those papers submitted with a single topic area will be considered by the Research Office.

---Together with this paper, you should submit your resume and the name of the person you wish to have as your Readings instructor for approval by the Research Office. Be sure to have their concurrence prior to submitting their name. (If they are not on the Nova staff, their resume must accompany this submission.)

---When your topic is approved you will receive written confirmation from the Research Office. This confirmation will be accompanied by an Instructor Approval Form for the Readings course. Forward to the instructor the Instructor Approval Form for signature. The instructor should then return the form to you.

---This form should accompany your registration. It should be sent, together with the appropriate tuition and fees, to the Program Office. You will be registered for the course under the instructor's name to facilitate grade processing on your academic record.

NOTE: This is a lengthy process. Please carry out these activities the term before the term during which you wish to take this course.

Please be advised that failure to comply with these instructions will result in your registration being returned.

DISSERTATION REGISTRATION

A student working on his/her dissertation must maintain active status by being registered in the dissertation process each term. The dissertation for the Doctoral Programs is 10 credits. Students register for the dissertation in two-credit increments. The first six credits comprise the dissertation proposal (CSA 6091, 6092, 6093); the remaining four credits comprise the final draft (CSA 6094 and 6095).

Dissertation Proposal:

Registration for the dissertation proposal is normally done in three, two-credit increments (CSA 6091, 6092, and 6903), allowing the student three terms (one year) in which to submit an approved proposal. When a student registers for CSA 6092, a "PR" notation will be recorded on the student's academic record for CSA 6091. The same will occur for CSA 6092 when a student registers for CSA 6093. (It should be noted that "PR" is not a formal grade and is given in place of an "I" (Incomplete); the Program Office is assuming progress in this one-year time frame.

If a student should exceed the above time frame for the dissertation proposal, he/she must petition the Research Office for an extension by submitting a progress report. This progress report must be prepared by the student, indicating status of proposal and estimated
completion date, and have the signature of the chairperson. All
progress reports will be reviewed by the Research Office. If the
progress report is accepted, the student will be permitted to register
for CSA 6097 (Dissertation Continuation) the tuition for which is the
equivalent of two credit hours, plus any appropriate registration fees.
This process will continue until approval of the dissertation proposal
by the Research Office. When the initial registration for CSA 6097 is
processed, a "PR" notation will be recorded on the student's record for
CSA 6093.

At such time when the student's proposal is accepted, the "PR"
notations for CSA 6091, 6092, 6093 will be converted to formal grades of
"P". The "PR" notation will remain for any CSA 6097 Dissertation
Continuation registration(s).

Dissertation Draft

Registration for the dissertation draft is normally done in two,
two-credit increments (CSA 6094 and 6095), allowing the student two
terms (eight months) in which to submit an approved draft. When a
student registers for CSA 6095, a "PR" notation will be recorded on the
student's academic record for CSA 6094. It should be noted that "PR" is
not a formal grade and is given in place of an "I" (Incomplete); the
Program Office is assuming progress in this time frame of eight months.

If a student should exceed the above time frame for the
dissertation draft, he/she must petition the Research Office for an
extension by submitting a progress report. This progress report must be
prepared by the student, indicating status of draft and estimated
completion date, and have the signature of the chairperson. All
progress reports will be reviewed by the Research Office. If the
progress report is accepted, the student will be permitted to register
for CSA 6097 (Dissertation Continuation) the tuition for which is the
equivalent of two credit hours, plus any appropriate registration fees.
This process will continue until approval of the dissertation draft by
the Research Office. When the initial registration for CSA 6097 is
processed, a "PR" notation will be recorded on the student's record for
CSA 6095.

At such time when the student's draft is accepted, the "PR"
notations for CSA 6094 and 6095 will be converted to formal grades of
"P". The "PR" notation will remain for any CSA 6097 Dissertation
Continuation registration(s).
CM COURSES

cml - In this course a student demonstrates pc literacy and is introduced to the UNIX operating system. Cml is a prerequisite for the other cm courses.

cm2 - Prerequisites.
1. Completion of 6060. During the csa6060 session you will be provided with guidelines for selecting a topic from the academic literature and writing a literature review.
2. Completion of cml. During the cml course you should develop a competency using UNIX to support your other cm activities.

Registration Procedure

PRIOR TO REGISTRATION for cm2, send the following items:
A. The completed literature review paper (5-10 pages)
B. Xerox copies of 5 articles from the literature review. These articles should be related--have overlapping lists of references--and ALL report findings on academic research. Include a review of each of the xeroxed articles. Each review should be attached to its article and contain the following components:
--On what literature was this research based?
--What is the core theory that is being developed?
--What is the basic research question?
--What are the research hypotheses?
--What type of research design was used?
--What statistical techniques were used?
--What were the findings of the research?
--What were the suggestions for further research?
This information will be used to determine whether or not you actually have a good literature review.

Upon acceptance of the above by the Research Office by written notification, you may submit your registration for cm2 together with a copy of the acceptance notice.

cm3 - This is a methodology review.
Both cm2 and cm3 must be completed before you submit your concept paper.

cm4 - This course reviews dissertation-related statistical techniques using SPSSX on Nova's VAX computer. Approval of the concept paper is also a prerequisite for this course. Cm4 must be completed before submission of your proposal.

COMPUTER TIME IS REQUIRED FOR THESE COURSES. IT IS TO BE PURCHASED IN INCREMENTS OF 15 HOURS. THE HOURLY CHARGE IS $10.00 - (15 x $10 = $150).
Order of Course Delivery for School of Business Doctoral Programs

Eight of the School of Business Doctoral Courses are offered in a revolving format. To aid students in planning, these courses are listed below in the order in which they are delivered. Using this information a student can project coursework for his/her entire program.

In addition to taking 3 of these courses each year, it is recommended that students attend the Washington Policy Seminar in the first year. Students should also register immediately for the first credit of CSA607l--Computer Mediated Research Methods. CM competency will become a prerequisite for more and more courses.
