Cale, one son, Edgar Barclay Cale, three daughters, Audrey Bedford, Jeanne Overton and Patricia Beaver, all of Philadelphia, and 11 grandchildren.

Dr. Julian McCreary

Undercurrents: During January 7-11, Dr. Pat Blackwelder, of the Oceanographic Center attended a Warm Core Rings Data Synthesis Workshop at the Woods Hole Oceanographic Institution, Woods Hole, Mass. Results of the September 16 - October cruise to study the Gulf Stream meander will be discussed by the Principal Investigators. Dr. Blackwelder will also attend the American Society of Limnologists and Oceanographers/American Geophysical Union annual meeting in San Antonio, February 16-21. She will present a paper entitled “Coralithophore Community Structure and Calcification in Gulf Stream Warm Core Rings.”

THE ARMY PAYS More than ever

Job Hunting? If you are or are about to, you probably already know it’s rough. The higher paying jobs all require experience and/or education. Consider this:

- The Army offers job training, travel, free medical and dental care, experience, and much more. Sound good so far? There’s more. The Army is now paying more than ever before, thanks to a substantial increase in pay and allowances.

You can now be commissioned in the Army, and receive a monthly base pay of $1,056.50 as a Second Lieutenant, $1,217.10 as a First Lieutenant, or $1,395.90 as a Captain, depending upon the grade for which you qualify.

If you’ve already found a job that offers all of this, great. But if you haven’t, talk to your local Army representative and he’ll give you the facts. Check it out. It’s a great opportunity.

Don Morrow
